

**INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM**

Property/District Name: Paul B. and Deanna K. Everly House Survey Number: G-IV-A-283

Project: US 219/Oakland Vicinity Improvement Project Agency: MSHA

Site visit by MHT Staff: No Yes Name _____ Date _____

Eligibility recommended Eligibility **not** recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

The Paul B. and Deanna K. Everly House, built *circa* 1900, relates to the nineteenth and early twentieth-century development of the Mountain Lake Park region as a resort area. Mountain Lake Park was founded in 1881 as a Christian resort community modeled after the Chautauquas begun in New York state in the late nineteenth century. Situated a short distance east of Oakland and adjacent to the B & O rail line, Mountain Lake Park in the late nineteenth and early twentieth centuries combined religious, educational, and cultural activities into a wholesome retreat. But unlike Deer Park and Oakland where the B & O had built large lodgings for its wealthy patrons, Mountain Lake Park emphasized more modest, privately-owned family units, and thus smaller, single-family dwellings predominated. The Everly house is typical of much of the area's late nineteenth and early-twentieth-century architecture.

Research has not identified any associations with the lives of persons significant to the Oakland area's past or with events that have contributed significantly to broad patterns of the area's historical development. The architecture does not represent a particularly distinctive type, period, or method of construction, nor does it represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction. This resource has not yet yielded and is not likely to yield significant information important in history or prehistory.

Document on the property/district is presented in: Historic Structures Inventory and Determination of Eligibility Report

Everly House
G-IV-A-~~18~~ 283
510 E Street
Oakland vicinity
Circa 1990
Private

This is a two-story, three-by-two-bay, gable-roofed T-plan frame dwelling with a front-facing cross-gable, three one-story shed-roofed additions, and an open-sided hip-roofed front porch. The house faces east and occupies a mostly open, gently sloping lot about two miles east-southeast of Oakland.

The William J. and Patricia A. Welch House, built *circa* 1900, relates to the late nineteenth and early twentieth-century development of the Mountain Lake Park region as a resort area. Unlike Deer Park and Oakland where the B & O had built large lodgings for its wealthy patrons, Mountain Lake Park emphasized more modest, privately-owned family units, and thus smaller, single-family dwellings predominated. The Welch house is typical of much of the area's early-twentieth-century architecture.

7. Description

Inventory No. ~~G-IV-A-181~~

Condition

<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated
<input checked="" type="checkbox"/> good	<input type="checkbox"/> ruins
<input type="checkbox"/> fair	<input type="checkbox"/> altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The foundation encloses a full cellar and is constructed of a mixture of materials including concrete block on the north elevation, roughly dressed stone on the southeast corner, and poured concrete under the rear addition. The walls are sheathed in white vinyl siding. The building is topped with an asphalt-shingled gable roof finished with a wooden eave and a boxed cornice with partial returns. Rectangular metal louvers near the gable peaks ventilate the attic. A single interior brick chimney with a corbelled top rises near the junction between the main block and the rear ell.

Windows are primarily single, one-over-one, double-hung wooden sash finished with vinyl surrounds. A vinyl hopper window lights the rear elevation, and several metal jalousie windows light one of the shed-roofed rear additions. Fixed vinyl shutters ornament almost all of the window openings. The front entrance is fitted with modern paneled door. A side entrance which leads into the east entrance of the northernmost leanto addition contains a paneled wooden door with a four-light upper section. Vinyl siding covers all door surrounds.

An open-sided hip-roofed porch spans the entire front elevation. This porch rests on a concrete block foundation and includes a wooden deck and ceiling, a vinyl-clad enclosed balustrade topped with a wooden rail, and turned wooden posts and pilasters. Asphalt shingles sheath the roof over this porch. The three one-story, shed-roofed rear additions flank the sides of the two-story rear ell. Two of the additions extend from the north elevation of this ell. The first addition was built on a poured concrete foundation, while the later one was constructed on a foundation of concrete block. The south addition also rests on a concrete block foundation. All three additions are sheathed in vinyl siding and topped with asphalt-shingled roofs.

No outbuildings stand on the property. A straight concrete sidewalk leads from Oakland Drive to the front porch; a second concrete sidewalk perpendicular to the first one links the front walk to a crushed stone driveway, which runs along the north side of the house. Except for a few isolated shade trees, the lot is mostly flat and open. The house, which is presently used as a rental property, is now occupied and remains in good condition. Although much of its original massing is intact, the extensive application of vinyl siding has compromised its integrity.
