DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The John J. Hafer, Jr. Farm is located on the southwest side of Frostburg Water Company Road approximately .2 mile south of the Pennsylvania-Maryland border. The site consists of a dwelling and a barn.

The house is a frame, two story, gable-roofed building on a concrete foundation. Its basic configuration is an ell-plan that consists of a three bay by two bay main block with a two bay by two bay rear wing. The facade (Seelevation) has a symmetrical, three bay, center door arrangement that is sheltered by a full length, hip-roofed porch on turned post supports. The rear porch, also hip-roofed, is supported by three square posts. Another small, two bay porch is located on the west side of the rear wing. The second floor windows are six over six sash with plain board surrounds and drip boards. The first floor has one over one sash replacements. Additionally, each gable is pierced by a small, four-pane window. Asbestos shingles cover the exterior walls. The roof is clad with asphalt shingles and has boxed rafter ends with a plain board frieze below. A brick chimney is located at the center of the ridgeline on the main block. Another brick chimney emerges from the northeast corner of the rear wing.

The barn is situated northeast of the house by the edge of the road. It is a frame, bank barn on a stone foundation. The gable roof and exterior walls of the building have been covered with corrugated metal and a concrete silo has been added on the east side.

STATEMENT OF SIGNIFICANCE

This house is an example of a common western Maryland type. Houses of this general configuration, a rectangular main block and rear kitchen wing, were constructed in Garrett County from the late nineteenth through the early twentieth centuries.
