Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

The current assessment was prepared on behalf of Duke Energy North America as part of cultural resources investigations to support the proposed construction of a power plant in southern Frederick County near Point of Rocks (Goodwin 2001). This property was surveyed initially in 1982 (Weissman 1982). In 1982, a house, a barn, and later outbuildings were recorded. During a survey conducted in May 2001, no built resources older than fifty years were extant on this property. Since no built resources remain extant on this portion of the Vernon-Hines property, there are no buildings that possess the qualities of significance for listing in the National Register of Historic Places under Criteria A, B, or C.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The J. Wirts Farm is located on the east side of Point of Rocks Road, a short distance north of St. Paul's Church. The complex is set back from the road, is reached by a long driveway, and is located on the west side of a stream. The landscape is scenic and pastoral. The house faces east, and is built into a bank which slopes from west to east. It is 2½ stories high, gable roofed, and built in two sections; the main block is on the south, with a wing on the north.

The main block has two end chimneys and is three bays wide. The east facade has a central doorway; the door and window arrangement, however, is slightly irregular, for the openings do not appear to be evenly aligned vertically. This elevation also contains a wooden double porch.

The west elevation of the main block of the house has a one-story wooden porch; on the second floor, the central window is at a lower level than the two end windows, probably lighting a central stair hall. The north wing also has a window at this same lower level. The north gable end of the wing is one bay deep, with a window on each story. Most outbuildings on the property appear to be of a later date than the house.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The J. Wirts Farm, although not observed closely, is architecturally significant for its unusual house, which is in a form not typically seen in this area. The configuration of a three bay wide main block with lower wing to one side is a variation from the more common main block and rear ell of the same height, which is more characteristic of central Maryland. Nearby Mt. Auburn (F-1-108) does have a larger and later side wing, but also has an original rear ell. Its rear facade and two story front porch are also both similar to the Wirts house. The proportions and fenestration of the Wirts house suggest that it may possibly date from the early 19th century.

The property is shown on the 1862 Bond atlas of Frederick County as that of J. Wirt and on the 1873 Lake atlas as J. Wirts.
