Description of Property and Justification: *(Please attach map and photo)*

710 Edgewood Road is located on the east side of Edgewood Road (MD 755) in the vicinity of Edgewood in Harford County. The 3.5 acre property contains a principle dwelling, a garage, and a shed. The dwelling is two-and-one-half-stories in height with a rectangular plan, three units wide and two units deep. The asphalt shingle covered side gable roof has several cross gables and two interior end brick chimneys. The wood-frame structure is covered in vinyl siding. Tax parcel records indicate that the property was built in 1830. While a portion of the structure may date to that period, the dwelling is more characteristic of late nineteenth-century Victorian architecture.

The front façade, or east elevation, is dominated by a large square tower with a hipped roof with four small gabled dormers. There is a cross gable centered over the main entrance. The front entrance has a modern replacement door with an aluminum screen door and an original transom and sidelights. The majority of the windows on this façade are two-over-two double hung wooden sashes. Faux vinyl shutters have been added to the first and second story windows. This façade features a shed roof porch with chamfered wood supports that wraps to the south elevation.

The gable ends of the south elevation features prominent cornice returns and paired attic lights. Windows on the south and north

elevation are two-over-two double hung wooden sashes with faux vinyl shutters. The rear façade, or west elevation, features two cross gables and an asphalt shingle covered hipped roof enclosed porch.

The house is set back far from the road and is approached by a long gravel drive. The grounds contain several mature trees and bushes. There is a modern detached garage located west of the house and a wood-frame shed with exposed rafter tails and a corrugated metal side gable roof located southwest of the house.

The property retains its historic location. The property's setting has been altered by the construction subdivisions on three sides of the property. Current owners parceled off a portion of the property that now contains a house built in 1991, which is directly southeast of the main dwelling. The property's historic design is evident in the massing and plan, but has been altered the replacement of historic building materials. Nineteenth-century workmanship is not readily apparent due to the modern alterations of the property, such as the vinyl siding. Though the dwelling was most likely once a central component of a prosperous agricultural property, it no longer retains the feeling a nineteenth-century farmstead or an association with Harford County's agricultural history.

The property does not have an association with events that have made a significant contribution to the broad patterns of our history, and is not eligible under Criterion A. Due to the lack of agricultural fields and outbuildings, the property no longer conveys an association with agriculture. The property is not known to be associated with the lives of persons significant in our past and is not eligible under Criterion B. Due to alterations, including the replacement of historic building materials and modern alterations, the property lacks architectural integrity. The property is not eligible under Criterion C, as it does not embody the distinctive characteristics of a type, period, or method of construction, or represent the work of a master, or possess high artistic value. The property was not evaluated under Criterion D.
