DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Crother-Bradley Farmhouse c. 1800 is a 2½ story log structure located on Red Point Road and facing southwest. The primary gable has a northwest/southeast axis.

The main 2½ story log side hall/parlor is 3 bays across by one room deep and resting on an uncoursed fieldstone basement. The exterior is covered with asbestos siding and the medium sloped roof is sheather with composition tile. Extending north from the main block is a 2 story addition two bays across by one room deep. A single story shed roof front porch is attached to the main facade. During the 20th century a single story kitchen addition was attached to the west side of the rear section.

The main facade is 3 bays across with an entrance in the eastern opening. The main door has been replaced and the trim is plain. Single pane sash windows have replaced the earlier first floor windows but 6/6 sash remain on the second. There is a plain boxed cornice at the base of the roof. The east and west gable end are basically the same. The east gable end has a 4/2 attic light and double sash windows that light the first floor hall. The only difference with the west gable end is the massive brick chimney piece rises out of the end and has a two course cap. Two 4/2 attic sash windows flank the stack. An exterior basement entrance is located on this side.

The rear 2 bay addition is similar in appearance. An entrance is located in the southern bay and has an inclosed single bay gabled entry. There are 2 6/6 sash on the second floor. An interior end stack rises out of the north gable. The west side is partially covered with the 20th century kitchen addition.

The interior has retained some early features. The basement has a large stone arched chimney support. Also, not evident from the exterior due to the porch are two basement windows with diamond cross-sectioned horizontal bars.

The first floor has retained its room configuration and simple doc-leg stair. The opening between the hall and parlor had been widened. The second floor was not seen but may possibly yield more early woodwork.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Crothers-Bradley Farmhouse is a significantly large log structure that is relatively uncommon. Due to a number of remodelizations the interior has lost some of its early woodwork. The structure, however, is fairly significant since it is the earliest remaining farmhouse in the general vicinity. The agrarian aspect of Elk Neck is slowly being lost to development and ~~second~~^{renewed} growths of forests. Although no longer a farm, the house remains as a reminder of the neck's last economy.
