The Singer Road over Mountain Branch Bridge in Harford County, Maryland, northeast of Joppa, pictured in the attached photographs, is a small steel girder concrete beam bridge that appears to date from the 1930s or 1940s. The low parapet has been augmented by the addition of W-beam to serve as a guard rail for the stream crossing. Although the bridge is historic, it is a very common form of bridge found throughout Maryland. Based on the information provided, we reviewed the bridge's eligibility under Criterion C, architecture. Because of its ubiquity, we concur that the bridge is not eligible for inclusion in the National Register of Historic Places.
