

F-7-12

Samuel T. Simmons House; "Labyrinth"
Urbana vicinity
Private

Ca. 1825; ca. 1900-1920

The Samuel T. Simmons House, sometimes called "Labyrinth" after the tract name, is a two-story stone dwelling with a two-story open porch with a scroll-sawn balustrade on the second level and a stucco-covered north elevation. A one-story brick addition adjoins the west gable end and a concrete block garage is on the east end. The east gable is covered with diamond patterned slate, probably originating from a 19th century quarry formerly located about 1-1/2 miles east of the Simmons House on Slate Quarry Road. The house also has a frame smokehouse and two early 20th century frame barns located on the north side of Linthicum Road. The house was probably originally built by Samuel T. Simmons about 1825 and the slate may have been added in the last quarter of the 19th century. Later alterations also included the enclosure of a two-story porch on the rear elevation. The house is moderately significant for the stonemasonry of the original section and for the unusual feature of the slate siding, an element associated with the Queen Anne style of the late 19th century.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

CONTRIBUTING RESOURCE COUNT: 4

The Samuel T. Simmons House or "Labyrinth" is a two-story stone dwelling built about 1825 with a one-story brick addition on the west gable end and its three remaining associated outbuildings, a frame smokehouse, and two frame barns dating from the early to mid-20th century which are located on the opposite side of Linthicum Road from the dwelling and smokehouse. The buildings are about one mile northeast of the intersection of Linthicum and Thurston Roads near Urbana, Frederick County, Maryland. The property is geographically closer to Hyattstown in Montgomery County, being only about 1/2 mile north of the county boundary. The dates of the buildings are based on architectural details, historical maps, and land records. The house has a plaque, No. 65, from the Frederick County Landmarks Foundation.

The dwelling has a three-bay north elevation which is sheltered by a two-story open porch and the stone front wall is covered with stucco. The porch is integral with the roof pitch and appears to be part of the original design; however, interior access was not possible and examination of the interior attic and plan should be considered to confirm the porch's date. The three irregularly spaced bays have 2/2 sash and doorways in the center bay on each story. The porch has square posts with scroll-sawn brackets and a decorative balustrade on the second level. The roof of the house is covered with composition material and interior end chimneys rise at both ends. The one-story brick addition has a dog-tooth course near the cornice and a modern glass paneled door on the north elevation, flanked by a 2/2 window opening with a gauged brick arch and louvred shutters. The gable end of the stone section above the addition has german siding with two 6/2 windows at the attic level. The west gable end is covered with diamond patterned slate, possibly originating at the 19th century slate quarry, the site of which is located about 1-1/2 miles east of the house on Slate Quarry Road. This may have been added in the last quarter of the 19th century. The wall below the slate covering is stone and a one-story modern concrete block addition incorporating a garage converted to a living room or den adjoins the first story. On the south elevation, a one-story porch has been enclosed and has modern clapboard siding. The roof line of the east gable end reveals that the house probably was built with two-story open porches on both the north and south elevations, with the roof extending over both without a break. The south elevation has been enclosed, with probably two or more building periods, the latest occurring since 1962 when the current owners purchased the property.

Smokehouse: The small frame smokehouse located south of the house has modern vertical siding and a vertical board door in the north elevation. The roof is composition patterned to resemble a slate roof. The smokehouse may date from at least the last quarter of the 19th century, but its interior features were not observed.

Barns: The two frame barns on the north side of the road are apparently early 20th century in origin, based on their exterior siding and roof styles. Both have gambrel roofs and vertical siding. The roofs are corrugated metal and the barn nearest the road has painted "vents".

Prepare both a summary paragraph of significance and a general statement of history and support.

The Samuel T. Simmons House is moderately significant in architecture for the stonemasonry of its structure, although much of it has been concealed by modern stucco and additions. The house has an unusual feature in the patterned slate gable wall on the east elevation, a common example of exterior surface variation associated with the Queen Anne style in the last quarter of the 19th century. The slate probably was obtained at a nearby quarry located about 1-1/2 miles east of the house during the 19th century, although its dates of operation have not yet been identified. The house was probably built about 1825 by Samuel T. Simmons Sr. or Jr., who, with James W. Simmons, purchased 113 acres of the tract "Labyrinth" in that year. James Simmons bought an additional 70-1/2 acres in 1835 and presumably Samuel T. Simmons, Jr. inherited both parcels soon thereafter. S. T. Simmons is shown as the owner on both the 1858 and 1873 maps. A Simmons family cemetery is located near the intersection of Linthicum and Thurston Roads. The property remained in the Simmons family ownership until 1930.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Labyrinth is a one and two and a half story frame, stone and brick structure which faces east from the south side of Linthicum Road near Thurston. It is obvious from the construction that the house was built in several stages.

The one story section of the house is connected on the south side of the main block. It is a small brick building laid in Flemish bond on the east side and common bond on the south and west sides. The use of Flemish bond on the east side suggests that the main entrance may once have been on this side. One modern door with a radiating brick arch is located in the first bay on the west side. The replaced asphalt roof is finished by a stepped brick cornice, with diagonal brick inset.

The main block of the house is two and a half stories; it is constructed of coursed stone which has been stuccoed on the west side and covered by a frame addition on the east and south sides. A two story open porch extends over the main entrance, a modern door located in the second bay, on the west side. The residence is three bays long and two bays wide. A unique slate design in the diamond pattern covers the north gable suggesting that the owners were closely associated with the nearby slate quarry. Most of the windows in the main block are 2/2, the entire house is built on a random stone foundation and the replaced asphalt roof is finished by a plain cornice. A modern one story addition is located on the north side of the main residence.

Two out buildings, a smokehouse and spring house are located east of the building. The spring house, a stone structure is almost in ruins. The smokehouse has a slate roof with a similar pattern to the north gable of the main house.

The house is currently used as a private residence and is in very good condition.
