DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Brandenburg House and Store faces north from the south side of Route 80 in Kempton.

The store, located to the northeast side of the house, is a two story shed roofed frame building, which is related to the Brandenburg House. The building is three bays wide, a modern door with entrance porch and railing is located in the second bay. Double hung 2/2 windows with plain trim occupy the first and third bays on the first level and both bays on the second level. The tin roof is completed with a plain cornice except on the north side of the building where the cornice is boxed with a decorative frieze. Three 2/2 windows with plain trim occupy the first level on the east side, two identical windows are located on the second level. A frame shed addition two bays wide and deep is located to the rear of the store on the south side. One 2/2 window with plain trim is located on the first and second level on the west side of the store. The building is constructed on a low random stone foundation. One replaced brick chimney is located to the center rear of the store.

The Brandenburg House is a rectangular 2½ story frame center gabled single ownership residence which is related spatially to other residences on the street and faces north from the south side of Route 80.

The principle facade is three bays wide. The main entrance, a four panel door with screen door is located in the second bay. A wide pedimented entrance porch situated between the first and third bays extends from the front of the building. Two 2/2 windows with plain trim are located in the first and third bays. Shutters, probably louvered and similar to the one remaining example on the second level were once attached to the windows but are now missing. Three 2/2 windows occupy the second level; one louvered shutter remains on the window in the third bay.

A small triangular window is located in the center gable. The replaced tin roof is finished with a boxed cornice with return and denticulated frieze. Two corbeled brick chimneys are located on either side of the center gable. A 2/2 window is located on each level of the west side. A small triangular window is located in the center of the side gable. Alternate rows of shingle siding with staggered butts are located in the top of each gable on the house. The southside of the building is three bays wide; two 2/2 windows with plain trim occupy the first and second bays from the southwest corner and an original frame shed addition extends from the rear. A 2/2 window is located on the south side of this addition and a modern cinder block porch juts out from the west side. A six foot brick chimney rises from the southeast corner. The house is built on a low random stone foundation and is in a fair state of repair. A large open yard lies to the south side of the building.

7.3 Description (Continued)

a smaller gable. In the main gables just below the diagonals are a pair of multiple-paned square windows. The use of varied window styles in a single structure is also a common characteristic of the Queen Anne style. When sold to Washington's wife Susannah (spelled Luanah in some records) in 1893 as a result of a family dispute between Boyer and the Days, the property had a frame stable, meat house, and carriage house. These structures remain in a group just south of the house, along with several other sheds which were apparently built as part of a poultry supply business operated in the 1920's by a subsequent owner, Warren Davis.

Kemptown Community Hall/J.O.U.A.M. Hall (F-7-112), 12524 Fingerboard: The one-story frame, gable-front building has been a residence since 1956. It has vinyl siding and a corrugated metal roof. The south elevation has three bays with paired modern windows flanking the center entrance under a small canopy hood. A 2/2 pointed-arch window is in the front gable. Additions have also been made to the rear elevation. The building was erected in 1899 by the Kemptown Hall Company. It was used as a community hall and a fraternal lodge, the Independent Order of Good Templars. In 1915, the building was sold to the Junior Order of American Mechanics #195. In 1940, the Providence Methodist Church bought the building for use as a community activities building and was the site of church suppers, receptions, plays, and concerts. Stephen Galley, a former pastor of the church, converted the building to a residence in 1956.

Brandenburg Store and Residence (F-7-115), 12529 Fingerboard: The two-story frame house with three bays and a cross gable has an adjoining flat-roofed two-story frame store building. Both sections have german siding and entry porches over the center entrance to each sections. The windows are 2/2 and the gable of the house has a shingled face and dentil cornice with a central pointed arch window. The roof of the house is composition, with an off-center chimney. The doorway has a transom and sidelights and a four-panel door. The store section has three bays on the first story and two on the second. The door is a modern replacement, with a plain transom above. The dentil cornice of the house is repeated on the cornice of the store. The two parts were built about 1900, possibly by Oscar and Mary (Mollie) Brandenburg who operated the store until about the late 1930's.

J. Windsor Williams House (F-7-114), 12600 Fingerboard: The two-story Queen Anne style house was built about 1904-1905 by Williams, the owner of a farm supply store which formerly stood on Fingerboard Road east of the boundary of the survey district, the Williams House being the last building on the east end of the district. The house has an irregular facade with a projecting gable section on the west end over a polygonal two-story bay. The three-bay adjoining east section has a narrower gable. A one-story porch with a turned spindle frieze extends across the three-bay part. The windows are 2/2 with louvred shutters. The roof is covered with composition material and the siding is german. A decorative bargeboard edges the soffit of the projecting gable and the face of the gable itself is covered with pressed metal. A two-story rear wing extends behind the house. Immediately behind the wing is a metal windmill which is visible from the road above the ridge of the house. A frame meat house with german siding and a frame garage are also on the property.
