

Memo to file

February 17, 2016

From: Casey D. Pecoraro
Inventory Registrar

Re: F-4-17
South Mountain Battlefields

Inventory number F-4-17 was assigned to the South Mountain Battlefields (in Frederick County; see also WA-II-1174, WA-III-175 and WA-III-176 for Washington County). The following sub-numbers were then assigned to three sections, which collectively comprise the South Mountain Battlefields:

F-4-17-A Crampton's Gap

F-4-17-B Fox's Gap

F-4-17-C Turner's Gap

For MHT mapping purposes in November 2015, F-4-17-B (Fox's Gap) and F-4-17-C (Turner's Gap) were mapped as one polygon, labeled F-4-17-B, to fit within the NR boundary.

Please note that Frederick County inventory numbers as issued by MHT do not have leading zeros. While the following forms were prepared with leading zeros, leading zeros are not included in the official inventory numbers as recognized by MHT.

National Register of Historic Places

Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word process, or computer, to complete all items.

1. Name of Property

historic name Crampton's Gap Historic District

other names/site number MIHP #F-4-017-A; WA-III-176

2. Location

street & number Route 17; Gapland Rd; Mt. Church Rd; Brownsville Pass Rd; Townsend Rd. not for publication

city or town Burkittsville/Brownsville vicinity

state Maryland code MD county Frederick/Washington code 021/043 zip code See Sec. 10

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets procedural and professional requirements set forth in 36 CFR Part 69. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance

Physical Description

During the September 14, 1862 Battle of South Mountain the secondary push of Union troops took place over the road leading over the mountain at Crampton's Gap and the adjoining woodlots and fields. The collection of cultural resources associated with the Battle of South Mountain which occurred on September 14, 1862. These resources are described on the attached Inventory Table and are designated as contributing or non-contributing to the September 14, 1862 period of significance as part of the Multiple Property Documentation Form "South Mountain Battlefield[s] - September 14, 1862."

The Crampton's Gap Historic District is bounded on the west by the 800 foot contour line west of the crest of South Mountain. The west boundary is inclusive of the state park boundary. The district extends to the east where it is generally bounded by an unnamed tributary (west) of Broad Run. The district extends as far south as Ahalt Distillery Road. The boundary extends north to a point approximately ¼ mile south of Locust Valley.

The district is comprised of steep mountain terrain on the west and much more level valley/piedmont on the east side. There is a wide, relatively level area running down the center of the top of the mountain. Most of the steeper areas are heavily vegetated with trees such as hemlock, oak, hickory, and pine and once included an abundance of American chestnut (Baker 2003). Early farmers have long ago cleared the valley areas of natural vegetation for fire wood and for growing crops.

The Crampton's Gap Historic District was predominately rural during the Civil War; the town of Burkittsville was the largest town in the area. In 1860, the Federal Census listed numerous farmers and trades people residing in "Burkittsville Post Office" area. The Crampton's Gap Historic District still remains largely rural today. Many of the farms, houses, and outbuildings are still scattered throughout the landscape, although, a few post-Civil War (mostly ranch-style) homes can be found in small pockets along some of the main roads. Buildings of this later era include wood frame houses with Gothic-Revival influences built soon after the close of the war, wood frame farmhouses from the late 18th and early 19th century, and a few bungalows built in the 1910s and 1920s. Some more recent buildings (1950s to present) are also scattered throughout the area; these are primarily one-story ranch-style houses.

Dwellings built prior to the Civil War primarily consist of small log houses with German siding and equally small domestic and agricultural outbuildings which include some very small bank barns, summer kitchens, smokehouses, springhouses, chicken houses, corn cribs, etc. These smaller houses are found predominately on the steep slopes of South Mountain. One can still see the contrast of these smaller subsistence farms as compared with larger scale farms reflected in the bigger buildings in the valley area just east of the mountain. Other houses in the Crampton's Gap Historic District include early to mid 19th century two-story stone houses and two-story brick houses. One of the larger houses belonging to Martin Shafer (1606 Gapland/Huffer Road) served as Union General William B. Franklin's headquarters during the battle. The Resurrection German Reformed Church in Burkittsville

Crampton's Gap Historic District
F-4-017-A; WA-III-176

Frederick/Washington County, Maryland

Name of Property

County and State

as well as many houses in town served as hospitals for Union and Confederate wounded during the battle and for months afterward (Reese 1994).

Outside of Burkittsville, commercial buildings were few in the area of South Mountain during the Civil War. The 1860 census of the area associated with the "Burkittsville Post Office" lists several people occupied in trades such as wagon makers, blacksmiths, cabinet makers, shoemakers, tailors, and merchants who presumably operated businesses within or very close to Burkittsville. Few buildings on the present South Mountain landscape are thought to have been commercial. None were noted in the Crampton's Gap Historic District during the current survey.

Stone walls were also part of the South Mountain landscape. Farmers constructed the dry laid stone walls of local rock to delineate the boundaries of their fields and contain livestock. Both Confederate and Union soldiers used the walls for defense during the Battle of South Mountain, and the walls were important in the Confederates' hold of the mountain for the better part of the day. Many of these stone walls are still in place over much of the battlefield.

Many of the present-day roads and paths traversing the Crampton's Gap Historic District landscape were in existence before the Battle of South Mountain. A few of the old roads are still unpaved or exist only as trails or traces through the woods, however, the majority of the roads have been paved and are currently in use. Most historic roads appear to closely follow their original routes across the battlefield landscape. Several dirt or gravel driveways have recently been added to provide access to new homes.

Old road beds known to have been significant to the battle include:

- Mountain Church Road and stone walls (F-2-99)
- Gapland Road, from Burkittsville to summit (F-2-100)
- Arnoldtown Road
- Burkittsville Road (State Route 17)
- Brownsville Pass Road

There are no known archeological sites within the Crampton's Gap Historic District. The battlefield within the Crampton's Gap Historic District where Union General William Franklin and his VI Corps forced the retreat of heavily outnumbered Confederate forces, is considered a historic site.

The Crampton's Gap Historic District includes 28 Contributing Buildings; 7 Contributing Structures; 1 Contributing Site; and 1 Contributing District (Burkittsville NR District, F-2-10); 135 Non-contributing Buildings; 12 Non-contributing Structures including the National Register-listed War Correspondents Memorial Arch, WA-II-117; and 2 Non-contributing Sites (cemeteries). See attached Resource Inventory Table for a full inventory of Contributing and Non-contributing resources within the Crampton's Gap Historic District.

Integrity

Although there are a large number of non-contributing resources within the district boundary, the visual landscape and significant contributing resources retain remarkable integrity to the September 14, 1862 appearance. Crampton's Gap Historic District possesses integrity of location. The District encompasses the area surrounding Crampton's Gap in which the advance of federal troops and fighting took place on September 14, 1862. The gap also possess integrity of setting: topographic features and vegetation are similar to the 1862 setting of South Mountain. The Crampton's Gap Historic District

Crampton's Gap Historic District
F-4-017-A; WA-III-176

Frederick/Washington County, Maryland

Name of Property

County and State

also retains the feeling and association of the historic battlefield. The area surrounding the gap is still largely rural and contains many wooded areas as well as numerous farms of various sizes which were present during the Civil War. Many of the roads present and used during the Battle of South Mountain still follow their historic routes. Many stone walls used by soldiers for defense during the battle still stand in their original alignments across the fields.

Summary of Significance

The Crampton's Gap Historic District meets registration requirements outlined in Section F of the Multiple Property Documentation Form entitled "South Mountain Battlefield[s] – September 14, 1862" The District is eligible for the National Register under Criterion A in the area of military history for its association with the Battle of South Mountain, which took place on September 14th 1862. The most southern point of fighting that day took place on the fields and roads leading up to Crampton's Gap near Burkittsville. Here, after hours of preparation, Union General William Franklin and his VI Corps forced the evening retreat of the heavily outnumbered Confederate forces. But Franklin's delay allowed the Confederate's at Harpers Ferry their victory and capture of the Union garrison there. The Battle of South Mountain was significant in that on September 14, 1862, only three days prior to the Battle of Antietam at nearby Sharpsburg, a small number of Confederates briefly held off Union troops in order for Lee's divided army to reassemble. The major day-long battle took place in response to the loss of Confederate General Robert E. Lee's Special Order 191, his command to split the Southern army in order to capture the Union garrison at Harper's Ferry and its supply of weapons and ammunition. The discovery of those orders prompted Union General George McClellan's uncharacteristic boldness in his pursuit of the Confederate Army on South Mountain. The period of significance, as established in the Multiple Property Documentation Form "South Mountain Battlefield[s] – September 14, 1862" is limited to the day of the battle, September 14, 1862. Therefore, only resources which were present on that day are considered contributing.

Resource History

General McClellan's orders to Major General William B. Franklin, commanding the 6th Corps of the Army of the Potomac, were to seize Crampton's Gap and when that was completed to continue on to Rohrersville on the west side of the mountain. There Franklin's forces were to take the crossroads community with the objective of cutting off, destroying or capturing McLaws' two divisions, thereby relieving the Harpers Ferry garrison (Sears 1987:12). When Franklin received his orders, he was some twelve miles east of Burkittsville, the small Frederick County village on the east side of South Mountain at Crampton's Gap. General Franklin set up his headquarters in the home of Dr. John D. Garrett southeast of the quiet village of **Burkittsville**. After several hours consumed in moving his corps to the base of the mountain, Franklin's force was shelled by Confederate guns placed on the Burkittsville Road (**Gapland Road**) and on the **Brownsville Road** just to the south. This shelling led Franklin to conclude that there was a sizable Confederate force defending the pass:

The enemy was strongly posted on both sides of the road, which made a steep ascent through a narrow defile, wooded on both sides, and offering great advantages of cover and

Crampton's Gap Historic District
F-4-017-A; WA-III-176

Frederick/Washington County, Maryland

Name of Property

County and State

position. Their advance was posted near the base of the mountain, in the rear of a stone wall, stretching to the right of the road at a point where the ascent was gradual, and for the most part over open fields. Eight guns had been stationed on the road, and at points on the sides and summit of the mountain to the left of the pass. (in Luvaas & Nelson 1987:77)

In fact, the Confederate defense consisted of about 1,000 men under the direction of Colonel Thomas T. Munford and Colonel Parham, while Franklin's two divisions totaled 12,300 men (Sears 1987:14).

The Union advance against the Confederates at Crampton's Gap took place primarily to the north and west of Burkittsville. Facing the Confederate defensive line behind the **stone walls of Mountain Church Road**, the Union forces used the open fields to the east to build up for a direct assault. The **Wipp farm** and adjoining **Miller farm** (see 1858 Bond map) served as the staging area for General Henry Slocum's Division of the VI Corps. Colonel Joseph J. Bartlett's Brigade, straddling the Wipp Farm formed the right flank of the Federal line; Newton's Brigade formed the center covering the Miller Farm fields; and Torbert's Brigades were on the left bordering the Burkittsville Road (see Plate 27, Official Military Atlas). Recalled Colonel Joseph J. Bartlett: "It being decided that the attack should be made on the right and flank of the road leading over the mountains [Gapland Rd.], I was ordered to lead the column...to a large field near its base, where the column of attack was to be formed..." (in Luvaas & Nelson 1987:79). Franklin placed the First Maryland Battery "on the left and to the rear of the village," and "Smith's division was placed in reserve on the east side of the village...Captain Ayres' battery, of this division, was posted on a commanding ground to the left of the reserves..." (Ibid:77)

After a three hour delay, a result of General Franklin's indecision, Slocum sent his men on their charge (Sears 1983:147). Bartlett continued: "A moment's consultation with Colonel Torbert decided us to make the charge immediately at a double-quick...the command given to 'Charge,' and our whole line advanced with cheers, rushing over the intervening space to the stone wall and routing the enemy." (in Luvaas & Nelson 1987: 79-80) With the Confederate line along Mountain Church Road thus engaged by Slocum's Division, General Franklin "...directed General Brooks' brigade, of Smith's division, to advance upon the left of the road [Gapland Rd.], and dislodge the enemy from the woods upon Slocum's flank."(O.R., XIX, Pt I, p. 374) Brooks' Brigade moved out across the fields of the **Arnold Farm** where the Vermont regiments first met resistance at the stone wall marking the western edge of that farm at the Burkittsville Road. As Slocum's forces took the wall on Mountain Church Road, Brooks' Brigade advanced up the Burkittsville Road completing the rout. Confederate General Paul Semmes was at that moment coming up the road to Crampton's Gap on the west side of the mountain when he "encountered fugitives from the battle-field...the troops were met pouring down the road and through the wood, in great disorder..." (in Luvaas & Nelson 1987:81) Semmes reformed the line at the **Brownsville Gap** a mile to the south, but "the enemy made no further advance." (Ibid)

The sweep across the fields below the gap was successful; within hours Crampton's Gap belonged to the Federals. But Franklin's orders were not entirely fulfilled. Commanding General George B. McClellan's objective of freeing Harpers Ferry from the grip of the Confederates was postponed by Franklin at the crest of the gap, sealing the fate of the Union garrison at Harpers Ferry, and setting the stage for the September 17th battle at Sharpsburg across the Antietam Creek.

Geographical Data

Zip Codes: The district overlaps the following zip codes: 21779, 21758, 21718, 21769

Verbal Boundary Description

This district covers an area of West Central Maryland in the Blue Ridge Mountain Range known as South Mountain. The boundaries which include cultural resources present during the military action surrounding Crampton's Gap during the Civil War Battle of South Mountain. The boundaries are depicted on the USGS quad maps that accompany this documentation. The boundary includes land belonging to South Mountain State Park, the National Park Service, and numerous private properties along the crest of South Mountain and on the eastern and western slopes. The area includes portions of both Frederick and Washington County, Maryland.

Boundary Justification

Boundaries were defined by the use of roads, topographic contour lines, natural drainages, as well as property lines of the State Park and other private lands. They include locations of significant events which took place during the Battle of South Mountain on September 14, 1862, as shown on the attached historic battle maps: "Battle-Fields of South Mountain," Sept. 14, 1862, Army Corps of Topographical Engineers (Official Atlas, Plate 27), and "Battle of Crampton's Gap," Sept. 14, 1862 (from the Robert Knox Diary, LOC digital collection). The boundary also incorporates the Burkittsville National Register Historic District.

National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word process, or computer, to complete all items.

1. Name of Property

historic name Turner's and Fox's Gaps Historic District

other names/site number F-4-017-B,C; WA-II-1174; WA-III-175

2. Location

street & number U. S. 40-A, and Reno Monument, Dahlgren, Frostown, Mt. Tabor, and Moser Roads not for publication

city or town Middletown/Boonsboro vicinity

state Maryland code MD county Frederick/Washington code 021/043 zip code See Sec. 10

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance

Physical Description

During the September 14, 1862 Battle of South Mountain the primary push of Union troops took place over the roads leading over the mountain at Turner's Gap and Fox's Gap and the adjoining woodlots and fields. The collection of cultural resources associated with the Battle of South Mountain here form the Turner's and Fox's Gaps Historic District (Turner's/Fox's Gap District). These resources are described on the attached Inventory Table and are designated as contributing or non-contributing to the September 14, 1862 period of significance as part of the Multiple Property Documentation Form "South Mountain Battlefield[s] – September 14, 1862."

The Turner's/Fox's Gap District extends from just south of the Washington Monument, along the central ridge of South Mountain, to about ¾ mile south of Fox's Gap on Reno Monument Road. On the West it is bounded by the historic Moser Road and the more modern Monument Road. The Turner's/Fox's Gap District extends east from there to Mount Tabor Road which runs through the historic towns of Bolivar and Frostown.

The district is comprised of steep mountain terrain on the west and much more level valley/piedmont on the east side. There is a wide, relatively level area running down the center of the top of the mountain. Most of the steeper areas are heavily vegetated with trees such as hemlock, oak, hickory, and pine and once included an abundance of American chestnut (Baker 2003). Early farmers long ago cleared the valley areas of natural vegetation for fire wood and for growing crops.

The Turner's/Fox's Gap District was entirely rural during the Civil War with only a few very small villages such as Bolivar which was essentially a handful of houses, one of which was the post office. The area has always been largely agricultural and residential, and still remains largely rural today. Many of the farms, houses, and outbuildings are still scattered throughout the landscape, although, a fair number of post-Civil War homes can be found in small pockets along some of the main roads. Buildings of this later era include wood frame houses with Gothic-Revival influences built soon after the close of the war, wood frame farmhouses from the late 19th and early 20th century, and a few bungalows built in the 1910s and 1920s. Some more recent buildings (1950s to present) are also scattered throughout the area; these are primarily one-story ranch-style houses.

Dwellings built prior to the Civil War primarily consist of small log houses with German siding and equally small domestic and agricultural outbuildings which include some very small bank barns, summer kitchens, smokehouses, springhouses, chicken houses, corn cribs, etc. These smaller houses are found predominately on the steep slopes of South Mountain. One can still see the contrast of these smaller subsistence farms as compared with larger scale farms reflected in the bigger buildings in the valley area just east of the mountain. Other houses in the Turner's/Fox's Gap District include early to mid 19th century two-story stone houses and two-story brick houses. Several of the larger houses were used as military headquarters during the battle and some were used as hospitals during and immediately following the battle.

Turner's and Fox's Gaps Historic District
 F-4-017-B,C; WA-II-1174; WA-III-175

Frederick/Washington County, Maryland

Name of Property

County and State

Commercial buildings were few in the area of South Mountain, particularly in the Turner's/Fox's Gap District during the Civil War. Two commercial establishments which were part of the landscape of the Battle of South Mountain, still stand along the west side of Old National Pike. Old South Mountain Inn (WA-II-0001) and the Beachley House/White House Inn (F-4-029) were two-story stone and stucco buildings which served as inns or taverns. Both places provided room and board for travelers along the pike through much of the 19th century up until at least the time of the Civil War. The Mountain House Inn (Old South Mountain Inn) also served as the battle headquarters for Confederate General D. H. Hill, commander of Lee's rear guard. Union troops used the White House Inn for a hospital immediately after the battle.

Stone walls were also part of the Civil War-era landscape of South Mountain. Farmers had for decades constructed the dry laid stone walls of local rock to delineate the boundaries of their fields and contain livestock. Both Confederate and Union soldiers used the walls for defense during the Battle of South Mountain, and the walls were important in the Confederates' hold of the mountain for the better part of the day. Many of these stone walls are still in place over much of the battlefield. In the Turner's/Fox's Gap District, Colquitt's Wall (F-4-130) adjoining the National Pike at Turner's Gap was a key defensive position for General Colquitt and some Georgia brigade skirmishers in their stand against Union General John Gibbon's "Black Hat" or "Iron Brigade" advancing from the east.

Many of the present-day roads and paths traversing the Turner's/Fox's Gap District landscape were in existence before the Battle of South Mountain. A few of the old roads are still dirt roads or exist only as trails or traces through the woods, however, the majority of the roads have been paved and are currently in use. Most historic roads appear to closely follow their original routes across the battlefield landscape. New roadways include Monument Road which leads from Alternate 40/Old National Pike to the Washington Monument State Park Office and several dirt or gravel driveways which have recently been added to provide access to new homes.

Old road beds known to have been significant to the battle include:

- the Old National Pike (F-4-123) which passed through Turner's Gap,
- Ridge Road/Mountain Road (F-4-127) which ran north-south along the crest of South Mountain,
- Old Hagerstown/Frostown Road (Dahlgren Road)
- Frostown Road
- Old Sharpsburg/Reno Monument Road
- Mount Tabor Road
- Loop Road

A few historic sites within the battlefield are areas known to contain buried cultural resources including Mount Tabor Lutheran Cemetery and the Wise Farm. The Turner's/Fox's Gap District is considered two historic battlefield sites within one contiguous district.

The Turner's/Fox's Gap District includes 79 Contributing Buildings; 32 Contributing Structures; 4 Contributing Sites; 191 Non-contributing Buildings; 22 Non-contributing Structures; and 3 Non-contributing Objects [the monuments]. See attached Inventory Table for a full inventory of Contributing and Non-contributing resources within the Turner's and Fox's Gaps Historic District. Four properties within the Turner's/Fox's District are already listed on the National Register including the Routzhan-Miller Farmstead (F-4-141), two Old National Pike Milestones (F-4-75 and F-4-76), and the Reno Monument (WA-II-118).

Frederick/Washington County, Maryland

Name of Property

County and State

Integrity

Although there are a large number of non-contributing resources within the district boundary, the visual landscape and significant contributing resources retain remarkable integrity to the September 14, 1862 appearance. The District encompasses the area of both Turner's and Fox's Gaps in which the advance of federal troops and fighting took place on September 14, 1862. The gaps also possess integrity of setting: topographic features and vegetation are similar to the 1862 setting of South Mountain making it clear how terrain would have affected battle strategy. The Turner's/Fox's Gap District retains the feeling and association of the historic battlefield. The area surrounding both gaps is still largely rural and contains many wooded areas as well as numerous farms of various sizes which were present during the Civil War. Most of the present roads which were used during the Battle of South Mountain still follow their historic routes. Many stone walls used by soldiers for defense during the battle still stand in their original alignments across the fields.

Summary of Significance

The Turner's and Fox's Gaps Historic District meets registration requirements outlined in Section F of the Multiple Property Documentation Form entitled "South Mountain Battlefield[s] – September 14, 1862." The District is eligible for the National Register under Criterion A in the area of military history for its association with the Battle of South Mountain, which took place on September 14th 1862. The primary Union push against the entrenched, but smaller, Confederate forces wound its way up South Mountain at Turner's Gap along the National Pike and at Fox's Gap to the south along the old Sharpsburg Road (today Reno Monument Road). The Battle of South Mountain was significant in that on September 14, 1862, only three days prior to the Battle of Antietam at nearby Sharpsburg, a small number of Confederates briefly held off Union troops in order for Lee's divided army to reassemble. The major day-long battle took place in response to the loss of Confederate General Robert E. Lee's Special Order 191, his command to split the Southern army in order to capture the Union garrison at Harper's Ferry. The discovery of those orders prompted Union General George McClellan's uncharacteristic boldness in his pursuit of the Confederate Army on South Mountain. The period of significance, as established in the Multiple Property Documentation Form "South Mountain Battlefield[s] – September 14, 1862" is limited to the day of the battle, September 14, 1862. Therefore, only resources which were present on that day are considered contributing.

Resource History

U. S. A. General Alfred Pleasonton's Cavalry were the first Union troops to approach South Mountain by the National Pike on September 13, 1862. Jacob D. Cox's Kanawha Division was in Middletown to serve as support for the cavalry (Murfin 1965:162). Brigadier General Cox reported, "At 6 o'clock in the morning of September 14th the division marched from Middletown under an order...from Major-General Reno, directing me to support...the advance of General Pleasonton, who, with his brigade of cavalry and artillery, was moving up the Hagerstown turnpike toward the positions of the enemy in the pass of South Mountain." (in Luvaas & Nelson 1987:16) Here the famous warning "My God, be careful" from Colonel Moore, who had been paroled by the Confederates, convinced Cox that a greater force was on the mountain than the Lost Orders had led them to believe, a result of McClellan's delay (Luvaas & Nelson 1987:17).

Thus began the Federals' plan to flank the defenders on the left and right by the convenient Sharpsburg and Hagerstown Roads leading from the National Pike at Bolivar. General Cox continued:

...I rode forward to find Pleasonton, who was...where the old Sharpsburg road leaves the turnpike. I found that he was convinced that the enemy's position in the gap was too strong to be carried by a direct attack, and that he had determined to let his horsemen demonstrate

Frederick/Washington County, Maryland

Name of Property

County and State

on the main road, supporting the batteries... while Scammon should march by the Sharpsburg road and try to reach the flank of the force on the summit. (in Luvaas & Nelson 1987:17)

While Pleasonton's cavalry made their demonstrations on the National Pike below Turner's Gap, Scammon's men turned left down the "Sharpsburg road" (today's Bolivar Road), making their way toward Fox's Gap a short way to the south. Later Hooker's Corps would peel off to the right down the "Hagerstown Road" (today's Mt. Tabor Road and Frostown Road), in search of another route over the mountain, while Gibbon's Brigade of brave souls march straight up the middle on the National Pike to Turner's Gap. The day's battle unfolded to the near-constant pounding of artillery from above and below.

From his headquarters in the **South Mountain House** at the crest of the mountain in Turner's Gap, Confederate General D.H. Hill watched as McClellan's deployment of forces unfolded before him. Hill's response to the build-up of forces at the base of the mountain was critical. General Hill later observed: "Should the truth be known, the battle of South Mountain, as far as my division was concerned, will be regarded as one of the most remarkable and creditable of the war....the division numbered less than 5,000 men the morning of September 14, and we had five roads to guard, extending over a space of as many miles." (O.R., XIX, Pt I, p. 1021) Despite the small number of men in Hill's command, he held several advantages. The Federals' three-pronged attack proved to be slow and uncoordinated, allowing the Confederates to reinforce their positions. The Confederate forces also had the advantage of terrain by holding the high ground. As one Union private put it, "the rebels had stone walls to get behind and the woods to fall back in." (in Sears 1987:21)

The Action at Fox's Gap

The Kanawha Division, IX Corps of the Army of the Potomac, under the command of Brigadier General Jacob D. Cox, were given the task of turning the right flank of General D.H. Hill at Fox's Gap. On the morning of September 14th, approaching Fox's Gap along the Old Sharpsburg Road (now **Reno Monument Road**), Scammon's Brigade of Cox's Division in the advance found the road to be well defended by Bondurant's Confederate battery. To the left of the road and paralleling the crest of the mountain was a **loop farm lane** which, according to their local guide, would lead the force to the top of the mountain and to the right of the line of defense (Hartwig 1997:34). Led by Lieutenant Colonel Rutherford B. Hayes' 23rd Ohio Infantry, Scammon's Brigade filed down and around the loop road. Under the cover of the woods which surrounded the loop road the Union force prepared for the first battle for South Mountain.

Stone walls lined the Mountain Road (**Ridge Road**) along the crest of South Mountain meeting at Fox's Gap and around the fields that ran down the eastern slope. The thinly stretched lines of Confederate Brigadier General Samuel Garland's Brigade defending the gap took advantage of the protection afforded by the walls where they could. The Union forces viewed the stone walls from their positions along the loop road below, here described by General Cox in his Official Report: "...his [Scammon's] brigade being formed in line, under cover of timber, facing open pasture fields, having a stone wall along the upper side, with the forest again beyond this..." (in Luvaas & Nelson 1987:20).

Shortly after Scammon's Brigade advanced its line along the loop farm lane, and following a first encounter by the 23rd Ohio Regiment, the 30th Ohio under Colonel Ewing began its assault. Scammon reported: "On arriving at the foot of the slope in front of the enemy, I sent the thirtieth Regiment, commanded by Col. Hugh Ewing, to attack the left of that position of the enemy which was

Turner's and Fox's Gaps Historic District

Frederick/Washington County, Maryland

Name of Property

County and State

immediately opposed to us, with orders, if practicable, to seize a battery in that part of the enemy's lines...They were assailed by a shower of grape from the battery, whose real position and strength were not previously known, but they seized and held the crest of the mountain until they nobly bore their part in the charge by our whole line." (in Luvaas & Nelson 1987:19) Within minutes of this charge, emanating from the fields around the **J. Beachley and Hoffman (Coffman) Houses** (see 1858 Bond map), "...they were on and over the wall, the center of Garland's North Carolina brigade breaking before them..." (in Luvaas & Nelson 1987:20). Confederate General Samuel Garland's line of defense was effectively divided between the 13th and 20th North Carolina (Hartwig 1997:50).

In the afternoon of September 14th, following a lull in the battle for Fox's Gap, both forces' reinforcements began to appear. Up the Old Sharpsburg Road came Brigadier General Orlando B. Willcox's First Division in support of Cox's Kanawha Division. The Union reinforcement at Fox's Gap was in concert with Hooker's movement on Hill's left flank and Gibbon's march up the National Pike.

I was ordered by General Burnside to ...march up by the Sharpsburg road, and take up a position near Cox...I planted a section of Cook's battery near the turn of the road, and opened fire on enemys battery across the main pike. After a few good shots, the enemy unmasked a battery on his left, over Shriver's [Fox's] Gap, from a small field enveloped by woods. (Willcox report in Luvaas & Nelson 1987:38)

Following this attack was a charge by Hood's Confederate brigade. In the words of Colonel Benjamin C. Christ, USA: "I therefore led forward the 17th Michigan on the right of the road while Colonel Welsh advanced on the left with 45th Pennsylvania and 46th New York...then opened fire on the enemy with terrible effect, piling the road and field with his dead and wounded..." (in Luvaas & Nelson 1987:40) The Confederate forces were pushed north and west from Fox's Gap but Turner's Gap had not yet fallen. Bondurant's Battery, located in Wise's north field on the crest of the mountain at Fox's Gap, and the tenaciousness of Hooker's Division along the north stretch of the Ridge Road held the Federals in check until darkness brought an end to the battle.

Daniel Wise's fields and cabin were located directly at the crest of the gap at the intersection of the Old Sharpsburg Road and the Mountain/Ridge Road. Both Confederate and Union infantry moved across the fields and yard of Daniel Wise. It was also briefly the location of Bondurant's Confederate battery. Most importantly however, following the daylong battle for Fox's Gap, the farmstead was used as a hospital and burial ground (Stotemyer 1992:1).

The Action at Frostown and Turner's Gap

General Joseph Hooker's I Corps of the Army of the Potomac finally arrived in the fields below South Mountain in the afternoon of the 14th. Immediately they were directed to the right down the Old Hagerstown Road (actually Mt. Tabor Road) to the hamlet of Frostown. Directly ahead lay a steeply sided ravine. Running along the ridge on the right side of the ravine was the **Frostown Road**, at the time little more than a mountain trail. General Meade's Division was deployed from the fields of the **Gaber (Gaver) farm** at Frostown to the right of the road. Brig. General Truman Seymour's Brigade advanced "through open woods and over cultivated ground":

On a prominent hill on his [D.H. Hill's] extreme left, and on our right of the road...the rebels had posted a regiment, the Sixth Alabama. A brisk fire was opened upon our skirmishers by this regiment, and by a battery on the mountain to our left...an extended

Name of Property

County and State

field of corn led directly to the main position on the mountain itself. The First, Second, and fifth [PA Reserves] changed direction, and, supported by the Sixth in column of companies, continued the attack. A few volleys were fired, bayonets were leveled, three hearty cheers given, and the whole line moved quickly up the hillside with an impetus that drove the enemy from cover and gave us the crest. (in Luvaas & Nelson 1987:69)

Brigadier General Rodes' Alabama brigades arrived as reinforcements in the afternoon and were immediately sent to Hill's extreme left to "protect the flank." (Murfin 1965:180) Meade's advance, wrote Rodes in his report, "was about 3 p.m., and it was perfectly evident then that my force of about 1,200 muskets was opposed to one which outflanked mine on either side by at least half a mile... In the first attack of the enemy up the bottom of the gorge, they pushed on so vigorously as to catch Captain Ready and a portion of his party of skirmishers, and to separate the Third from the Fifth Alabama Regiment. The Third made a most gallant resistance at this point, and had my line been a continuous one it could never have been forced." (in Luvaas & Nelson 1987:61-63) (**D. Rent, O'Neil, Haupt Farmsteads**)

At the same time Hatch's Division was deployed through the fields on the left of the Frostown Road, facing the Confederate reinforcements from Jones' Division of Longstreet's Corps. Hill's reinforcements were funneled down the road (**Dahlgren Road**) leading north from Turner's Gap toward Frostown, to face the Union threat. Spread out along the fields on the east side of the road (**Beachley-Haupt House?**) paralleling the ridge were the brigades of Kemper, Garnett, Jenkins, and Evans (see map *Battles and Leaders*, II, p.568) Brigadier General Richard B. Garnett reported:

...having gained the summit on the main road, I was sent, by a narrow lane bearing to the left, to a higher position...and forming my line of battle, which I did by filing my command to the right through an open field. My right rested in thick woods, which descended quite abruptly in front, and my left in a field of standing corn. (in Luvaas & Nelson 1987:55)

The battle in the field of corn raged into darkness. Hatch's forces pushed the Confederates back through the cornfields but the road remained protected from the woods behind. By then it was too late and too dark for the Federals to push on and take the Gap. During the night of September 14th, the Confederate defenders retreated back to the main road and on to Sharpsburg.

As the flanking actions at Fox's Gap to the south and in the Frostown ravine to the north took shape, the **National Pike** became the center of action in an attempt to distract the Confederate defenders from the attacks on their left and right. Gibbon's attack began in the late afternoon of September 14th:

...I was ordered to move up the Hagerstown turnpike [National Pike] with my brigade and one section of Gibbon's battery, to attack the position of the enemy in the gorge. The 7th Wisconsin and the 19th Indiana were placed respectively on the right and left of the turnpike...the section of the battery under Lieutenant Stewart, 4th Artillery, keeping on the pike a little distance in the rear of the first line... (in Luvaas & Nelson 1987:42) (**Kepler Farm, Sheffer Farm, White House**)

Colonel A.H. Colquitt's Brigade was deployed at the Turner's Gap pass by General D.H. Hill on the morning of September 13, 1862 in response to the movements of General Alfred Pleasanton's Cavalry in the fields to the east of South Mountain. Seeing the advantage of the roads and stone walls on the right and left of the National Pike at the crest of the mountain, Colquitt divided his men. Three

regiments were placed on the Ridge or Mountain Road, "Upon the right of the road [National Pike], across the valley and upon the hillside." (in Luvaas & Nelson 1987:49)

The following day, September 14th, this position behind the stone walls of the **P. Butler property** along **Mountain Road** served in the defense against Gibbon's direct attack up the National Pike. Colonel Solomon Meredith's 19th Indiana began the approach on the left of the Pike:

On arriving near a house on our extreme left, surrounded on the southwest and north by timber, I discovered large numbers of the enemy in and around the house. They had been annoying us...by firing from the house and outhouses; also from the woods near the house. I ordered Lieutenant Stewart, who commanded a section of Battery B, Fourth Artillery, to come forward and open fire upon the house...[he] threw several splendid shots, the first of which took effect in the upper story, causing a general stampede of their forces from that point... (in Luvaas & Nelson 1987:43)

The musket fire continued for some time following the destruction of the house, until the Confederate forces on the south side of the Pike retreated.

The fighting then turned to the north side of the Pike as darkness was bringing an end to the day and the battle. Reported Colquitt of this part of his defensive line: "The remaining regiments of my brigade, to wit, the Twenty-third Georgia and Twenty-eighth Georgia, were put in position on the left of the turnpike, under cover of a stone fence and a channel worn by water down the mountainside." (in Luvaas & Nelson 1987:49) Much of the fighting had been between skirmishers and artillery until Gibbon's men approached the stone wall and the bulk of Colquitt's defense. Again, Col. Meredith, 19th Indiana recalled: "After the firing ceased in front, we discovered the enemy, who was concealed behind a stone fence on the right of the pike, in front of the Seventh Wisconsin, annoying them by a deadly fire behind their breastworks." (in Luvaas & Nelson 1987:44) The 7th Wisconsin took the brunt of the firing from the walls and the forest on their right. Using the "leapfrog" style of advance and fire, the other three regiments saved the 7th and pushed the Confederates back from their wall. By then however it was dark and too late to push on to the crest of the mountain pass. The Confederate defenders quietly retreated during the night to Boonsboro and on toward Sharpsburg.

Geographical Data

Zip Codes: The district overlaps the following zip codes: 21769, 21773, 21713

Verbal Boundary Description

The district covers an area of west-central Maryland in the Blue Ridge Mountain Range known as South Mountain. The boundaries which include cultural resources present during the military action surrounding Turner's Gap and Fox's Gap during the Civil War Battle of South Mountain. The boundaries are depicted on the USGS quads which accompany this documentation. The boundary includes land belonging to South Mountain State Park, the National Park Service, and numerous private properties along the crest of South Mountain and on the eastern and western slopes. The area includes portions of both Frederick and Washington County, Maryland.

Boundary Justification

Boundaries were defined by the use of roads, topographic contour lines, natural drainages, as well as property lines of the South Mountain State Park and other private lands. They include locations of significant events which took place during the Battle of South Mountain on September 14, 1862, as shown on the attached historic battle maps: "Battle-Fields of South Mountain," Sept. 14, 1862, Army Corps of Topographical Engineers (Official Atlas, Plate 27), and "Map of the Position at Turner's Gap," Sept. 14, 1862 (from the Robert Knox Diary, LOC digital collection).

Verbal Boundary Description

The proposed NHL boundary encompasses all areas of major combat action during the Battle of Crampton's Gap on the afternoon of September 14, 1862. Included within the boundary are the corn and wheat fields and open pastures over which the Union VI Corps attacked in an attempt to dislodge Confederates defending the eastern base of Crampton's Gap. The stonewall flanking the east side of Mountain Church Road served as the primary defensive position for the Southerners, and both this road and the historic wall remnants are included within the boundary. The Union attackers eventually compelled the Mountain Church Road defenders to retreat up the mountain into the gap itself. The Federals pursued and captured over 400 Rebels at the top of the gap, subsequently ending the battle. The area comprising the capture also is included within the boundary (Section 2).

Verbal Boundary Description

The proposed NHL boundary encompasses all areas of major combat action on the crest of South Mountain during the Battle of Fox's Gap throughout September 14, 1862. Included within the boundary are the corn and wheat fields over which the Union IX Corps attacked in an attempt to dislodge Confederates defending the crest of the Fox's Gap area. The main Confederate defensive position, a mountain road paralleling the crest, follows its original alignment today and therefore is an important cultural feature within the boundary. Remnants of the stonewall which flanked the north edge of this road also fall within the boundary. This wall provided extra protection to the Confederate defenders posted atop the crest. An unimproved farm lane used by General

ITEM 10 (GEOGRAPHICAL DATA)

TURNER'S GAP (Cont.)

Verbal Boundary Description

The proposed NHL boundary encompasses areas of major combat action during the Battle of Turner's Gap on the afternoon and evening of September 14, 1862. Included within the boundary are the corn and wheat fields and open pastures over which the Union I Corps attacked in its attempt to dislodge Confederates defending the eastern slope and crest of the Turner's Gap area. The I Corps used several roads to gain access to the mountain's steep slopes, including the National Turnpike, Dahlgren Road, and Frostown Road. Each of these roads follows its original alignment today, and each is included within the boundary. The Confederates also used Dahlgren Road as a line of defense and as a lateral artery for reinforcements. A stonewall located on the eastern slope of the mountain just south of Turner's Gap provided an excellent defensive position for Gen. Colquitt's Georgia Brigade, and from behind this wall, the Georgians successfully repulsed the approach of Gen. Gibbons' "Iron Brigade." This wall is remarkably preserved today, and is an important cultural resource within this boundary.

Within this boundary is an area that is excluded from NHL designation. This area has been excluded for two reasons: 1) no major fighting occurred here; and 2) residential development has compromised the original integrity of this area.

The expansive boundary of the Turner's Gap Battlefield is defined by the bold, dark line superimposed on Frederick County, Maryland, Tax Map 45 and Tax Map 54.

Describe the present and original (if known) physical appearance

OVERVIEW

The battlefields of South Mountain are three of the best preserved Civil War battlefields in the United States.

Stone walls once defended by outnumbered Confederates remain intact today. Fields of wheat and corn that witnessed charges and countercharges still continue to flourish. Fencerows separating forests from fields still duplicate their original lines. Rugged and precipitous wooded ravines and slopes remain formidable barriers today. Narrow mountain roads traveled by blue and gray still follow their traditional routes.

The original appearance of the South Mountain battlefields is well-documented in a map prepared by the United States Topographical Engineers in the winter of 1862. Roads, creeks, structures, ground cover, fencelines, troop movements and positions, and topography are minutely detailed.

In summary, most natural and cultural features of the South Mountain battlefields have remained unaltered since September 14, 1862—the date of the battle.

Fighting at South Mountain began when Union General George B. McClellan attacked Confederate forces defending three mountain passes: Turner's Gap on the north end of the field; Fox's Gap, one mile south of Turner's; and Crampton's Gap, six miles below Fox's. The action at each gap was separate and distinct, and each will be examined below as an individual battlefield.

CRAMPTON'S GAP BATTLEFIELD

HISTORICAL APPEARANCE

The official campaign report of General William B. Franklin, commander of the Union Sixth Corps attacking Crampton's Gap, best describes the original appearance of the main battlefield:

The enemy was strongly posted on both sides of the road [the Old Burkittsville Road] which made a steep ascent through a narrow defile, wooded on both sides and offering great advantages of cover and position. Their advance was posted near the base of the mountain, in the rear of a stonewall, stretching to the right of the road at a point where the ascent was gradual and for the most part over open fields.

Franklin's description, coupled with the army engineers' detailed terrain map of the Crampton's Gap area, expedites comparison of the historic and present appearance of the battlefield. (See Appendix 1, Map A, for the 1862 map of Crampton's Gap).

Page 1

THE BATTLEFIELD TODAY

Landscape: The Old Burkittsville Road (Gapland Road today), which bisects the southern end of the battlefield, has experienced no change with the exception of paving. The Mountain Church Road (historical name unknown), which parallels the eastern base of South Mountain and served as the Confederates' initial line of defense, intersects the Old Burkittsville Road approximately 800 yards west of Burkittsville. This road is paved today, but it still follows its original course.

Paralleling the southern section of Mountain Church Road is approximately 1,000 feet of the original stonewall defended by the Confederates. The land east of the Mountain Church Road is open, rolling fields—fields over which Slocum's division of the Federal Sixth Corps originally attacked. Separating these fields into rectangular plots are stone walls and hedgerows that represent the location of original fence lines. The wooded eastern slopes of South Mountain, through which the Confederates eventually retreated, presently are forests of oak and maple.

Structures: Farm houses and barns do stand today in positions identical to those shown on the 1862 engineers' map. Their historical appearance is unknown, however, and therefore it is not known whether these structures were on the battlefield at the time. They had no direct role in the battle.

No modern development, such as subdivisions, exists on the battlefield.

Intrusions: With the exception of telephone and electric lines along the roads, no intrusions impact the battlefield adjoining the Old Burkittsville Road and Mountain Church Road.

At the top of South Mountain in the gap itself, where over 400 Confederates surrendered, is Gathland State Park. In the mid-1870s, war correspondent and novelist George Alfred Townsend, whose pen-name was "Gath", developed Crampton's Gap into his own personal estate. Little remains of Townsend's estate today. With the exception of his War Correspondents' Memorial, erected in 1896, and now considered a part of the historic scene, the gap's appearance has changed little.

Although the Maryland Park Service maintains modern facilities at Gathland, such as a small picnic pavilion and restrooms, these structures are constructed of native wood and stone and are positioned such that they do not intrude upon the historic environment.

FOX'S GAP BATTLEFIELD

HISTORICAL APPEARANCE

Maj. James M. Comly and his 23rd Ohio Regiment (of Cox's Division of the Ninth Corps) launched the initial attack against the Confederates defending Fox's Gap. Comly provides a good description of the battlefield in his official report:

The order was given to charge, and the regiment advanced to the charge in as good order as possible through the thick woods into a cornfield. The enemy was behind the stone fence at the crest of the hill, with forest again beyond this.

In addition to Comly's description, the 1862 army engineers' map of Fox's Gap graphically details this battlefield's original appearance. (See Appendix 1, Map B).

THE BATTLEFIELD TODAY

Landscape: The Old Sharpsburg Road (Reno Monument Road today), which runs perpendicular to South Mountain and bisects the northern quadrant of the battlefield at Fox's Gap, remains unchanged with the exception of paving. A mountain road paralleling the crest of South Mountain (historical name unknown), which served as the Confederates' main line of defense, now is a private, paved road south of the gap and an unimproved sunken dirt road to the north.

A stone wall bordering the east side of this crest road provided extra protection for the Confederates. Approximately 1,000 feet of this wall still stand at the Confederate right and center.

An unimproved farm lane 3,000 feet south of and parallel to the Old Sharpsburg Road defines the southern end of the battlefield. Federal divisions under Cox and Sturgis advanced via this lane before attacking the Confederate right.

The Federals attacked through open fields of pasture and corn located just below the crest on the eastern slope of the mountain. All the fields of 1862 remain cultivated today with two exceptions: (1) "Wise's Field," at the intersection of the Old Sharpsburg Road and the mountain crest road—originally in corn—is now a pine forest; (2) fields north of the Old Sharpsburg Road (over which Rodman advanced) now are cluttered with scrub brush and brambles.

All areas wooded at the time of the battle remain in forest today.

Structures: The only building which witnessed this battle was the one-story log cabin of mountain farmer John Wise. Located at the intersection of the Old Sharpsburg Road and the mountain crest road, bullets and shell fragments perforated Wise's house on

Page 3

September 14, 1862. Nothing remains of this structure today, however. In fact, local residents do not recall its existence anytime during this century.

Opposite the location of Wise's cabin stands the only monument on the battlefield—Reno's Monument. Dedicated in 1896 by survivors of the Union Ninth Corps, this six-foot marble obelisk marks the location of Maj. Gen. Jesse L. Reno's mortal wounding. Reno commanded the Ninth Corps. A three foot stone and concrete wall surrounds the monument.

Although modern houses slowly are encroaching upon Fox's Gap, none disrupt the historic integrity of the battlefield.

Intrusions: With the exception of a 500,000 volt high transmission power line dangling over the extreme southern end of the field, no modern intrusions impact this battlefield.

TURNER'S GAP

HISTORICAL APPEARANCE

Due to a separation of distance and time of engagement, this battlefield must be analyzed as two separate actions: Hooker's advance and Gibbon's advance.

The main thrust of Union General Joseph Hooker's drive occurred one mile north of Turner's Gap. John Gibbon directed his Union brigade against Turner's Gap itself.

Excerpts from the official report of General Hooker, commander of the Union First Corps, provide a good description of his battlefield:

In front of us was South Mountain, the crest of the spinal ridge of which was held by the enemy in considerable force. Its slopes are precipitous, rugged, and wooded, and difficult of ascent to an infantry force, even in absence of a foe in front.

The National Turnpike crosses the summit of this range through a gentle depression [Turner's Gap] and near this point a spur projects from the body of the ridge, running nearly parallel [to South Mountain] for about one mile. To the north of the pike this spur is separated from the main ridge by a narrow valley, with cultivated fields, extending well up the gentle slope of the hill. Here the enemy had a strong infantry force posted, and a few pieces of artillery.

Item number 7

Page 4

Two detached, wooded mountain peaks constituted the north end of this "spur" described by Hooker. Southerners posted on these peaks were ordered to protect the Confederate left flank at all hazards. Capture of these summits consequently became the primary focus of Hooker's advance.

While Hooker was attacking the Confederate left, one mile to the south, John Gibbon's brigade crawled westward along the National Turnpike toward Turner's Gap. No single verbal passage adequately describes this area, but excerpts indicate the slopes of the gap were wooded and that the primary position of the Confederates was a stone wall south of the gap just below the crest of the mountain.

The 1862 army engineers' map of Turner's Gap provides excellent details of this battlefield's original appearance. (See Appendix 1, Map C).

THE BATTLEFIELD TODAY

A. Gibbon's Advance

Landscape: The National Turnpike (Alternate Route 40 today), is a narrow, paved road that still bends and twists its way over South Mountain via its original course. The eastern slopes of Turner's Gap remain wooded, and the stone wall defended by Alfred Colquitt's Georgia brigade is excellently preserved.

Structures: Located at the top of South Mountain in Turner's Gap itself is the original "mountain house" that Confederate General D.H. Hill used as his battlefield headquarters. Today this building is a restaurant, and due to extensive exterior alteration, it is not included in the proposed NHL boundary.

Opposite the "mountain house" is a Catholic chapel erected in the 1880's by Madeline Vinton Dahlgren, owner of Turner's Gap during the late 19th century. Although this is a most handsome structure built of native stone, it was not present at the time of the battle and therefore is not included within the proposed NHL boundary.

Although some residential development has occurred just west of Turner's Gap, none of this is visible from Gibbon's line of approach.

Intrusions: With the exception of telephone and electric lines along the National Pike, no modern intrusions detract from the historic integrity of the battlefield.

B. Hooker's Advance

Landscape: Approximately 200 yards below the eastern crest of Turner's Gap

Item number 7

Page 5

begins Dahlgren Road (historical name unknown). This narrow, dirt mountain lane—which still follows its original course north and east from the National Pike to Frostown—was used by the Confederates to channel reinforcements to their precarious left flank.

The Frostown Road, used by the Union division of George Meade to attack and gain access to the extreme Confederate left, remains today as a sunken dirt lane that deviates little from its original route.

Those slopes wooded in 1862 remain in forest today. Farmers continue cultivating most of the small, mountain fields over which Hooker's Federals advanced. The few no longer cultivated just recently have been abandoned and are cluttered now with small trees and brambles.

Structures: No structures played a significant role in this battle. Farm buildings and mountain homes do stand in positions identical to those shown on the 1862 engineers' map. Since these structures played no role in the battle, however, and since their historical appearance is unknown, existing structures within the proposed NHL boundary are non-contributing elements to the historic scene.

Several new homes have been constructed adjacent to Dahlgren Road and Frostown Road. These do not intrude, however, upon the core battlefield area, and have been excluded from the proposed NHL boundary.

Intrusions: No intrusions currently detract from the historic integrity of the battlefield.

Statement of Significance (in one paragraph)

SUMMARY STATEMENT

The inadvertent discovery of Gen. Robert E. Lee's campaign plans (Special Order 191) on September 13, 1862, presented Union commander George B. McClellan with one of the grandest opportunities to destroy an enemy in world military history.

With one sudden strike through the gaps of South Mountain, McClellan could interpose between the scattered wings of Lee's army; save the besieged garrison at Harpers Ferry; hurl the Southern invaders from Union soil; and possibly precipitate an early end to the war in the East.

"The case called for the utmost exertion and the utmost speed."⁵ McClellan, however, hesitated. Instead of "straining every nerve," the Federal commander conducted a cautious and deliberate advance which enabled Lee's lieutenants to defend South Mountain with vigor.

Although the bluecoats eventually occupied the mountain's gaps, Lee's holding action at South Mountain earned the Confederates precious hours—hours they used to complete the investment of Harpers Ferry and to reunite their forces at Sharpsburg. McClellan's incertitude thus resulted in the largest surrender of United States forces prior to World War II (over 12,500 at Harpers Ferry) and the bloodiest single-day Civil War battle, at Antietam on September 17, 1862 .

George McClellan's failure to crush Lee at South Mountain consequently represents "one of the saddest moments of the war for the Union."⁶

THE CONFEDERATE INVASION

On September 4, 1862, Gen. Robert E. Lee's Army of Northern Virginia splashed north across the Potomac River. Within a few days the veteran Confederates had settled around the western Maryland town of Frederick, poised and anxious to conduct a campaign of maneuver in Yankee land. The first major invasion of the North had begun.

General Lee's campaign of maneuver, however, faced a problem. The Union forces occupying the lower Shenandoah Valley had not retreated northward with the invading Confederates. Lee realized that the 14,000 Federals steadfastly emplaced to his rear at Harpers Ferry and Martinsburg could disrupt his supply and communication lines and impede his army's freedom of movement. Something had to be done.

SPECIAL ORDER 191

Lee decided a bold gamble was necessary. Despite being outnumbered two to one by McClellan's advancing Army of the Potomac, the unorthodox Lee divided his forces. In Special Order 191, issued on September 9, 1862, Lee directed three columns to attack and capture the Federal garrison at Harpers Ferry while the remainder of the army awaited the reunion of the detached forces at Boonsboro. (Appendix 2, Map A shows the positions of the opposing armies). Lee allowed three days for the operation's completion. Time was critical.

Three days passed. Lee received no word of Harpers Ferry's surrender. McClellan, on the other hand, was moving uncharacteristically fast, threatening to disrupt the operation.

What was happening? Had Lee gambled the Army of Northern Virginia into extinction?

SPECIAL ORDER 191 FALLS INTO ENEMY HANDS

As Lee's army scattered over the Maryland and Virginia countryside, McClellan's army moved forward to Frederick, encamping in locations occupied by the Confederates only a few days before.

In one of these campsites, two soldiers from an Indiana regiment spied three cigars enwrapped in a piece of paper. Undoubtedly attracted by the cigars, the Unionists picked up their find. Before discarding the piece of paper, one of the Yanks examined its contents. It was a copy of Special Order 191!

The paper immediately went to McClellan's headquarters. After it was authenticated, McClellan jumped with glee. Seldom had a military commander experienced such luck!

Ecstatic about his discovery, McClellan wired President Lincoln on the afternoon of September 13: "I think Lee has made a gross mistake. I have all the plans of the rebels and will catch them in their own trap."

The stage was set for the Battle of South Mountain.

THE FEDERAL STRATEGY

As General McClellan studied Lee's lost order, he devised a scheme to "cut the enemy in two and beat him in detail." A successful strike at Crampton's Gap, reasoned McClellan, would relieve the besieged garrison at Harpers Ferry and entrap thousands of isolated Confederates in Pleasant Valley. At Fox's and Turner's Gaps, decisive blows would slice Lee's line of retreat and doom nearly half of Lee's army at Boonsboro (see Appendix 2, Map B).

Item number 8

Page 2

With his plans articulated in orders to his subordinates, McClellan danced with joy and rashly proclaimed, "If I cannot whip Bobbie Lee, I will be willing to go home."¹⁰

One crucial flaw marred McClellan's dream of victory, however. Instead of executing a rapid and vigorous forward movement toward South Mountain on September 13—the date of the discovery of 191—McClellan instructed his corps commanders to "move at daybreak in the morning" of the 14th.¹¹ At least twelve precious hours consequently were lost to Federal inactivity. McClellan thus wasted the advantages he had gained from Special Order 191. As one critic remarked, "It is hoped that some capable smokers derived more good out of the three cigars than McClellan was to get out of the order in which they were wrapped."¹²

THE BATTLES OF SOUTH MOUNTAIN

CRAMPTON'S GAP

McClellan assigned Maj. Gen. William B. Franklin and the Federal Sixth Corps the crucial task of attacking Crampton's Gap. With specific orders to "cut off, destroy, or capture" the 8,000 Confederates in Pleasant Valley and to relieve the surrounded garrison at Harpers Ferry,¹³ Franklin advanced toward South Mountain at dawn on Sunday, September 14, 1862.

Unaware that his rear was threatened by 12,000 encroaching bluecoats, the Confederate commander in Pleasant Valley, Maj. Gen. Lafayette McLaws, had posted at Crampton's Gap only 500 defenders. Consequently, as the Unionists approached the gap at noon on the 14th, Confederates crouched behind a stonewall at the eastern base of the mountain saw so many Federals "that it looked as if they were creeping up out of the ground."¹⁴

Although the odds favored the Sixth Corps twenty-four to one, Franklin—convinced the Confederates outnumbered him!—spent three hours deploying his forces. The Federals' extraordinary caution reminded one Southerner of "a lion making exceedingly careful preparations to spring on a plucky little mouse."¹⁵

Finally at 3 p.m., the Sixth Corps advanced. (Appendix 1, Map A shows the Crampton's Gap battlefield in detail). The 500 Confederates behind the stonewall held the Northerners at bay for the next three hours. Despite this spirited defense, overwhelming numbers eventually forced the Southerners to flee toward the gap (see Appendix 1, Map A). Franklin's men pursued, capturing in the gap itself 400 Rebel prisoners and 700 stand of arms. Crampton's Gap belonged to the Sixth Corps.

Although Franklin had seized the gap, he had not fulfilled his mission to destroy McLaws and relieve the garrison at Harpers Ferry. To accomplish these objectives, an advance down Pleasant Valley was necessary. Franklin refused to press onward, however, informing McClellan that the enemy outnumbered him "two to one" and that

Item number 8

Page 3

he could not advance "without reinforcements."¹⁶

Franklin's delusion of superior Confederate forces ended the fighting at Crampton's Gap. On the morning of September 15, Harpers Ferry surrendered, allowing McLaws to escape confrontation (see Appendix 2, Map C). General Franklin had won the Battle of Crampton's Gap, but his failure to destroy McLaws and to relieve Harpers Ferry made his victory meaningless.

BATTLE OF FOX'S GAP

In conjunction with Franklin's strike at Crampton's Gap, McClellan ordered the rest of the Army of the Potomac to move westward via the National Turnpike toward the western Maryland town of Boonsboro.

Here McClellan expected to encounter half of Lee's army patiently awaiting the return of forces sent to invest Harpers Ferry. McClellan reasoned that a successful blow at Boonsboro would interpose his army between Lee and Confederate reinforcements and would slice Lee's line of retreat back to Virginia (see Appendix 2, Map B). The crushing of Lee's vulnerable army seemed imminent.

Before reaching Boonsboro, however, McClellan first had to cross South Mountain. The initial Federal plan called for a drive through Turner's Gap, but when the leading columns of the army unexpectedly discovered Confederates east of Turner's Gap, the Union commanders devised a new strategy—turn the Rebel flanks. Divisions of the Union Ninth Corps subsequently marched one mile south toward Fox's Gap to pierce the Confederate right. The Federal First Corps, in turn, focused its attention on the Confederate left, one mile north of Turner's Gap.

From his vantage point high atop South Mountain, Confederate Maj. Gen. D. H. Hill watched the advancing Federals move toward his weakly defended positions: "The marching columns extended back far as the eye could see," Hill wrote. "It was a grand and glorious spectacle, and it was impossible to look at it without admiration. I had never seen so tremendous an army before, and I did not see one like it afterward."¹⁷

As Hill's 5,000 Confederates spread out over two miles to defend the mountain's passes, Hill summarized his situation: "I do not remember ever to have experienced a feeling of greater loneliness."¹⁸

First contact between the two opposing forces occurred at Fox's Gap at 9 a.m. on September 14, 1862. As Jacob Cox's Kanawha division of the Ninth Corps ascended the Old Sharpsburg Road just west of the gap, well-placed Confederate artillery blasted the Federal advance. Cox veered to the left, and after careful deployment, the Kanawha division launched a successful attack against the Confederate right flank. In this charge, a musket ball crashed into the left arm of Lt. Col. Rutherford B. Hayes

Page 4

(later president of the United States) of the 23rd Ohio Volunteer Infantry. In this same clash, Brig. Gen. Samuel Garland, commander of the North Carolina brigade defending the Confederate right, was killed.

Cox's drive broke the Confederate line at Fox's Gap, but instead of pursuing the disorganized Rebels, the Union commander inexplicably withdrew to a secure position and awaited reinforcements. No more action occurred until early evening, at which time the entire Ninth Corps attacked the crest of the mountain and encountered a Confederate position strengthened by brigades from the divisions of Generals Longstreet and Hood. (Appendix 1, Map B provides excellent detail of the Fox's Gap battlefield).

The opponents clashed until dusk, with the Confederates retaining a firm hold on the ground north of the gap. As darkness descended upon the mountain, the commander of the Ninth Corps, Maj. Gen. Jesse L. Reno, was mortally wounded while reconnoitering the Confederate position. Sporadic gunfire continued until 10 p.m., when Lee ordered his veterans to retire toward Sharpsburg.

Fox's Gap belonged to the Federals, but the day belonged to Robert E. Lee. A spirited Confederate defense, coupled with Union delays precipitated by the belief "that the whole mountain was swarming with rebels," had thwarted McClellan's plan to turn the Confederate right.¹⁹ Lee's supplies were safe, his army intact, and his line of retreat still open.

Another Federal opportunity had slipped into history.

TURNER'S GAP

The task of turning the Confederate left fell upon Major General Joseph Hooker and the Union First Corps.

Beginning about mid-day on Sunday, September 14, 1862, Hooker began positioning his three divisions opposite two high knolls located approximately one mile north of Turner's Gap. Perched on top of these peaks was the Alabama brigade of Gen. Robert Rodes, charged with protecting the Old Hagerstown Road and the extreme left flank of the Confederate line on South Mountain (see Appendix 2, Map B). Rodes faced overwhelming odds, with Hooker outnumbering him 12,000 to 1,100.

Hooker's advance began about 4 p.m. George Meade's division tested the extreme Confederate left while the division of John P. Hatch charged up a ravine on the right of Rodes's brigade. (Appendix 1, Map C provides the details of the Turner's Gap battlefields). With his men isolated and reinforcement impossible, Rodes steadily withdrew, but not without menacing and delaying the Federal advance until nightfall. Hooker's men eventually seized the knolls on the Confederate left, but darkness and difficult terrain protected Lee's rear from the bluecoats.

Inventory—Nomination Form**

Continuation sheet

Item number 8

Page 5

As Meade and Hatch slowly ascended the mountain's slopes, Hooker ordered Gen. John Gibbon's brigade to attack the Confederate center at Turner's Gap itself. As evening approached, Gibbon's men cautiously proceeded westward on the National Pike, playing a "deadly game of Bo-peep" with Alfred Colquitt's Georgia brigade, defiantly defending the gap behind a stone wall.²⁰ Darkness eventually halted Gibbon's advance, and the Confederate center remained solidly intact.

As 10 p.m. approached, Lee ordered his weary mountain fighters to withdraw toward Sharpsburg. The Battle of South Mountain was over.

HISTORY'S REFLECTION

The Union high command was ecstatic about its accomplishment. For the first time, the feared Army of Northern Virginia had been forced to withdraw from a battlefield. General Hooker summarized the Federal sentiment when he wrote: "the forcing of the passage of South Mountain will be classed among the most brilliant and satisfactory achievements of this army."²¹

From the Confederate perspective, the Battles of South Mountain were tactical defeats indeed. Strategically, however, September 14, 1862, produced a significant victory for Robert E. Lee.

As Confederate Gen. D. H. Hill stated: "If the battle of South Mountain was fought to prevent the advance of McClellan, it was a failure on the part of the Confederates. If it was fought to save Lee's ~~trains~~ trains and artillery, and to reunite his scattered forces, it was a Confederate success."²²

Documentation on the property/district is presented in:
 Project File

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*
 A National Register of Historic Places Nomination Form was completed for the South Mountain Battlefields in 1986, but the district has never been listed. In the National Register Nomination Form of 1986, the Battlefields were determined to be eligible under Criterion A, association with events that have had a broad impact on our history. The South Mountain Battlefields include all the resources associated with the Civil War Battle of South Mountain, which occurred on September 14, 1862. The Battlefields District includes sites at Fox's, Crampton's, and Turner's Gaps. The Fox's Gap section of the Battlefields are within the Area of Potential Effects for the proposed telecommunications tower at Lambs Knoll. At Fox's Gap, the Confederate forces fortified their positions along the Old Ridge Road, where it intersects the Old Sharpsburg Road (Reno Monument Road). The Union forces of General McClellan advanced up the Old Sharpsburg Road from the east towards the stone walls that the Confederates had built. The Battle of South Mountain was the prelude to the Battle of Antietam three days later, the bloodiest single day of the Civil War, on September 17, 1862.

There are several surveyed resources that contribute to the South Mountain Battlefields: Fox's Gap District. They are: WA-II-1126, the Wise Farmstead; F-4-134, the Stone Walls along the Old Ridge Road; F-4-131, the Old Sharpsburg Road; F-4-133, the Edward E. Hallein Property; F-4-132, the Hoffman Farm; F-4-129, the Loop Farm Lane; and F-4-127, the Old Ridge Road.

NR-ELIGIBILITY REVIEW FORM

South Mountain Battlefields: Fox's Gap

Inventory Number: F-4-17-B

Page 2

The Battle of South Mountain was a pivotal moment in General Robert E. Lee's 1862 Maryland Campaign. Lee had split his forces, a fact which the Union troops under General McClellan attempted to take advantage of at South Mountain. After the battle, though, Lee was able to reunite his forces at Sharpsburg, where the Battle of Antietam took place on September 17, 1862. There seems to have been little or no change to the South Mountain Battlefields District at Fox's Gap since the time of its nomination. Thus, it is still significant under Criterion A, association with historical events. The association of Civil War personalities with the South Mountain Battlefields District is not sufficient to justify it as significant under Criterion B, association with the lives of persons in our past. There are no architectural structures associated with the site, thus disqualifying it for eligibility under Criterion C. Criterion D, information potential, was not evaluated for this study.

STONEWALL REGIMENT

The 17th Michigan Volunteer Infantry Regiment was among the units of General Ambrose E. Burnside's 9th army corps that were engaged in battle here on September 14, 1862. The fighting began around 9:00 A.M. just south of this site. Around noon a Confederate battery opened fire on the regiment, which was supporting Cook's Massachusetts Battery. The 17th held its position for several hours. At 4:00 P.M. the command was given for an assault along the entire Union line. The Confederates came out of the woods to meet the charge at a fence line in the middle of the field, then moved back to the stone walls along the crest of the hill. The 17th advanced and captured the stone walls. Of the 500 men of the "Stonewall Regiment" engaged in battle here, 27 were killed and 114 wounded, many mortally.
