

**INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM**

Property/District Name: Brian D. Hinebaugh House House Survey Number: G-VI-A-064

Project: US 219/Oakland Vicinity Improvement Project Agency: MSHA

Site visit by MHT Staff: No Yes Name _____ Date _____

Eligibility recommended Eligibility not recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

The Brian D. Hinebaugh House, built *circa* 1940, relates to the continued expansion and settlement of the Oakland area in the mid-twentieth century. The development of summer vacation resorts and hotels in the Oakland area in the late nineteenth century had helped to stimulate settlement of the region. Although no longer as prominent a resort in the mid-twentieth century, Oakland still remained an important local mercantile and community center, and continued its growth throughout this period. Residential development typically occurred along pre-existing road networks. The Hinebaugh house typifies much of the region's mid-twentieth-century residential architecture.

Research has not identified any associations with the lives of persons significant to the Oakland area's past or with events that have contributed significantly to broad patterns of the area's historical development. The architecture does not represent a particularly distinctive type, period, or method of construction, nor does it represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction. This resource has not yet yielded and is not likely to yield significant information important in history or prehistory.

Document on the property/district is presented in: Historic Structures Inventory and Determination of Eligibility Report

(KCI/MSHA 1997)

Hinebaugh House
G-VI-A-064
312 Dawson Avenue
Oakland vicinity
Circa 1940
Private

This is a one-story, *circa* 1940, one-by-two-bay, gable-roofed, gable-fronted frame dwelling with an open-sided hip-roofed front porch and an open-sided shed-roofed rear porch. It includes a plain and rockfaced concrete block foundation, wooden sheathing, an asphalt-shingled gable roof, and an exterior metal stovepipe. Windows are mostly one-over-one sliding or fixed-light sash with wooden trim. Door openings contain wood or wood and glass doors with wooden surrounds. Two frame storage sheds stand on the lot. The building faces southeast and occupies a flat site that backs onto a wooded area just northeast of Oakland.

7. Description

Inventory No. G-VI-A-064

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

This is a one-story, *circa* 1940, one-by-two-bay, gable-roofed, gable-fronted frame dwelling with an open-sided hip-roofed front porch and an open-sided shed-roofed rear porch. The building faces southeast and occupies a flat site that backs onto a wooded area just northeast of Oakland.

The house was built in two episodes. The larger front section is built on a rockfaced concrete block foundation that apparently encloses a full cellar, while the rear section rests on a foundation of plain concrete block. The building is presently sheathed in vertically grooved wood paneling and topped with an asphalt-shingled gable roof finished with a wooden eave. When the house was surveyed, it was painted an ochre color with dark brown trim. A single exterior metal stovepipe rises along the northeast elevation, and rectangular metal louvers ventilate the attic near the roof peak.

Windows consist mostly of single one-over-one sliding or fixed-light sash finished with molded wood surrounds and sills. Several three-light fixed sash windows light the cellar. The front door opening, which is centered on the southeast elevation, is fitted with a wood and glass-paned door finished with a wooden surround. A rear entrance, located on the opposite elevation, contains a similar door and surround. A cellar bulkhead entrance located on the southwest elevation contains a wooden door.

The front porch consists of an open astroturf-covered deck supported on four-by-four wooden posts that have been partially concealed beneath a wooden lattice skirt. The porch is covered with an asphalt-shingled gable roof supported on four-by-four wooden posts. A wood lattice privacy screen supported on a balustrade of widely-spaced vertical wooden boards wraps around the three open sides of the porch. The porch ceiling is clad in particle board. Two sets of concrete steps lead up to the level of the porch deck at either end. An open-sided porch on the northwest or rear side of the building consists of an open wooden deck supported on piers that have been partially concealed beneath a wood lattice skirt. This rear porch is protected by a metal-covered shed roof and aluminum-clad ceiling supported by scrolled metal posts. A set of open wooden ladder steps leads from the rear yard up to the deck.

A one-story gable-roofed gable-entry frame storage shed stands toward the rear of the property. This building is clad in aluminum siding and is topped with an asphalt-shingled roof. A wooden door on the southeast gable provides access to the interior. Windows consist of a mixture of six-light and one-light fixed sash. An open wooden stoop bordered by a vertically-slatted wooden railing leads up to the threshold. A second frame storage shed stands nearby. This building is a one-story building clad in plywood and topped with a gable roof.

A driveway runs perpendicular to Dawson Avenue along the southwest elevation of the house. A grape arbor stands just to the north. A line of conifers defines the northeastern property boundary, while a wooden fence runs along the rear of the lot and parallel to Dawson Avenue. The house is presently occupied and remains in good condition.

8. Significance
