Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

This one-and-one-half-story bungalow was constructed ca. 1937 in a simple Craftsman style. The house faces north overlooking MD 28 and is located at the western intersection of Old Licksville Road about 1.4 miles east of Point of Rocks. Charles M. Fry, the grandfather of the current owner, built the house on the edge of his large farmstead (personal communication Charles E. Fry 2001).

The L-shaped bungalow sits on a concrete wall foundation. The main block of the building is three bays wide and three bays deep. The rear ell is appended to the southeast corner of the dwelling. It spans the eastern two bays and is one bay deep. The exterior of the building is stuccoed. The main block of the building terminates in a hipped roof and features a hipped roof dormer on the east, north, and west elevations. Each dormer features a paired three-light-over-one-light, double-hung window. The rear ell terminates in a gable roof. All roof planes are sheathed with asphalt shingles and feature wide, overhanging eaves. The windows are three-over-one-light, double-hung, wood-sash, single units with wood slip sills and wide wood window surrounds.

The principal (north) elevation features a full width, three-bay porch. Its shed roof is integrated with the hipped roof of the main block. The porch features stuccoed columns with battered sides that gracefully merge into elliptical arches. The handrails are constructed of solid concrete. The porch shelters a central entrance with a nine-light wood door.

Continuation Sheet No. 1

F-1-153

The east elevation of the rear ell features an integral porch with an elliptical arch opening. The porch rests on concrete piers. The entry arch has been infilled with a wood-frame wall clad with vinyl siding.

Two vernacular buildings, a chicken house and a small barn, mentioned in the 1993 Maryland Historical Trust State Historic Sites Inventory Form F-1-153 are no longer extant.

The bungalow was built ca. 1937 by Charles M. Fry on a portion of the larger Fry family farm. The bungalow style is example rarely seen in the rural areas of Buckeystown Township, most are located in the towns of Point of Rocks and Buckeystown (Davis 1993).

The house has remained in the family for three generations. Charles M. and Mary A. Fry gave the property deed for the house and 54 acres to their son Charles, Jr. and his wife Helen in 1965 (Frederick County Deed 736:627). They lived in the house until 1991 when the lot was subdivided. The house and one-acre were turned over to Charles Edward Fry (Frederick County Deed 1691:779).

The Charles M. Fry Bungalow retains sufficient integrity of location, design, materials, workmanship, feeling, and association to possess the qualities of significance under Criteria C of the National Register Criteria for Evaluation.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Summary

This one-and-one-half-story bungalow was constructed ca. 1937 in the Craftsman architectural style. The house is oriented north overlooking MD 28 and is located at the western intersection of Old Licksville Road about 1.4 miles east of Point of Rocks. Charles M. Fry, the grandfather of the current owner, built the house on the edge of his large farm (personal communication Charles E. Fry 2001).

Description

This one-and-one-half-story bungalow was constructed in the Craftsman style. This L-shaped house sits on a concrete foundation. The main block of the building is three bays wide and three bays deep. The rear ell is appended to the southeast corner of the dwelling. It spans the eastern two bays and is one bay deep. The exterior of the building is stuccoed. The main block of the building terminates in a hipped roof and features a single hipped dormer on each of the east, north, and west elevations. Each dormer features paired three-light-over-one-light, double-hung windows. The rear ell terminates in a gable roof. All roof planes are sheathed with asphalt shingles and feature wide, overhanging eaves. The windows are three-over-one-light, double-hung, wood-sash, single units with wood slip sills and wide wood window surrounds.

The principal (north) elevation features a three-bay porch, which spans the front facade. Its shed roof is integrated with the hipped roof of the main block. The porch features stuccoed columns with battered sides that gracefully merge into elliptical arches. The handrails are constructed of solid concrete. The porch shelters a central entrance with a nine-light wood door.

The east elevation of the rear ell features an integral porch with an elliptical arch opening. The porch rests on concrete piers. The entry arch has been infilled with a wood-frame wall clad with vinyl siding.

Two associated outbuildings, a chicken house and a small barn, which were documented in the 1993 Maryland Historical Trust State Historic Sites Inventory Form F-1-153, are no longer extant.

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

This addendum to the 1993 Maryland Inventory of Historic Properties Form was undertaken as part of a reconnaissance-level survey. No interiors were examined during the survey. The purpose of the survey was to field-verify building locations, document current conditions, update information on changes made to the building since it was last inventoried, and supplement the archival record.

The Fry Bungalow was built ca. 1937 by Charles M. Fry on a portion of the larger Fry family farm. The bungalow, an example of the Craftsman style, is example rarely seen in this rural area of the Frederick County. Most examples of the style are located in the towns of Point of Rocks and Buckeystown (Davis 1993).

The house has remained in the Fry family for three generations. Charles M. and Mary A. Fry gave the property deed for the house and 54 acres to their son Charles, Jr. and his wife Helen in 1965 (Frederick County Deed 736:627). They lived in the house until 1991 when the lot was subdivided. The house and one-acre then were conveyed to Charles Edward Fry (Frederick County Deed 1691:779).

The Fry Bungalow retains its integrity of location, design, materials, workmanship, feeling, and association and is a locally significant example of the Craftsman style those possesses those qualities of significance under Criteria C of the National Register Criteria for Evaluation.

Ca. 1937

The Charles M. Fry Bungalow is a 1-1/2 story residence with a hipped roof, dormers on three elevations, and an integral one-story porch with tapered columns and shaped arches. The exterior is covered with stucco and the windows are 3/1. It was built about 1937 by Fry, whose descendants still own the house, on part of a larger Fry family farm. The bungalow style is infrequently seen in rural areas in the Adamstown Region, most being located in the towns of Point of Rocks and Buckeystown. The Fry House is a fairly good, little-altered example of the style in the late 1930's, reflecting the more streamlined surfaces and angles which were the result of both the economic pressures of the Great Depression of the 1930's and of the architectural influence of the Mission style, which de-emphasized ornamentation in favor of uniform surfaces and simple planes. In contrast to the modern style of the bungalow, the property also contains two vernacular outbuildings, a chicken house and a small barn, in the traditional style found in farmsteads since the late 19th century.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

CONTRIBUTING RESOURCE COUNT: 3

The Charles M. Fry Bungalow is a 1-1/2 story frame bungalow type residence built about 1937 on the south side of Tuscarora Road at the western intersection of Old Licksville Road near Point of Rocks, Frederick County, Maryland. The house has a stucco exterior with an integral porch on the principal north elevation and dormers on three sides of the hipped roof. The property also includes a small frame barn and a frame chicken house, both probably built about the same time as the house. The house was dated by its architectural style and land records.

The house has the typical low roofline and horizontality of the bungalow, with three bays on the north elevation. The entrance is in the center bay and the flanking windows are paired 3/1 sash. The door is a multiple-paned glazed type. The integral porch has shaped arches which curve from the tapered porch piers to the arches of the roof cornice. The hipped roof is covered with composition shingles, probably replacing original wood shingles. The extended eaves are covered with vinyl. The stucco exterior appears to be a recent application, but the original exterior could have been the same material. The hipped roof dormers are located in the north, east, and west sides of the roof and have paired 3/1 windows. On the west elevation, two bays each have 3/1 windows and the east elevation has a more functional window arrangement, as well as an enclosed integral rear porch near the southeast corner. A one-story wing extends from the south elevation. The interior was inaccessible for this survey.

The frame barn is located southwest of the house. It has a two-story height, with the upper level being a hay loft. The exterior is covered with vertical siding. The gable roof is covered with corrugated metal. A vertical board door is in the east elevation. The interior has two stalls with a feeding aisle on the north side. The chicken house is located south of the house and faces toward the south with its shed corrugated metal roof sloping down on the north side. Its exterior is covered with various composition materials, but sections of the original vertical siding are visible. The south elevation openings are boarded and a vertical board door is located on the east elevation and near the southwest corner.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Charles M. Fry Bungalow is a fairly good example of the late 1930's bungalow style in Frederick County. Built about 1937 by Charles M. Fry, probably the grandfather of the current owner, it was located on part of a larger farm owned by the Fry family. The more streamlined bungalow style reflects the architectural simplification of buildings produced for the masses in the 1930's, a response to the economic stresses of the Great Depression of the 1930's and to the influence of the Mission style, which de-emphasized ornamentation in favor of smooth surfaces and blurred angles. The Fry Bungalow retains much of this architectural character, as well as having two frame outbuildings in the traditional vernacular style of Frederick County farmsteads in use since the last quarter of the 19th century. The bungalow is an unusual rural type in the Adamstown Region, although early 20th century examples are found in Point of Rocks and Buckeystown.

This house is located on the south side of Route 28, east of the town of Point of Rocks, in southern Frederick County. The house is situated on a slight rise and faces south toward the road. It is 1½ stories high and is covered with dark stucco. There is a pyramidal roof, which has a large dormer window on the principal facade. The dormer contains a pair of 6/1 double-hung sash windows, and the dormer roof is pyramidal in shape to match the roof of the house.

The house is three bays wide by two deep; the principal facade has a central doorway flanked on each side by paired double-hung sash windows. This facade also has a one story porch, also stuccoed, which is sheltered by the main roof of the house. The porch has three wide arched openings, supported by tapered square piers. There is a solid stuccoed low porch wall within the two end arched openings. The east and west ends of the porch also have the same type of arched openings.

Prepare both a summary paragraph of significance and a general statement of history and support.

This house is significant architecturally as an example of an architectural style not usually seen outside the towns of southern Frederick County. While the town of Point of Rocks to the west does have a few early 20th century style houses influenced by the Bungalow style, this appears to be the only such example in the more rural area between the towns of Point of Rocks and Adamstown. The house has the characteristic 1½ story height, large and low pitched overhanging roof (covering the porch as well as the main block), small size and cottage flavor often associated with the Bungalow style.

The house is particularly unusual for its Mission Style elements, rarely seen in this area. These include the arched porch openings, pyramidal roof, the use of stucco, and overall severity of design.
