The Trading Post
East New Market
private

c. 1840

The "Trading Post" is one of the best known of the historic structures in East New Market for speculative history and oral tradition have tried to place the structure within the early history of this Dorchester County crossroads village. Architectural features, however, indicate the single-story frame store was erected after major construction of nearby houses and the established formation of a crossroads village by the 1840s. Nevertheless, the "Trading Post" is a rare survival on the Eastern Shore. Most commercial districts of the various regional towns have been rebuilt more than once, and small rectangular store buildings similar to the "Trading Post" were usually replaced. Significant to this single-story frame store are the series of exposed beaded tie beams and beaded horizontal board walls. An enclosed winder stair is located in the southwest corner for access to the partitioned second floor.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The "Trading Post" is a single-story, rectangular frame commercial building standing on the south side of School Street in the center of East New Market, Dorchester County, Maryland. The store faces north with the gable roof oriented on a north/south axis.

Built around 1840, the "Trading Post" has been moved at least twice, originally having stood on the east side of South Main Street. Supported by a new brick foundation, the frame building is sheathed with plain weatherboards and covered by a steeply pitched wood shingle roof. The eaves are slightly extended, and a brick stack formerly rose through the center of the structure.

The north (main) facade is a three-bay elevation with a center four-panel door and flanking single-pane sash windows. Each of the openings have a slightly molded lintel. A six-over-six sash window pierces the upper gable.

The west side of the building is marked by two openings, a window and a side door that are located in the south end of the wall. The early twentieth-century side door is accompanied by a six-over-six sash window. The east side of the building is marked by a single six-over-six sash located in the southernmost bay. The south gable end is a plain weatherboard wall aside in a pair of new six-over-six sash windows that light the upper room.

The interior of the Trading Post is distinguished by a series of exposed beaded tie beams that stretch east/west across the room. The walls retain large sections of beaded board sheathing fastened with cut-nails. A partition centrally located in the room has been removed. Fixed in the southwest corner of the structure is an enclosed winder stair with a board-and-batten door. The door is fitted with a Victorian style door latch.

The attic space is divided by a centrally located partition into two rooms. Plaster walls with sawn lath finish the walls. A hole in the plaster ceiling reveals a common rafter roof with a pinned mortise-and-tenon peak joint and half-dovetail lapped collar beams. Each of the joints is also secured with cut-nails.

Prepare both a summary paragraph of significance and a general statement of history and support.

The "Trading Post" is a rare structure among commercial buildings on the Eastern Shore. The single-story rectangular frame store follows the gable-front orientation common to nineteenth-century commercial buildings, but the beaded tie beams and beaded horizontal board walls are unusual survivals for Eastern Shore store interiors. The first floor front elevation appears to have been reworked around the turn of the twentieth century with a four-panel door and flanking single-pane sash windows, but surviving in the upper gable is an earlier six-over-six sash window.

Although reports of local tradition have tried to suggest this structure dates from the first half of the eighteenth century, cut-nail construction, sawn lath, and nineteenth-century door hardware indicate the store was erected probably during the 1840s. The exposed beaded tie beams and beaded board walls were not uncommon features for antebellum store interiors.

RECORDED BY:

East New Market Historic District Commission

ORGANIZATION:

Summer, 1985

DATE RECORDED:

TRADING POST (Property of the East New Market Heritage Foundation)

Rectangular, 1½ story, frame structure; gabled, asphalt tile roof. There is a hole in roof where a chimney once stood in the center of the gable. Frame is weather board. Front facade has 3 bays; entrance in center. Boxed cornices has returns at the side of gabled end. Windows 2 over 2. Gable window 6 over 6. Door has wide boards on each side and horizontal molding over door and windows on first floor.

Left side is 2 bay asymmetrically placed to the rear of building. Shutters are nailed to weather board.

In rear there is a modern window, 1 over 1, in gable and exposed plaster wall on modern lathe. (Kitchen addition was destroyed during moving).

Right side is 3-bay, entrance in 3rd, with projecting overhang, shed roof, supported by brackets over door. Windows are different width size; 6 over 6.

Construction is visible and is post and beam.

TOWN OFFICE

1 story, wooden frame structure covered with corrugated tin. Rectangular, hip roof covered with tin. Exposed rafters. 1 by 2 bays.

On right side there is a shed addition.

Sara Rossing

TRADING POST

From: BETWEEN THE NANTICOKE AND CHOPTANK

Trading post, East New Market, Mid-eighteenth century; Public.

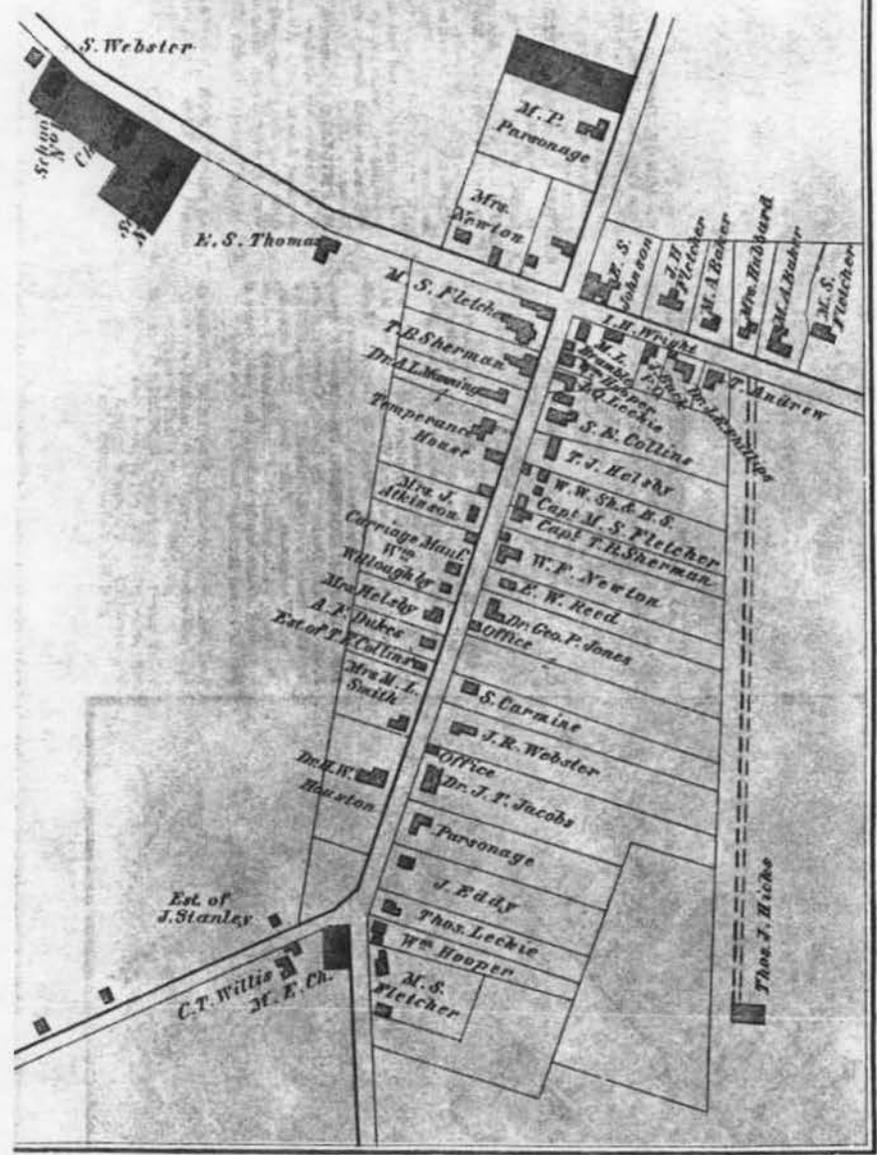

The area of Dorchester County near Secretary and East New Market held the largest number of Indians in the eighteenth century, particularly after the establishment of Indian reservations nearby. The history of relations between the Indians and the settlers seems to have been fraught with animosity, but there were also undoubtedly periods during which the two lived, hunted, and traded together amicably. Although very little is known of the trading relations between the Indians and the colonists, it is probable that trading posts or stores existed near the large reservations in the north of the county.

Tradition has maintained that the Trading Post originally served this purpose and served as the nucleus of the present town of East New Market. If true, the Trading Post is the town's earliest commercial building. Recently moved to its present location, it awaits rehabilitation as a local museum by the East New Market Heritage Foundation.
