DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The William Flowers House c. 1860-1880 is 2¹/₂ stories high and 2 bays across by 1 room deep. The frame house rests on a north/south slope with the main axis running in that direction. The front faces east. A shed roofed room extends off the west side (back) of the house and an open shed porch is on the east (front) of the structure. The house is supported by an uncoursed stone foundation which is fully exposed on the south^{and} west sides.

The house has been drastically altered both inside and out. Along with an aluminum sheathing the windows for the most part having been given a 2/1 sash. A composition tile roof covers the medium sloped roof. The eaves are extended and a sloped soffit is found on the front and back of the house. A stuccoed chimney stack is located in the central area of the roofline. The porch posts have been covered with aluminum also.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This house has no architectural merit, other than its existence as a structure that is located on the 1877 Lake Atlas.

It is another example of the late 19th century houses that were built due to increased development.
