**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

The James Werner House is situated in the small town of Finzel, Garrett County's easternmost community.

Although the house has been altered and aluminum siding added, it still maintains the Four-Square House plan - a 2-story, 3 bay by 2 bay square block covered by a pyramidal roof with 2 roof dormers on the front and back.<sup>1</sup>

The frame house rests on a stone, covered with concrete, foundation. The type of original siding is unknown.

The facade faces west and has a central entrance which is covered with a new 1-story aluminum porch.

The south elevation has a hipped roof porch supported by two wooden turned posts at the east end, covering an entrance into the rear of the house.

A small, 1-story, 2 bay wide wing extends from the rear, east elevation, of the house, at the south end.

There is one exterior brick chimney on the north elevation. All windows have been altered; they are 1/1 aluminum sash.

<sup>1</sup>The Four-Square House was described by Thomas Hanchett at the Vernacular Architecture Forum, April 23-26, 1981. This house form is a common type of the Neo-Rationalistic Style-a plain functional style.
