Eligibility recommended Eligibility **not** recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

The Ruth E. Mithcum House, with its core built *circa* 1920, relates to the continued twentieth-century development of the Mountain Lake Park area as a year-round residential community. Mountain Lake Park was founded in 1881 as a Christian resort community modeled after the Chautauquas begun in New York state in the late nineteenth century. Situated a short distance east of Oakland and adjacent to the B & O rail line, Mountain Lake Park in the late nineteenth and early twentieth centuries combined religious, educational, and cultural activities into a wholesome retreat. But unlike Deer Park and Oakland where the B & O had built large lodgings for its wealthy patrons, Mountain Lake Park emphasized modest, privately-owned family units, and thus small, single-family dwellings predominated. During the mid-twentieth century, this resort community's emphasis on such small, single-family houses permitted it to convert easily from a summer resort to a year-round residential neighborhood. In 1941 Mountain Lake Park contained over 500 residents. Although the Mithcum house has lost its integrity through repeated remodelings, the surviving architectural evidence suggests that its core was once typical of the area's early-twentieth-century architecture.

Research has not identified any associations with the lives of persons significant to the Oakland area's past or with events that have contributed significantly to broad patterns of the area's historical development. The architecture does not represent a particularly distinctive type, period, or method of construction, nor does it represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction. This resource has not yet yielded and is not likely to yield significant information important in history or prehistory.

Document on the property/district is presented in: Historic Structures Inventory and Determination of Eligibility Report

Ruth E. Mitchum House
G-IV-A-181 286
17 Hazel Glade Drive
Mountain Lake Park Vicinity
Circa 1920
Private

This is a two-story, two-bay, mansard-roofed frame dwelling with curious massing resulting from multiple changes. Its unusual shape probably resulted from the raising of the roof over the main block and the absorption of a much smaller one-story core into the present building. The house now features two hip-roofed porches, one of which has been fully enclosed, a two-story shed-roofed addition, and a one-story shed-roofed addition. It is built with a mixed rusticated, rockfaced, and plain concrete block foundation, aluminum-sided walls, and an asphalt-shingled mansard roof. Other features include three masonry chimney stacks, single and paired one-over-one, double-hung wooden sash windows with wood and aluminum trim, and solid wood or wood and glass doors with wood or aluminum surrounds. A ruinous metal shed also stands on the property. The house is located on a partially wooded sloping site on Hazel Glade Drive in Mountain Lake Park, not far from the intersection of Hazel Glade and Oak Street, about one-and-one-half miles southeast of Oakland.

The Ruth E. Mithcum House, with its core built *circa* 1920, relates to the continued twentieth-century development of the Mountain Lake Park area as a year-round residential community. Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

This is a two-story, two-bay, mansard-roofed frame dwelling with curious massing. Its unusual shape probably resulted from the raising of the roof over the main block and the absorption of a much smaller one-story core into the present building. The house now features two hip-roofed porches, one of which has been fully enclosed, a two-story shed-roofed addition, and a one-story shed-roofed addition. The building faces east. It is located on a partially wooded sloping site on Hazel Glade Drive in Mountain Lake Park, not far from the intersection of Hazel Glade and Oak Street, about one-and-one-half miles southeast of Oakland.

The squarish main block of the house is built on a rusticated concrete block foundation that encloses a full cellar. The west addition rests on a rockfaced concrete block foundation, while the addition on the east side of the main block is built on a plain concrete block base. The walls are clad in cream-colored aluminum siding, and the main block is topped with a brown asphalt-shingled mansard roof with almost no projection at the eaves. By contrast, the roofs on the two one-story hip-roofed porches are finished with their original projecting rafter feet. Three masonry chimney stacks rise above the roofline. The largest is a stone exterior stack with a protruding clay flue tile rising on the south elevation; this stack was built around an earlier brick chimney stack which still protrudes from its core. A second exterior stack rises on the west elevation of the one-story shed-roofed addition; this chimney is built of concrete block. Finally, a corbelled square brick interior chimney rises from the roof peak at the center of the main block.

Windows consist of a mixture of single and paired one-over-one, double-hung wooden sash of varying sizes and finished with a mixture of wood and aluminum surrounds. Several horizontal sliding sash windows are also present. A single oversized one-light focal window lights the south elevation at first floor level, and several fixed two- and three-light windows light the cellar. The windows in the mansard roof at second-floor level are fitted with projecting asphalt-shingled awnings supported by scroll-cut wooden brackets. The primary entrance, located on the west elevation, contains a wooden door lit by three graduated rectangular glass panes. The cellar entrance, on this same elevation, contains a solid wooden door with wood surrounds. A rear entrance, on the opposite elevation underneath the overhanging porch roof, contains a wooden half-glass door; this opening is finished with aluminum surrounds.

The front porch is now fully enclosed with aluminum siding to match the rest of the house. The rear porch consists of a rockfaced concrete block foundation, a wooden deck encircled by a wood slatted balustrade and rail, four-by-four wooden posts, and a beaded wooden ceiling. A set of concrete steps flanked by an iron handrail leads up to the level of the porch deck. The two shed-roofed additions are clad in aluminum siding and topped with asphalt-shingled shed roofs.

A ruinous one-story gable-roofed prefabricated metal shed with an attached one-story particle board leanto stands to the southwest. This building is covered with a rolled asphalt roof. The house is squarely oriented to Hazel Glade Drive, which passes directly in front of it. A short, squarish gravel parking area set perpendicular to the road is located near the southeast corner of the house. A concrete sidewalk runs from the road up to the front entrance. The property which the house occupies is mostly open in front but more heavily wooded with a mixture of deciduous and coniferous trees to the rear. Although the house is currently occupied and in fair condition, it retains almost no integrity due to the multiple changes it has undergone.

8. Significance
