

D-147
James K. Lewis Wharf Office
Vienna
c. 1825-40
Public

The James K. Lewis Wharf Office is a rare survivor of the utilitarian type of building that housed the daily accounting operations of a substantial merchant firm operating in Vienna during the second quarter of the nineteenth century. Built into the bank fronting the Nanticoke River, the office was strategically sited to take advantage of ground level entrance on two floors; a storage cellar on the lower level and the accounting office above. A ladder stair also provides access to a unfinished loft used for storage as well.

While local oral tradition has identified this building as Vienna's historic customs house, there is no portion or aspect of this structure dating from the eighteenth century. Furthermore, the land on which this building stands was never held by the town or county government for the purposes of an official site for the port-of-entry's customs house.

Even though this single-story, one-room plan frame building was used privately and built around 1825-40, it represents an important aspect of nineteenth century river commerce that has altogether ceased on the Nanticoke. With its estimated date of construction, it was clearly the wharf office described in the complex of buildings formerly owned by merchant James K. Lewis (1808-1868), who acquired parcels of land in Vienna during the 1830s and 1840s. The old wharf office stands adjacent to his former residence, the impressive three-story, five-bay brick Italianate style dwelling that he financed in 1861. (See also D-146)

James K. Lewis's estate entered Dorchester County Equity Court for settlement, and in July 1876, Caleb Shepherd, representing the court, sold, "all those parcels of land

and buildings thereon lying and being in the town of Vienna and formerly belonging to James K. Lewis, d'cd, granary, wharf office, store house, dwelling house, ice house, carriage house and stable" to Stephen B. Lecompte. For much of its late nineteenth and twentieth century history the wharf office was held by the Lecompte family which owned the Italianate brick residence. In 1966, Mary W. Lecompte sold the office building to the Commissioners of Vienna, and the town financed restoration work while using it as a tourist venue.

As a one of Dorchester County's port-of-entries, established in 1706 by provincial authority, inspection houses and customs house were erected in Vienna at various times. The first recorded tobacco inspection station was authorized by Maryland's General Assembly in 1747, to be laid out on the land of Henry Hooper, Jr. The Federal authorized customs house was established in Vienna in 1791 and lasted in operation until 1866. When Joseph Scott visited Vienna to research geographical description of Maryland and Delaware, published in 1807, he found the "collector's house" among the building that defined the town's waterfront.

7. Description

Inventory No. D-147

Condition

excellent ___ deteriorated
___ good ___ ruins
___ fair ___ altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Standing on the edge of Water Street at its intersection with Church Street is a small, single-story, one-room plan frame structure that has been called the old "Custom's House" for the past half century. Reported to have been erected in 1768, this timber frame structure clearly dates from the second quarter of the nineteenth century. There is no eighteenth century fabric associated with this structure. Its construction date is documented by the essential elements of the building, which is assembled with mature cut nails and finish woodwork and brick typical of the period. The one room office building was most likely erected c. 1825-40.

Facing northwest, the gable roofed office building is oriented on northwest/southeast axis. The single story weatherboard frame office rests on a full common bond brick foundation and is built into the side of a back with ground level entrance on the south side opening through a replacement board-and-batten door hung on strap hinges. The five-course common bond brickwork is laid in uniform sized bricks typical of the second quarter of the nineteenth century, and the joints have been repointed.

The northwest (main) elevation is a gable-front elevation with a door located on the southwestern edge of the façade. The beaded board-and-batten door is framed by a narrow beaded edge surround typical of early nineteenth century. The weatherboards are plain and the original boards are fastened with mature cut nails. The gable end is finished flush with a molded bargeboard finishing the edge of the wood shingled roof.

The side elevations of the office are essentially alike with a single six-over-six sash window piercing each wall surface. The window openings are framed by a narrow, beaded edge surround. Second quarter of the nineteenth century three-panel shutters swing on cast hinges. The base of the roof is finished with a boxed cornice. Piercing the foundation is a mortise-and-tenon timber frame grilled opening, which is fitted with circular profile, vertical iron bars. The southeast (rear) elevation is pierced by the ground level door, and a six-over-six sash window in the frame superstructure.

The office interior is finished in a plain manner with plastered walls and a beaded edge baseboard that encircles the room. A ladder type stair is fixed in the northeast corner and provides access to an unfinished loft. Inside the loft the common rafter roof system as well as the end wall studs are fastened with mature cut nails.

The interior of the cellar is finished with a herringbone pattern brick floor of recent installation during the last twenty years. The walls have been repointed. The oak floor joists and sills are exposed.

SIGNIFICANCE

The James K. Lewis Wharf Office is a rare survivor of the utilitarian type buildings that housed the daily operations of a substantial merchant firm operating in Vienna on the Nanticoke River during the second quarter of the nineteenth century. While local oral tradition has identified this building as Vienna's historic custom house, there is no portion or fabric of this building dating to the eighteenth century. Furthermore, the land on which this building stands was never held by the town or county government for the purposes of an official port-of-entry custom's house.

HISTORY AND SUPPORT

Even though this single-story, one-room plan frame office building was used privately and built during around 1825-40, it represents an important aspect of 19th century river commerce that has altogether ceased on the Nanticoke. With its estimated date of construction around 1825-40, it was clearly the wharf office described in the complex of buildings formerly belonging to merchant James K. Lewis (1808-1868), who acquired parcels of land in Vienna during the 1830s and 1840s.¹ The old wharf office stands adjacent to his former residence, the impressive three-story, five-bay brick Italianate style dwelling that he financed in 1861. (See D-146)

James K. Lewis's estate entered Dorchester County Equity Court for settlement, and in July 1876, Caleb Shepherd, representing the court, sold "all those parcels of land and buildings thereon lying and being in the town of Vienna and formerly belonging to James K. Lewis, d'cd, granary, wharf office, store house, dwelling house, ice house, carriage house and stable" to Stephen B. Lecompte.²

As a port-of-entry, established in 1706 by provincial authority, inspection houses, and later a customs house, were erected in Vienna at various times. The first recorded tobacco inspection station was authorized for Vienna by Maryland's General Assembly in 1747, to be laid out on the land of Henry

Joseph Scott, *A Geographical Description of the States of Maryland and Delaware; Also the Counties, Towns, Rivers, Bays, and Islands with a List of the Hundreds of Each County.*

Philadelphia: Kimber, Conrad, and Company, 1807

p. 4

Rivers of the Eastern Shore

Nanticoke is one of the most considerable rivers of the Eastern Shore, about 45 miles in length. It rises in Sussex county, in the State of Delaware, flows S.W. and empties into the Chesapeak bay, on the S. side of Philip's Point. It received its name from a tribe of Indians, called the Nanticokes, who resided on its bank. They emigrated to the State of New York, and live between Owegy and a branch of the Susquehanna. It is estimated that they can muster about 80 warriors.

p. 105,

DORCHESTER

This is the largest county on the Eastern Shore, except Worcester. It was established before the year 1671 and is 32 miles long and 27 broad, containing 374,579 acres.

It is bounded N. by Caroline county, and Choptank river, which separates it from

p. 106

Talbot county, S.E. by Nanticoke river, which divides it from Somerset county, and S. and W. by the Chesapeak bay.

It contained in 1790, 10,538 free persons and 5,337 slaves; and in 1800, 11,778 free persons, and 4,566 slaves.

The lands in the S. part of the county, are low, and marshy, particularly along Transquaking, Blackwater, and Teram creeks, and along Hungary river, which is an arm of the Chesapeak bay, that separates Hooper's Island, from the main land.

The principal produce is corn, wheat, and lumber. The rivers abound with fish, and fowl, as those in the other counties on the Eastern Shore.

Cambridge, a post town, and the seat of justice for the county, containing about 50 houses and 300 inhabitants. It is situated on the S. side of Choptank river, about 15 miles from its mouth. The situation is healthy and agreeable. The public buildings are a church, court house and jail.

It is 37 miles S. of Easton and 152 S.S.W. of Philadelphia and 100 miles from Washington city.

Vienna, a small post town, agreeably situated on the W. side of Nanticoke river upon a plain elevated about 12 or 13 feet above the surface of the river.

p. 107

It contains 13 dwellings, principally, in a state of decay, four respectable stores, several granaries, two taverns, a collector's office, and an impaired brick Episcopal church, in which divine service is sometimes celebrated. Two wharves extend into the river, at which vessels of an burthen many load.

The town commands very little trade, although advantageously situated for both foreign and domestic. Its decline has originated, in the absence of enterprising and active inhabitants, the obstruction in navigating the river to its extremities, the commercial importance of Baltimore, and above all the prevailing opinion that the situation of the town is unhealthy; but the character of unhealthiness it no longer deserves; for the excluding by ditches, the tide, which supported a morass on the S. bodies of stagnant water, which lay in the bottom of the town, have been removed, by which the situation has become more healthy.

Middletown, is a small village about seven miles westerly of Vienna, and two E. of the head of the Transquaking creek.

Federalsburg, a small village, on marshy Hope creek, partly in Dorchester, and partly in Caroline counties.

Hunting creek town, a village in the N. parts of the county

p. 108

Indian town, a small village situated on Indian creek, a short stream which falls into Choptank river.
