DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a three story brick attached building four bays wide and three bays in depth with a three story brick "L" shaped wing four bays deep and four smaller bays wide with rear galleries. All brickwork is in common bond, unpainted, and the front facade is faced with a pressed brick. The first floor is fronted by an apartment entrance and a shop area now in a Colonial design which continues across from #100. In the center is a crossbuck door with small panes over panels and on both sides are small paned windows over panels in shop sized sections. This is topped by a boxed cornice with a wooden frieze containing the signplates and eagle placques. Doorway and window areas are framed by fluted pilasters. On the upper floors, two story brick bay windows occupy the end bays with more narrow 1/1 sash windows in the center bays and all are topped by flat brick soldier course arches and have concrete lintels. A belt course of soldier course brickwork extends across the first floor cornice. Side windows are of 2/2 sash and the rear area has 1/1 sash windows with no visible lintels. The metal roof slopes to the rear but the front roofline has a part roof section covered by tiles and projecting from the wall out over the bay windows and center section. This is structurally supported by large, plain brackets with braces and is trimmed by long modillions. The building sets on a low foundation.
