The Fry Farmhouse is a two-and-one-half-story, wood-frame dwelling built in the late nineteenth century. A one-story addition was added in the front of the house ca. 1990. The farmhouse is part of the modern Fry Farm, which was established by the Fry family ca. 1950. The farmhouse is the only building located on the farm that is older than fifty years. The property also contains a ca. 1950 garage and fifteen modern agricultural outbuildings dating from the 1960s to the present. The buildings include a ca. 1960 gambrel roofed barn, a ca. 1960 silo, a ca. 1980 dairy, a ca. 1980 tractor/storage shed, five ca. 1990 tractor/storage sheds, a ca. 1990 loafing shed, two ca. 1990 silos, and three ca. 1990 turkey roosts.

The Fry Farmhouse is a late-nineteenth century building whose architectural integrity has been altered through a series of recent modifications and additions. These include the replacement of the windows, doors, and siding, and the construction of the front addition. In addition, the remaining buildings in the agricultural complex date from the 1950s and are associated with modern agricultural practice. The Fry farmhouse does not exhibit integrity of design, setting, materials, workmanship, and feeling to possess the qualities of significance under Criteria A, B, or C of the National Register Criteria for Evaluation.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Summary

The Fry Farmhouse is a two-and-one-half-story, wood-frame dwelling built in the late nineteenth century. A one-story addition was added in the front of the house ca. 1990. The farmhouse is part of the modern Fry Farm, which was established by the Fry family ca. 1950. The farmhouse is the only building located on the farm that is older than fifty years. The property also contains a ca. 1950 garage and fifteen modern agricultural outbuildings dating from the 1960s to the present. The buildings include a ca. 1960 gambrel roofed barn, a ca. 1960 silo, a ca. 1980 dairy, a ca. 1980 tractor/storage shed, five ca. 1990 tractor/storage sheds, a ca. 1990 loafing shed, two ca. 1990 silos, and three ca. 1990 turkey roosts.

Description

The two-and-one-half-story, Fry Farmhouse is oriented west towards Point of Rocks. The L-shaped house rests on a concrete block foundation. It is three bays wide. The wood-frame exterior walls are clad vinyl siding. The building terminates in a side gable roof sheathed with metal standing seam panels. The house features a central, wall dormer with a four-light, arched window. The house features an interior, brick chimney in the two-story, rear ell. All first and second floor windows are replacement, vinyl-sash units.

The principal (west) elevation features a one-story, full-width, wood-frame addition built ca. 1990. The addition obscures all evidence of the original design of the first-floor facade. The addition features a shed roof and brick chimney located flush on the north elevation. The principal entrance is now located on the south elevation of the front elevation.

A second addition is appended to the south elevation. This small, wood-frame addition rests on a concrete block foundation. Its gable roof sheathed with asphalt shingles shelters an entrance to the cellar.

Evaluation for:
 National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

This addendum to the 1982 Maryland Inventory of Historic Properties Form was undertaken as part of a reconnaissance-level survey. No interiors were examined during the survey. The purpose of the survey was to field-verify building locations, document current conditions, update information on changes made to the building since it was last inventoried, and supplement the archival record.

The farm assumed its current acreage and configuration by 1849 when the Robert King estate sold the property to George C. Belt (Frederick County Deed WBT 12:67). The land was sold at auction in 1855 to James H. Besant and William Allnut (Frederick County Equity Docket 2640). Besant and Allnut, in turn, sold the property to Curtiss Grubb in 1858 (Frederick County Deed BGF 3:14). Lake's 1873 Atlas of Frederick County records Curtiss Grubb lived on the land, although his house appears to have been located closer to the road.

The farm has been owned by the Fry family since 1884 when Edward Fry bought the property from Curtis Grubb's widow. The Fry family moved the house to its present location by mules and rollers (personal communication Charles E. Fry 2001).

The Fry Farmhouse is a late nineteenth century building whose original integrity architecturally has been altered through a series of recent modifications and additions. These include the replacement of the windows, doors, and siding, and the construction of the front addition. In addition, the remaining buildings in the agricultural complex date from the 1950s and are associated with modern agricultural practice. The Fry farmhouse does not exhibit integrity of design, setting, materials, workmanship, and feeling to possess the qualities of significance under Criteria A, B, or C of the National Register Criteria for Evaluation.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Dickson farm is located to the south of Route 28, a short distance east of the town of Point of Rocks in southern Frederick County. The farm complex, which was observed from a distance, contains a house which faces north-west, and is approached by a long dirt road. The house is 2½ stories high, gable roofed, and has a center gable on its principal facade. The house is probably of frame construction, and appears to be sheathed with light green siding. The outbuildings include a large 20th century gambrel roofed frame barn.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

Although the Dickson Farm was observed only from a distance, it appears to be significant architecturally primarily for its 19th century farmhouse. The house appears to be typical example of a common Maryland house form (the I-house) as constructed during the second half of the 19th century. The property is shown on the 1873 Lake atlas of Frederick County as the property of J. Dickson. It appears to be of local significance and is probably not likely to be eligible for the National Register.
