

ABSTRACT

HA-1542

MASON-DIXON LINE: MILESTONE NO. 24(26)

Slate Hill, Pennsylvania vicinity

Public/private

1766

Milestone No. 24(26) marks Mason and Dixon's 24th mile west of the initial stone at the northeast corner of Maryland, the beginning point of their 230.228-mile West Line, the longest run and marked to define the boundary between the English provinces of Maryland and Pennsylvania. The monument, originally set in 1766, is an embellished oolitic limestone post quarried and carved in England and measures about 12" square by about 4½' long, cut to stand about 3' above ground. Reset in 1902, it now stands about 1½' high, is in good condition, with the capital letters P on the north (Pennsylvania) side and M on the south (Maryland) side clear and intact, as is most of the fluting. On the federal and state levels, it is primarily significant, not only as one of the series of original monuments marking the boundary

known as the Mason-Dixon Line since Civil War times, but also for the settlement of longstanding provincial boundary disputes and the innovative survey methods utilized by Mason and Dixon a century earlier. Locally, it is significant as one of the diminishing number of objects and structures visually identifiable with our colonial and Civil War heritage.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. 24(26) marks Mason and Dixon's 24th horizontal mile west of the initial stone at the northeast corner of Maryland, the beginning point of their West Line. It is an original milestone, set in 1766 and reset in 1902, of oolitic limestone quarried and carved in England, measuring about 12" square with a low pyramidal top, ^{and} now standing about 1½' above ground. It is in good condition, unaltered, and remains at its original site. Most of the embellishments are clear, but corners and edges are chipped, particularly the top northeast and southwest corners, and the top planes are weatherworn and with several deep pits. The site is protected by its remoteness, at the top of a high ^{wooded} bluff overlooking the Susquehanna River off to the east.

The area here is rolling, high, wooded lands, at the east ^{a few scattered} edge of farms, most still belonging to the Cooper family, among the first to settle here. The site is about 2¾ miles southeast of the scattered settlement of Slate Hill, Pennsylvania; about 4 miles northeast of the scattered settlement of Prospect, Maryland; off the east end of the junction of Tabernacle and North Cooper roads; about 2500' east-northeast of the old abandoned Cooper farm buildings; in a deciduous woods on the high bluff just west of the Susquehanna River. It cannot be seen from any road, nor easily from nearby, and is protected by this remoteness.

The monument, originally cut to stand about 3' above ground, was reset at the time of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary surrounded by a concrete collar below ground. It ^{and with pits} to stand about 1½' high, and remains in place firmly, though weathered/on top and with several large chips out of the top northeast and southwest corners. The capital letters P on the north (Pennsylvania) side and M on the south (Maryland) side are intact and clear; most fluting, margins and circle panels remain, though all surfaces are weathered and all edges nicked. The top planes are still discernible and rise about 1½" to a centered apex.

(see Thematic Group National Register nomination form for additional descriptions of the original Mason and Dixon monuments and 1900-03 Resurvey method of resetting them)

SURVEYORS

STATEMENT OF SIGNIFICANCE

There are 24 original crownstones and 111 milestones of 1766-67 still standing along Mason and Dixon's West Line, set at mile intervals through the 132nd mile and including 12 added in 1902 beyond that point (3 crownstones, 9 milestones) set at irregular intervals. Milestone No. 24(26) is primarily significant as one of this original series, which with some additional 113 monuments and mounds represent a boundary of national and state importance, not only for its symbolism since Civil War times, but for its settlement of longstanding provincial boundary disputes and ^{the} innovative survey methods utilized by Mason and Dixon a century earlier. Individually, and as one of 17 original monuments (3 crownstones, 14 milestones) still standing along the present Harford/York county boundary, it is also significant locally as one of a diminishing number of objects and structures visually identifiable with our colonial and Civil War heritage.
