Building E5422, located in the Edgewood Area of Aberdeen Proving Ground is not eligible for individual listing on the National Register of Historic Places.

According to the information provided, Building E5422, currently administrative offices, was erected in 1942 as a Change House. It is a long, low-lying brick structure, covered with a gable roof, clad with a corrugated metal. It is divided into seven bays, the typical bay having two windows, originally 8/8 double-hung sash, now 1/1 double-hung. The building was erected as part of the general World War II construction expansion of the Army installation. According to the HABS documentation, Chemical Warfare Service is listed as the architect of the building.

The building lacks the architectural distinctiveness necessary to qualify it for individual listing on the National Register of Historic Places under Criterion C and is not located within an historic district. Further, it is not known to have any direct associations with persons or events significant to our past, to qualify it for listing under Criteria A or B.

Documentation on the property/district is presented in: Project Review and Compliance
