Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The nucleus and earliest building on the former University of Maryland Animal Husbandry Farm (later Horse Farm) is an ell-shaped, frame, early-twentieth century dwelling clad in asbestos shingles. It is all that remains of the Otten farm, and the only building extant which pre-dates the acquisition of the property by the University of Maryland in 1935.

Accessed by a lengthy farm road extending northeast from MD 108, the sixty-acre property is located in an area experiencing rapid suburbanization, with new housing or government complexes springing up in the general area. Until about 1990, it was utilized by the University of Maryland as a horse research facility, but this effort was abandoned and the remaining property is being marketed.

The principle section of the house, oriented to parallel MD 108, is five bays wide and one bay deep, with a centered entrance, entry foyer and staircase. The plan incorporates two rooms up and two rooms down with fireplaces located on the inside walls, reflected in the chimneys arising on either side of the cross gable of the roof. The regular fenestration is made up of two-over-two windows, with five across the front and one at each level along the sides and windows at each level along the sides and windows in the gable ends and cross gables.

The long, one-bay deep ell projects from the east or rear of the wall of the main part slightly north of center. A two story bath addition is located in the north axis of the main block and the ell, whereas on the south side there is a one-story, shed roof addition which extends the full length of the ell and wraps around one-half of the southeast corner of the ell. There is a full width one-story porch along the principle facade and the door is centered within a bay which projects out about 16 inches from the forward plane of the building at the first floor level.

The dwelling was constructed by George H. Otten in the early years of the twentieth century according to his daughter, who was born and raised on the farm. This corresponds to the account of the resident of the Horse Farm, Ms. Carr, who states that she was informed by local, long-time inhabitants of an adjacent property that the dwelling was constructed in their childhood in the second decade of the twentieth century. Ms. Otten also reports that any buildings which were located on the property prior to her father's acquisition were razed. She stated that her father purchased three large parcels, which were later sold to the University of Maryland in 1935.

Prepare both a summary paragraph of significance and a general statement of history and support.

The University of Maryland Animal Husbandry Farm, utilized from 1975 to 1990 for horse farming, is one of the eleven satellite institutions developed by the School of Agriculture to study varying conditions that occur throughout Maryland and their effects on farm procedures and productivity. Swine and bovine research was the focus of the experimental research center from 1935 to 1975. The results of the research conducted at the site were disseminated to the public by means of lectures, presentations, tours, open houses and meetings.

The rapid suburbanization of the area made continuation of the facility untenable, and the operations ceased about two years ago. The property has been reduced in size by at least three-quarters since the University purchased the 223 acre Otten Farm in 1935, and now comprises sixty acres, zoned by Harford County for mixed commercial/residential development.

The site is significant as a component of the agricultural research service of the University of Maryland; however, the drastic diminution of the farm over the last twenty years, the discontinuation of the program altogether in the last two years, and the existence of other facilities with greater viability and University support mitigate against this site being considered eligible for inclusion in the National Register of Historic Places.

7. Description Continued

The acquisition of this property and a Montgomery County site near the College Park campus in the 1930's was prompted by the aim of the University to expand its function as an agriculturally based institution to research aspects of agriculture as it relates to various topographies and soil types found throughout Maryland. Before that time all experimental work was conducted at the College Park campus.

The University of Maryland, as a land grant college, had a three-fold purpose: 1) instruction; 2) research; and 3) technology transfer. The experimental research centers fulfilled the latter two functions for the Department of Agriculture. The animal sciences department, in centers like the Otten Farm site, studied domesticated farm animals, first cattle and swine, and later, horses. The swine facility was largely located on the south side of Old Montgomery Road which was purchased by the State of Maryland for the School for the Deaf. The technology transfer was accomplished by means of demonstrations, meetings, open houses, tours and presentations to the clients that occurred at the site. The program in boar research received considerable support in its heyday. Nonetheless, none of the research conducted at the Otten Farm site ever constituted any scientific breakthroughs of note, according to University of Maryland personnel. Moreover, since the late 1970's, the site was not the location of any significant research effort. The horse farm did not receive much support during its short tenure.

Land grant universities were school endowed under the Morrill Land Grant Act of 1862. Congress initially granted every state 30,000 acres for each senator and representative it had in Congress. Land was to be sold, proceeds invested and income used to create and maintain a college for agriculture and the mechanical arts.

For years prior to the passage of this act people agitated to have the finer points of agriculture taught. The Land Grant Act introduced by Senator Morrill of Vermont granted 11,367,832 acres of land to states and territories. All states and Puerto Rico ultimately received support in the form of money and/or land from Congress to support land grant universities.

Currently, the University maintains eleven research centers, with two to be replaced, moved to new sites or discontinued. The first site, in Montgomery County, was moved to western Maryland due to heavy suburbanization of the general vicinity. The second site to be founded, the former Otten farm, will also be sold because the heavy suburbanization of the surrounding area has made the continuation of horse farming untenable. This was a relatively short-lived operation, having lasted only 10-15 years.

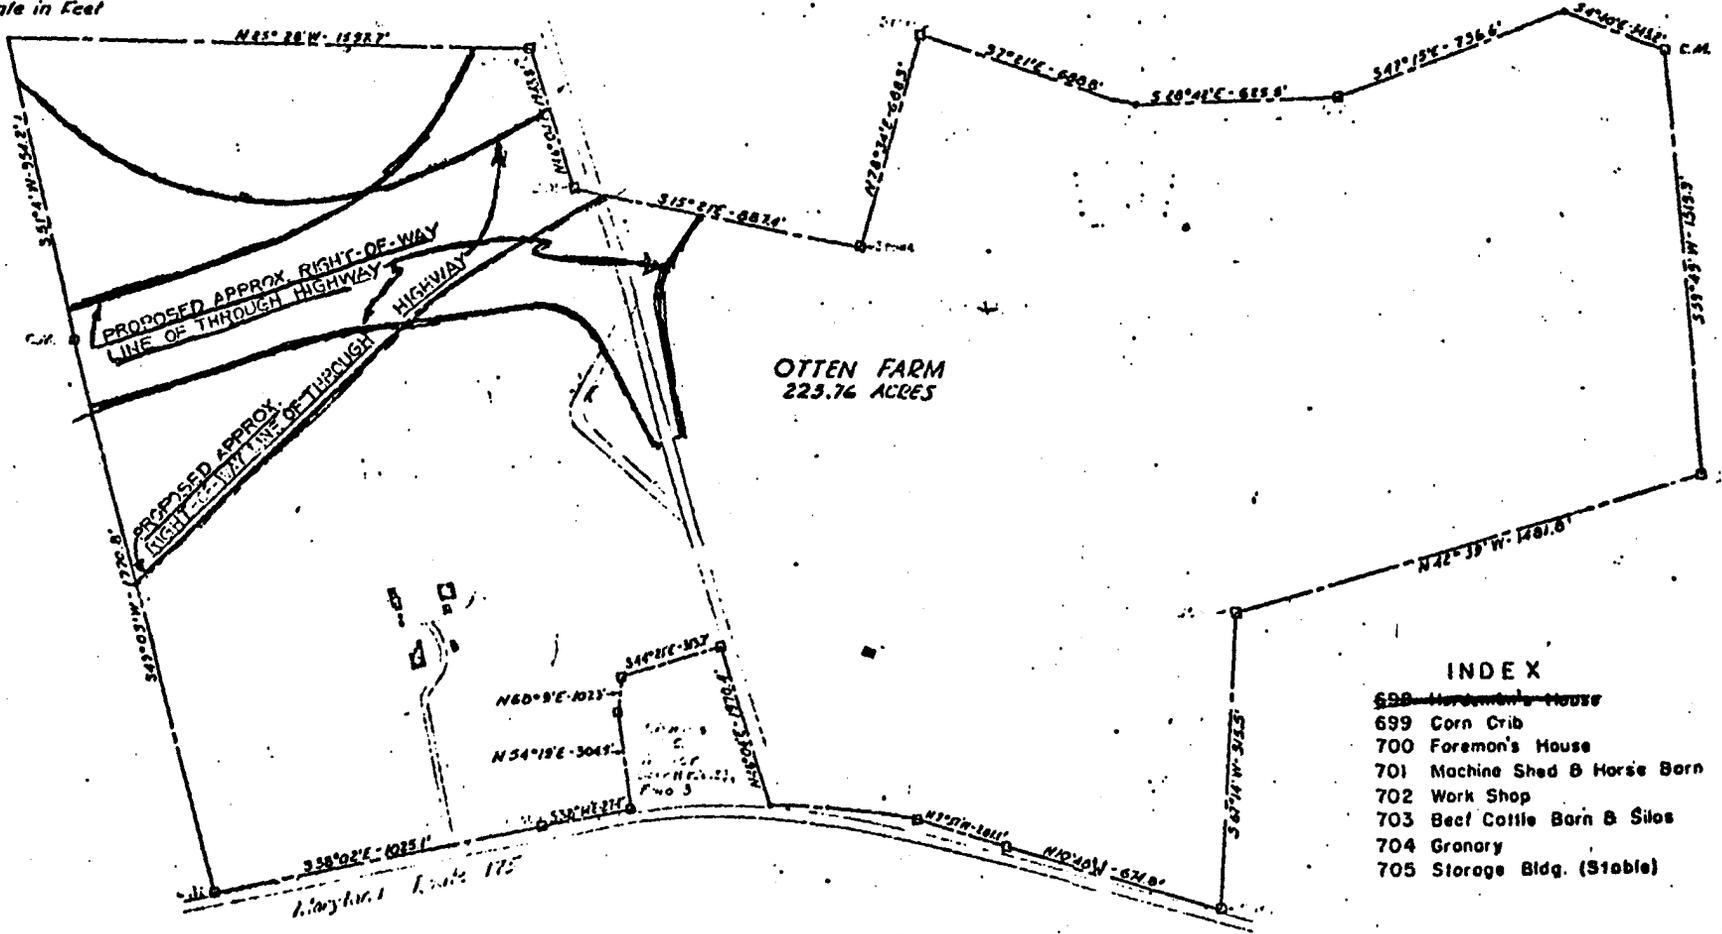

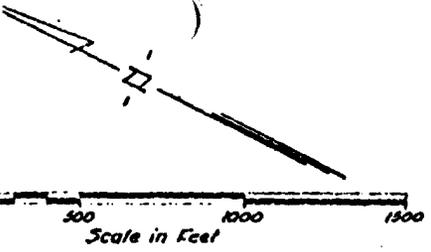

7. Description Continued

There are ten farm buildings on the site that have been built by the University of Maryland since 1935. A long, low open structure, used for swine, was built in 1964. The horse barn and silo were constructed in 1951, along with an equipment storage building behind the dwelling. Four more shelters were constructed in 1975 after the focus of the work changed from hogs and cattle to horses in the late 1960's. Another equipment storage building was completed in 1985.

The Otten farm, which was purchased by the University of Maryland in 1935, was composed of three large tracts encompassing 223 acres that spanned both sides of Montgomery Road. Sixty eight acres were sold to the Maryland Department of Health and Mental Hygiene for the School for the Deaf in the mid 1960's. In the last two years at least 2 tracts were sold to Howard County and one to the Maryland Department of Transportation, resulting in the current sixty acres still owned by the University.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Otten Farmhouse, located on the east side of Waterloo Road (Maryland Route 175) southeast of Ellicott City, is a two storey asbestos-shingled-over-frame dwelling dating from the latter part of the nineteenth century/the early part of the twentieth century.

The main block measures five bays wide and one bay deep. Its main (west) facade is characterized by a central entrance flanked by two windows. The doorway, adorned by a multi-light transom and sidelights, is outlined by a modest architraved surround. The wooden door is multi-paneled. Windows with 2/2 sash are delineated by flat wooden sills and wooden lintels surmounted by beaded molding. Louvered shutters flank the windows. An open porch with chamfered wooden supports spans the entire width of the first storey.

Five 2/2 sashed windows occupy the corresponding openings of the second storey. Flat wooden sills and lintels and louvered shutters frame these windows.

A centrally positioned cross gable is pierced by a pair of awning windows each with four light.

The north facade is marked by centrally placed 1/1 sashed windows on the first and second storeys. Again, these windows are shuttered with flat wooden sills and lintels. The gable area is pedimented with a molded boxed cornice. A 6/6 sashed window punctuates this attic level.

The south facade fenestration is identical to that of the west facade.

A two storey wing of equal height projects from the central bay of the rear (east) facade. This section measures two bays wide and two bays deep. A shed-roofed two storey addition is constructed in the northeast corner of the main block and the wing. Along the southern bay of east facade of the rear wing and extending across the east facade of the same section is a one storey shed roofed frame addition. An entrance is located in the central bay of the east facade.

Two corbeled capped brick chimneys are centrally located in the main block. A third interior chimney is found in the eastern gable end of the rear section.

Both sections sit on low fieldstone foundations. The shed-roofed additions are constructed on cinder block foundations.

----------------	-------------------

STATEMENT OF SIGNIFICANCE

The Otten Farmhouse is an excellent example of the typical rural dwelling constructed in the late nineteenth and early twentieth centuries throughout Howard County regrettably, these structures suffer a high mortality rate with the expanding suburbs of Baltimore, Washington and the growth of Columbia.

The farm complex, now operating as the University of Maryland's horse farm, is a significant contribution to the rural fabric of the area.

Otten Farmhouse

Description

Page 2

INTERIOR

The interior is in excellent condition with all of its interior trim intact.

On the first floor a central hall is flanked by two rooms with the kitchen wing located behind the hallway. The second floor yields the same configuration. All rooms, including the kitchen, are detailed by window and door surrounds of architruved trim joined by bulls-eye corner blocks.

CHAIN OF TITLE

Otten Farmhouse

153/288
12/19/1935
DEED

From Herman F. Otten, unmarried to the State of Maryland for the use of the Board of Regents of the University of Maryland

This deed consists of two parcels of ground situate and lying in the 1st election district of Howard County

Parcel 1: Containing 91.718 acres "Being the same parcels of ground by deed dated 10/13/1890 (JHD 56/466) that were granted by Martha M. St. Clair to George Herman Otten and constituting the farm on which the said George Herman Otten resides at the time of his death and for many years prior there to ..."

Parcel 2: Containing 132.041 acres including three tracts of land all of which were bequeathed to Herman F. from George Otten in his will (4/17/1926, MFB 7/168)

From Herman F. Otten to George Otten

DEED | From Thomas Griffin to
John Henry Otten |

This parcel, comprised of three tracts of land was owned by John Henry Otten who died (Wills J.S. 3/1) and gave the same parcel to his son, William. William died (Wills J.S. 3/301) and gave the same parcel to his nephew, Henry J. Simon, and his two neices Wilhelmina and Theresa Simon. The two neices conveyed the land to Henry Simon (WWL 87/484, 7/28/1909) who died testate, unmarried and without issue 12/7/1911. The land reverted to the neices. They then sold it to George Herman Otten 5/1/1919

*:

(WWC 94/598). George died and the second item of his will dated 4/17/1926 (MFB 7/168) gave the land to Herman F. Otten

MFB 7/168
4/17/1926
WILLS

Item two for George Herman Otten's will states that to his son "I will and bequeath the property known as 'The Simon Farm'. Which consists of 140 acres
