

Benedict 2-Room School
CH-690
Benedict
Private

Circa 1886

Likely constructed during the last quarter of the 19th century, the Benedict 2-Room School is a one story frame structure with an overall L-plan. Situated at the entrance to the village of Benedict, the building's most unique feature is its exterior brick chimney. Facing northeast, the schoolhouse is sited on a small lot at the corner of Prince Frederick Road and Benedict Avenue. Consisting of two equally sized rectangular structures, the front-gable faces northwest and the wing extends to the southeast.

Although little historic material remains, the Benedict 2-Room School derives its significance as an example of the small handful of 2-room schoolhouses in use throughout Charles County in the early 20th centuries. Two-room schoolhouses were far less common than their 1-room counterparts. In 1918, there were 77 one-room schools in comparison to only nine 2-room structures.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Likely constructed during the last quarter of 19th century, the Benedict 2-Room School is a one-story frame structure with an overall L-plan. Situated at the entrance to the village of Benedict, the building's most unique feature is its exterior brick chimney. Facing northeast, the schoolhouse is situated on a small lot at the corner of Prince Frederick Road and Benedict Avenue. Consisting of two equally sized rectangular structures, the front-gable faces northwest and the wing extends to the southeast. The historic landscape includes two large trees standing in the schoolyard. However, the site is shared with a later mid-20th century dwelling and an assortment of late 20th century material that largely detracts from the site's historic character.

Currently, the structure is sheathed with an asphalt shingle roof, and vinyl or aluminum siding over the original weatherboard siding. Exterior wall materials in particular consist of a range of materials haphazardly arranged to protect the structure from the elements. All windows have been replaced throughout with standard replacements poorly matched to the original fenestration. As visual evidence suggests, the original windows were clearly larger than the modern replacements. The foundation was not visible at the time of the survey.

The front elevation includes a single, centered door on the front gable and two windows found symmetrically placed on the wing. A second door is found on the southeast gable wall. The northwest wall includes three windows and the remaining exterior brick chimney, which now ends at the roof line. The rear elevation is obscured by a later shed addition.

The interior was not accessible at the time of the survey.

8. Significance

not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

Although little historic material remains, the Benedict 2-Room School derives its significance as an example of the handful of 2-room schoolhouses in use throughout Charles County in the late 19th and early 20th centuries. Two-room schoolhouses were far less common than their 1-room counterparts as the dominant architecture of education before the second quarter of the 20th century. In 1918, there were 77 one-room schools in comparison to only nine 2-room buildings. Additionally, the schoolhouse may also be the oldest standing structure associated with the village of Benedict, which was destroyed by fire in the early 1900s.

Although the exact date of construction is unknown, a survey was made of the schoolhouse lot containing 1 acre in 1886. Despite limited architectural evidence, the overall style does not contradict such a date. The survey was completed by H. C. Page for John D. Bowling, who at the time owned virtually all of what is today the village of Benedict. This particular parcel was part of Lot No. 7 in the subdivision of John D. Bowling's estate. In 1927, the school was closed and the property was sold to Edward J. Edelen by the Board of Education, after which it was likely used as a dwelling until the present.

The period following the Civil War saw the greatest advances in a county-wide system of education. In 1867, there were thirty-six public schools located in Charles County. Five of these were log structures and the remaining thirty-one were frame buildings. By the following year, there were an additional six schools for African-American children in the county. Throughout the latter half of the 19th century, education in Charles County was mainly based on primary schools with one teacher located in one room schoolhouses. This pattern continued virtually unchanged until the 1920's when the advent of the automobile and the Equalization Fund Law of 1922 made consolidation both physically and economically viable.
