DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Rock Run Mill, located on the east side of Stafford Road south of its intersection with Rock Run Road, is an impressive three-storey heavily quoined fieldstone structure constructed in 1794. Iron caps are visible on the north and south ends of the building holding fast the iron supports that run through the north-south axis similar supports sun east to west. The gable roof is wood shingled with simple rake boards and a boxed cornice. A corbel capped brick chimney rises from the northwest corner of the structure.

The three-bay west facade is defined by a recessed central vertical boarded door flanked by window openings. The door surround is pegged and the strap hinges appear to be its original hardware. Window openings have been closed by vertical boarded shutters also displaying heavy strap hinges. Similarly treated window openings mark the corresponding openings of the second and thirs storeys.

The east facade is four bays wide. Two entrances are located on this facade: the first, at basement level in the second bay from the southeast corner, the second, on the first storey in the third bay from the southeast corner. Small cellar windows are found in the third and fourth bays respectively from the southeast corner. Vertical-boarded shuttered windows flank the door of the first storey. Similarly treated windows define the openings of the second and third storeys.

The north facade is two bays wide with vertical-boarded shuttered windows marking these openings on the first, second and third storeys. The tympanum area has been weatherboarded. Three 6/6 sashed windows, triangularly placed, punctuate this area.

The south gable facade also has been weatherboarded at the attic level. Three 6/6 sashed windows also appear in this area. The wheel constructed by the Fitz Water Wheel Company, Hanover, Pa., is seated in a stone moat-like basin that runs around the east facade of the mill. The axle stem connection into the wall is ringed with a brick arch immediately to the east is another bricked-in opening where a log was located that was turned by the inner gear of the water wheel.

Across and paralleling Stafford Road is the mill race which terminates at a sluice gate. A fieldstone pier support system carries the water over the road in a metal pipe. Originally this pipe was a wooden trough.

Some interesting inscriptions are chiselled into the stone walls of the mill. Although most of them are illegible, several can still be diciphered: "J. J. Wm," "W. G. 1805" and "C. R. Smith 1801."

STATEMENT OF SIGNIFICANCE

The following information was collected by Paul Penrod in 1976. The attached title search also was executed by Penrod.

"One of the oldest mills still standing in Harford County, Rock Run Mill is actually the second mill to be located in this area. The first one stood one-half mile above the present structure and was owned by the Giles family.

Jacob Giles had owned the tract where both mills had been located, a 712-acre portion of Land of Promise. John Stump III, who already owned the Stafford Mill, obtained some of Giles land and constructed the existing mill in 1794. He went onto become one of the wealthiest men in Maryland, although its prominence was somewhat dimmed as it was suspected that he sold flour to the British during the War of 1812.

In 1801, Stump sold a half-interest in the mill to John Carter who soon died in 1805 with the interest reverting to John Stump. After his death in 1816, Ann Archer, one of the seven Stump children, took possession of the mill, leasing it out to various contractors until her death in 1871. Henry W. Archer, her son, then became the trustee and he and a Joseph C. Parker operated the mill for the profit of the other Archer heirs.

The floor milling operation continued into the 20th century and did not cease until after World War II, under the ownership of John M. Macklem and W. W. Wilkinson, thus giving the structure a commercial career spanning three centuries."

In 1961, Marie Wilkinson Turcotte and Henry Turcotte sold two parcels, measuring 1.74 and 30.54 acres, to the Maryland Department of Forests and Parks.

Will
TLA 24 219

These same two plots were left to the Turcottes by this will after the deaths of Wilfred W. Wilkinson in 1953 and Maude E. Wilkinson in 1958.

DGW 213 317

1. Lavinia Macklem sold the 33-acre tract of the Rock Run Mill to Wilfred W. Wilkinson in 1929.

WSF 113 454

In 1904, William S. Archer and Henry W. Archer, trustees, sold the 33 acres to John M. Macklem. The deed states that this tract was part of the Land of Promise, which was owned by Nathaniel Giles until his death in 1775, and which was then sold in 1797 by Elizabeth Giles to John Stump of Stafford.

GCB 282 219

2. In 1943, Elizabeth Esley sold 1 1/2 acres to Wilfred W. Wilkinson.

JAR 160 453

William S. Archer, surviving executor, sold the plot to Elizabeth Esley in 1918.

ALJ 38 84

Henry W. Archer, Jr., was named as a trustee after a court case involving Henry W. Archer and Thomas W. Maddock. In 1878, the trustee sold Henry W. Archer the Rock Run Mill property of 50 acres as well as an adjacent farm of 132 acres, three roods and 36 perches. The trustees were holding the property after the death of Ann Archer, daughter of John Stump. Ann had been left considerable holdings including the Rock Run Mill and the old Carter house after John Stump's death in 1816. Ann died in 1871, leaving the property to her son, Henry W. Archer, as executor.

HD Z 373

Cassandra Stump, widow of John Stump, conveyed the mill property to John and Ann Archer in 1816. They also received the tract where Lapidum was laid out.

HD T 297

Samuel Carter, son of John Carter, sold his interest in the mill and the house to John Stump. The tract measured 40 acres in this 1808 transaction.

JLG P 390

In 1801, John Stump sold to John Carter a half-interest in the mill property that was once part of the Land of Promise.

JLG N 376

In 1797, Elizabeth Giles, daughter of Nathaniel Giles, sold 256 acres to John Stump, Jr.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is an imposing two and one-half story building with the main entrance facing the Stafford Road on the west. It is of uncoursed rubble stone with quoined corners. Iron caps are visible on the northern and southern ends of the structure, holding fast the iron supports that run through the north-south axis. Such supports also run from east to west and are visibly capped. The bays are three by two and the windows are 6 X 6, although the three attic windows on the north and the south ends are three-paned. Most of the lower windows have new board-and-batten shutters on them. The doors are board-and-batten frame and are of older vintage, retaining some of the original hardware. One is on the west side, a double door recessed in a wood inset with a 2 X 2 window. Two entrances are on the eastern side, one in the cellar and one on the first floor. The cellar is exposed on this eastern facade, where there some small slit windows. The roof is a gable flank and is covered with wood shingles, the eaves possibly being original. A single brick chimney stands on the northwest corner of the roof on the inside end. Some interesting inscriptions are chiselled onto the stone wall. Most of them are still too worn to read, but there are a few legible ones, such as "J. J. Wm", "W. G. 1805" and "C. R. Smith 1801".

Across the road from the mill and paralleling the road is the mill race that terminates at a sluice and a stone-pillared overshot pipe that crosses the road. The wheel, on the southern side of the building, is seated in a stone moat-like basin that runs around the eastern facade of the mill and originally emptied into the Susquehanna River. A plate on the wheel reads: "Fitz Water Wheel Company Hanover, Pa.". The axle stem connection into the wall is ringed with a brick arch. Just to the right of this is another bricked-up opening where the cog was located that was turned by the inner gear on the water wheel.
