The Southern Maryland Railroad extends from Brandywine in Prince George's County to Point Lookout in St. Mary's County, passing through Charles County. The establishment of the Southern Maryland Railroad was one of the most influential events that affected the economy and settlement of southern Maryland. The state incorporated the Southern Maryland Railroad in 1868 to construct a railroad to extend from Point Lookout to what was referred to "some point in Prince George's County". The route was surveyed in 1870 with construction beginning soon after that. The railroad opened in 1881. However, the Southern Maryland Railroad Company went bankrupt in 1885, suggesting that the line was either not initially as profitable as hoped or the company was plagued with some other financial difficulties resulting in its demise. A year later, the Washington and Potomac Railroad company purchased the line, which they opened-up to freight and passenger traffic. The Washington and Potomac Railroad Company profited from its operation of the Southern Maryland Railroad and even extended the line further south. In 1917, the Washington and Potomac Railroad Company dissolved and was replaced by the Washington, Brandywine, and Point Lookout Railroad Company. Comprised of local farmers and business leaders, this company took over the operation of the Southern Maryland Railroad until the 1940s. By 1942, freight traffic had slowed to the point that the line was only in operation for two days a week. In this same year, the Navy became interested in the line and acquired it for transporting freight to and from the Naval Air Station and Test Center located on the Patuxent River at Cedar Point. The old Southern Maryland Railroad was finally abandoned in 1965, and its tracks were removed in 1966. Today, the Commissioners of St. Mary's County own what remains of the abandoned portion of the line.

MARYLAND HISTORICAL TRUST
NR-ELIBILITY REVIEW FORM

CH-674

Continuation Sheet No. 1

The Southern Maryland Railroad played a significant role with regards to economic developments within Charles, St. Mary's and Prince George's County. The railroad help sustain the tobacco economy within the rural areas of Charles and St. Mary's counties during the late nineteenth and early twentieth century. Tobacco warehouses were built along the railroad where the commodity was collected and shipped to larger markets vial the Southern Maryland Railroad.

The Southern Maryland Railroad does not retain sufficient integrity to be eligible for listing on the National Register of Historic Places. In order to retain good integrity, a railroad ideally should retain character defining features such as rails and ties located on a ballast or in a cut. At a minimum the alignment of the rail line should remain clearly readable in a built or natural landscape reflective of the environment in which the line operated. The rails have been removed from the entire Southern Maryland line. Within the Hughesville vicinity, the most intact portion of the Southern Maryland Railroad is located immediately north of where the railroad intersected with Route 5. Here, a few hundred feet of the railroad right-of-way still contains wooden ties set atop a ballast. However, for the majority of the surveyed portion of the railroad through Hughesville, little remains of this resource. No ties and no ballast are present for that portion of the railroad right-of-way extending west of Route 5 through Hughesville. Within the majority of this area, the right-of-way exists as a dirt road used by local traffic and a large portion of the line just north of the crossing of Burnt Store Road has been lost entirely with the construction of Banker's Lane. Portions of the right-of-way south of Burnt Store Road have also been paved over providing a small access road to the rear of residences fronting Route 5. Because of the removal of key character defining elements and the fact that modern development has also altered the actual railroad landscape itself, the Southern Maryland Railroad through Hughesville has lost integrity of design, materials, feeling, and association.

7. Description

Inventory No.

CH-674

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

What remains of the Southern Maryland Railroad extends through Charles and St. Mary's counties in southern Maryland. The surveyed portion of this railroad was conducted in the Hughesville vicinity in Charles County. The Southern Maryland Railroad right-of-way intersects with Route 5 just north of Hughesville and then runs parallel and west of this highway through and south of the town. Route 5 within the Hughesville vicinity contains a mix of early-to-late twentieth century development. Early twentieth century commercial buildings and a few residences are mixed with modern commercial development consisting of mostly gas stations and small-scale commercial building within downtown Hughesville. Residential development aligns Route 5 south of the downtown core, consisting of both a mix of early-twentieth century vernacular and post 1950 suburban development. Little remains of the Southern Maryland Railroad in the Hughesville vicinity. The rails were removed during the 1960s following the abandonment of the line, leaving behind only the railroad bed, much of which has been either concealed with overgrowth or has been lost to modern development.

The only resource within Hughesville with associative ties to the railroad is the Farmer's Tobacco Auction Warehouse buildings, located in Hughesville Between the railroad and Route 5. The warehouse complex consists of three one-story, long rectangular plan, wood-frame buildings set on concrete block foundations and one Quonset hut. The buildings appear to date to the early-to-mid twentieth century and were built at this locations to be adjacent to both Route 5 and the railroad.

The Southern Maryland Railroad crosses Route 5 about 1,000 feet north of the Farmer's Tobacco Auction Warehouse. North of this point the railroad right-of-way is located in a linear clearing cut out of a heavily wooded area. Most of what was the railroad bed in this area is now a small dirt road about 15 feet wide, which is used by local traffic. Some Portions of the old railroad in this area remain unused, concealed by dense overgrowth. Unlike other portions of the present railroad, railroad ties sill lie unaltered in the railroad bed, despite the fact that the rails were removed.

There are no visible remains of the railroad where it once crossed Route 5. South of the crossing the railroad bed again exists only as a dirt road used by local traffic until reaching the Farmer's Tobacco Warehouse. What was once the railroad bed located behind and west of the warehouses is now a 20 foot wide dirt road. South of the tobacco warehouse, the railroad-right-of-way extends a short distance through an undeveloped cut, containing dense overgrowth, ending at a Banker's Lane, a paved access road leading from the parking lot behind a modern bank building located along Route 5 to Burnt Store Road. The cut and railroad bed in this area have been lost to this development

Immediately south of Burnt Store Road, the railroad right-of-way has again been paved over for about 1,000 feet, providing an access road to the rear of a number of dwellings and one business located on the west side of Route 5. Beyond this area, the railroad bed extends along another undeveloped cut with trees and heavy overgrowth located along both sides of the right-of-way, ending at a clearing where the right-of-way extends along a grassy ballast through the back yards of a small residential development located along Route 5. South of this area, the railroad bed extends through a deep cut east of a post 1960 suburban residential development and west of Route 5.

8. Significance

Evaluation for:

 National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

See DOE Form

9. Major Bibliographical References

Inventory No. CH-674

Gibb, James G., Archaeological Consultant

2001 *Phase I Intensive Archaeological Survey of the Nubian Place and Foster Lane Realignments, MD 5 Hughesville Bypass, Charles County, Maryland.* Prepared for the Maryland State Highway Administration.

10. Geographical Data

Acreage of surveyed property 24.24
Acreage of historical setting _____
Quadrangle name Hughesville, MD Quadrangle scale: 1:24 000

Verbal boundary description and justification

The boundary for the Southern Maryland Railroad comprises the current property owned by the Board of St. Mary's County Commissioners, Tax ID# 0909009825. This contains the entire 3.03 miles or 24.24 acres of the historic railroad from Charles County to Chalk Point in St. Mary's County. Located within this property includes what remains of the entire railroad bed. Because much of the historic setting surrounding the railroad has been altered with modern development, especially in the Hughesville area around Route 5, additional acreage surrounding the entire railroad would not contribute to the property.
