c. 1800

Wilson's Mill is the most important building in the Wilson's Mill complex, one of the oldest and most complete mill groups on Deer Creek. Mills such as this were important factors in the settlement of the area and the growth of industry in the county. Possibly built as early as 1760, the stone structure has the dates 1810, 1825, and 1845 carved into its walls and rafters.

## DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Wilson's Mill is a two-and-a-half story stone industrial building dating from the early 19th century and located on the north bank of Deer Creek just west of the Darlington Road (MD 161) bridge in Harford County, Maryland. The millrace runs from the west to the mill, turning to parallel the west wall of the building and running back to the Creek.

The mill was built of uncoursed rubble stone with large quoins and a slate gable roof. The upper portion of the gables is frame with horizontal siding. On the west gable is a clock face; the clock (installation date unknown) is not presently operating, but is run by a weight and pulley system inside the mill. A board and batten frame shed was added to the northwest side of the stone block at an unknown date. The stone walls are stabilized by iron tie rods finished on the exterior in rosettes and ogee curves. Windows and doors are functionally placed in an irregular pattern. Most are six-over-six sash. The main entrance in the north elevation is a Dutch door with tongue and groove planks.

The interior of the mill retains its hand-hewn structural beams. The shed contains the miller's office with the original desk and chair. The gristmill machinery was removed and stored in the third floor loft in 1931. A water-powered electrical generator was installed and remains in place, but is no longer used. The current owner plans to restore the generator and return it to operation.

The mill dam and the head of the mill race are located about one-quarter mile upstream. The dam was rebuilt in 1932 by Francis J. Stokes, then owner of the mill property.

The Maryland Historical Trust obtained a perpetual easement in 1976 on the exterior of all buildings, the interior of the mill, and its machinery.

**STATEMENT OF SIGNIFICANCE**

Wilson's Mill is the most important building in the Wilson's Mill complex, one of the oldest and most complete mill groups on Deer Creek. Mills such as this were important factors in the settlement of the area and the growth of industry in the county.

HISTORY AND SUPPORT

Wilson's Mill stands on the tract "Parker's Chance" acquired in 1743 by Nathan Rigbie; his will mentions a mill and dam in 1783. One source states the present mill was built in 1760.<sup>1</sup> The mill does not appear on the 1795 map of Harford County. It passed to Joseph Brinton in 1802, to Reuben Stump in 1821, to Rachel Price in 1856, and into the Wilson family through her second husband, William Wilson, and thence to their son, David Wilson, in 1866. Wilson's Mill appears near the D.E. Wilson house on the 1858 Jennings and Herrick map.

The 1880 census listed David E. Wilson's custom mill worth \$6000 with five employees, three run of stones, and 500 bu/diem maximum. A 10-foot fall on Deer Creek drove a 25 hp, 3-foot turbine at 120 rpm. Its output was 250 bbl flour, 26 tons meal, 9.7 tons feed, and 1 ton hominy (\$3000). The sawmill, worth \$1000, had two employees and one each circular and Muley saws. The same fall on Deer Creek drove a 30 hp, 3-foot turbine at 200 rpm to cut 200,000 ft. (\$4000). The mill is also listed under Glenville in the 1887 state directory.

D. Gilpin Wilson operated the mill from 1903 to 1931. Mr. and Mrs. Francis J. Stokes acquired the mill in 1931 and used it to house an electrical generator for the estate. In spite of its claims to age, the date 1810 is chiseled into the wall. A stone in the exterior north elevation bears the date 1845 and an interior rafter has an 1825 date.

<sup>1</sup> Harford County Directory, 1953, p. 317.

For further information on the Wilson's Mill complex, see Wilson's Mill House (HA-10), Wilson's Mill Miller's House (HA-25), and Wilson's Mill Tenant House (HA-392).

CONTINUATION SHEET

8. Significance (continued)

Samuel Mason, in Historical Sketches of Harford County, Maryland, gives the carved inscriptions on Wilson's Mill as: "S.B. Silver, 1817; E.R., 1822; and C.R. Smith, 1837". C.R. Smith was the miller in 1837 under the ownership of Reuben Stump.

William Stump Forwood, in his "Homes on Deer Creek" series in the Aegis-Intelligencer in 1879-80, referred to Wilson's Mill as "anciently called Alfred Mills". The source of this name is unknown.

The main route between Darlington, Glenville, and Harmony Church ran along the present access road between the Mill and the Mill House on the hill. According to Mason's book, the original covered bridge crossing the Deer Creek stood opposite the Miller's House and was washed away in a freshet in 1865. The second covered bridge was built at another location east of the present bridge. (See HA-393 and 394.)

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Stone mill is still operated by ~~water power~~ <sup>an undershot</sup> water wheel. ~~down stream of Deer Creek, this first mill is~~  
 It is two bays by three with the entrance to the north; the slate roofline runs north-south.

Doors are "Dutch" doors, batten. Structural beams are hand-laid, ~~with the mill floorings~~ wide plank flooring. Much of the original machinery remains, although Mr Stokes added an electric generator to supply power for the farm as a project for a retired industrialist.

The mill-race, is intact, ~~and~~ flows from the dam which was rebuilt in 1932 upstream on Deer Creek.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

(see sheet above)

~~Three of ten of the oldest mills on record in Hartford County, this was built between 1743 and 1782 which Nathan Pigeon II owned the land between 1743 and 1782. Although Col. Nathan Pigeon is on record as having sold the equipment of his mill in 1782, it was~~

altered by its new owner, F. J. Stokes of Philadelphia to generate electricity for his country place. The original gristmill-stones are in place, however, and the building retains its simple appearance.

An Educational ~~use~~ interest in this property might include its historic service to the farmers of the area as well as its scientific interest in the present use of its water power, the generators.

One of the oldest mills in Harford County, the date of its construction is unknown, but it is an item in the will of its owner in 1783, Nathan Regbie II. This tract, called "Parker's Chance" was patented by George Parker in 1684 and deeded to Nathan Regbie II in 1743. Col Nathan Regbie, father of the owner is reported to have supplied the Continental Army from his mill during the war. No other mill is known. Perhaps father and son considered it to be jointly owned. His records tends to corroborate the ~~the~~ an earlier date for the mill.

In continuous use thereafter until 1931.....
