

ABSTRACT

G-IIB-255

MASON-DIXON LINE: MILESTONE NO. ---(210) 1767 (mound), 1902 (monument)
Strawn (formerly Oakton), Maryland/Pennsylvania vicinity
Public/private

Milestone No. ---(210) and the small mound of earth and stones on the western slope of Winding Ridge mark Mason and Dixon's 188th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland. It is in very good condition, unaltered, firmly in place; measures 10 inches square by about 14 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when this site was originally surveyed and marked with a cairn), and 1902 on the west side (when this new monument was added to the center of the remains of the cairn during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary). The mound, also in very good condition, measures an estimated 7 feet in diameter by about 1½ feet high at the center, and is covered with weeds and ferns. On the national and state levels, No. ---(210) and the mound are significant primarily as being among the thematic group series of some 248 markers still visually defining the West Line. Locally, as among the some 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(210) and the small mound of earth and stones on the western slope of Winding Ridge mark Mason and Dixon's 188th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. The monument is a very plain dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland. It is in very good condition, unaltered, firmly in place; measures 10 inches square by about 14 inches above the mound; and is embellished only by the capital letter P on the north side, facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when this site was originally surveyed and marked with a cairn), and 1902 on the west side (when this new monument was added to the center of the remains of the cairn during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary). The mound, also in very good condition, measures roughly about 7 feet in diameter by about 1½ feet high in the center, and is covered by weeds and ferns.

The area here is the ^{remote}/~~densely~~ forested western slope of one of the many mountain tops comprising Winding Ridge. The site is within Election District 2 of Garrett County, MD, and Addison Township of Somerset County, PA; about 1½ miles due west of the small settlement of Strawn (formerly Oakton), MD/PA, and where US 40 crosses the Line; at a point about "68 chains from the summit" (according to the 1900-03 Resurvey, p. 99), about 36 feet east of an old trail leading into the woods on the south side, ^{in a ferny shoulder} at the south edge of a wide east-west clearing serving the pipelines and electrical lines the edge of maintenance ditching (which appears to have slightly altered the mound on the north side). It cannot be seen from any road, nor easily from closeby, and seems protected by the remoteness and obscurity of site, but subject to further erosion by the proximity of the ditching ^{and} runoff.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill to visually reestablish the Maryland-Pennsylvania boundary, is of a white fine-grained marble called saccharoidal dolomite of magnesian limestone; was originally cut about 10 inches square by about 4½ feet long, intended for setting about 1½ feet above ground with the remaining 3 feet for setting into the ground, thus eliminating the need for a concrete foundation. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are clear and intact, although there is a large chip out of the top northeast corner ^{and} small chips at the other top corners and ^{along the} vertical edges

CONTINUE ON SEPARATE SHEET IF NECESSARY (see Thematic Group NR nomination form for full descriptions of the 1902 monuments and the 1900-03 Resurvey method of setting them into existing Mason and Dixon mounds)
