

G-I-C-070

Bert Broadwater Farm
Wilton
Private

ca. 1900

The Bert Broadwater Farm is composed of a plank dwelling and a frame and log barn.

The house is a two story, gable-roofed, building of vertical plank construction on a foundation of uncoursed rubble stone. Its basic configuration is a four bay by one bay, center stair plan with both facade and rear porches. The facade has two center entrances, and like the other elevations, is lit by 2/2 sash windows with pedimented lintels. Two brick stove chimneys rise through the center of the house on either side of the staircase.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Bert Broadwater Farm is located on the west side of Pea Ridge Road approximately 2 miles south of Avilton-Lonaconing Road. The farm, which includes a dwelling and a frame and log barn, is situated in a hollow near the crest of Pea Ridge.

The house is a two story, gable-roofed building of vertical plank construction. Its basic configuration is a four bay by one bay unit with both facade and rear porches. The facade is symmetrically arranged. The center two of its four bays are occupied by doors and the second floor has only two bays. The one story shed wing on the rear houses a bathroom and was added ca. 1972 when plumbing and electricity were installed in the house.

The building rests on an uncoursed, rubble stone foundation topped by log sills left in the round (bark is left on the logs). The floor joists, also log, are hewn on top. The house is provided with a full basement that is accessible through an opening under the rear porch (northwest elevation). It has whitewashed rubble stone walls and a dirt floor. Three potato bins occupy the southeast wall. Two layers of vertical plank, each approximately one inch thick, compose the upper walls of the building.

Two over two sash windows with plain board surrounds and pedimented window heads light the house on all elevations. The only change in fenestration is on the first floor northeast endwall where a single pane, fixed window replaces the original two over two sash. A small rectangular window pierces the northeast gable. The exterior walls are sheathed in asphalt siding.

The roof is covered with corrugated metal and has a plain box cornice. Two brick stove chimneys are located on the ridgeline near the center.

The interior is divided into two rooms of equal size on both floors by an enclosed, eleven tread stairway. The first floor northeast room is a kitchen and the southwest room is a parlor. The two second floor rooms are bedrooms. The walls were originally wallpapered directly over the plank, but have since been covered with plywood paneling. The window surrounds are similar to those on the exterior: plain board with pedimented window heads. Random width board from three to five inches is used for flooring.

The barn is located northeast of the house near the road. It is a frame, gable-roofed bank barn with a forebay on its northwest elevation and a log pen in its northeast end. The log pen is enclosed in the frame portion of the building and extends from the ground level up through the first floor. It is constructed of V-notched, unhewn logs with large spaces between that have not been chinked. The lower level of the frame portion is built of hewn timbers mortise and tenoned together. The floor joists are unhewn logs. The upper portion is machine sawn post and rail construction covered by vertical board siding. The building rests on a dry laid stone foundation.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This typical vertical plank constructed house was built by Bert Boradwater who died in 1970 at the age of 94. He raised ten children here. His chief farm products were oats, potatoes and corn.

The bank barn is of special note: it features a single V-notched log pen in the northeast end.
