Chestnut Grove M.E. Church South
Bloomington
Private

1902

Chestnut Grove M.E. Church South is a frame, one story, gable-roofed building. A few alterations to the structure were made in 1957, but the original form of the structure remains intact. Its basic configuration is a four bay rectangular plan with a vestibule at its southeast endwall and a one story, cement block, shed-roofed addition on its southwest side. The windows are elongated 4/2 sash with pointed window heads and green/white stained glass panes.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Chestnut Grove M. E. Church South is located on the west side of Chestnut Grove Road approximately 1.8 miles south of Maryland Route 135. The building is situated parallel to the road with its facade pointing southeast.

The church, erected in 1902, is a frame, one story, gable-roofed building. A few alterations to the structure were made in 1957, but the original form of the structure remains intact. Its basic configuration is a four bay, rectangular plan with a vestibule at its southeast endwall and a one story cement block shed addition on its southwest side.

A datestone is located at the eastern corner of the foundation which reads: J.H.S., D.D.-M.E. Church South, 1902, In God We Trust, with an additional inscription, Rebuilt 1957.

The windows are elongated four over two sash, with pointed window heads and green/white stained glass panes. A purple/white stained glass, diamond-shaped window is located on the northwest endwall (altar end).

The roof is covered with corrugated metal and has boxed rafter ends. An interior brick chimney is located at the center of the northeast wall and an exterior cement block chimney is located on the southwest endwall.

The original foundation has been replaced with concrete blocks and the exterior walls have been covered with asbestos shingles.

The vestibule, which has an extension on its southwest side, has a double door entrance with a three pane transom light. Above the vestibule is a square, gable roofed bellfry with a short hexagonal spire and two louvered openings: The siding on the bellfry is a type of German siding with a groove in the center.

A recent double, cement block privy is located northwest of the church.
