

D-613  
501 Academy Street  
Cambridge  
Private

1890s

This handsome Queen Anne style house, now covered with asbestos siding, still retains many of the decorative elements that place it on a higher level of architectural quality than most of the other houses on this street. On the two-bay-wide gable front are two large sash windows with stained glass panes, each topped by a classical architrave and pediment. The box cornice that runs along the jerkinhead gable sports carving in a simple circle pattern and is supported by decorative brackets. On the east side of the house is a bay set at an angle to the corner of the house, with a truly elaborate carved bargeboard and more stained glass windows. More decorative woodwork accents the east gable and the south side of the house.
