

Maple Cliffe
HO-587
Howard County
4012 College Avenue, Ellicott City
Ca. 1900
Private

Maple Cliffe, 4012 College Avenue, is located 1 mile south of downtown Ellicott City in Howard County, Maryland. The ca. 1900 house and stable are set on 11.75 acres in the lush rolling piedmont along the Patapsco River. The buildings face north onto College Avenue and are situated at the end of a drive lined with maples. The section of the property north and east of the house is a largely flat lawn that is landscaped with mature specimen trees and garden features. The rest of the property is densely wooded and slopes steeply down to New Cut Road, which follows a branch of the Patapsco River.

The house at Maple Cliffe is a ca. 1900, 2 ½-story, 5-bay x 4-bay, shingled wood-frame, side gable house with a slate roof, a granite basement, and wood trim. The Queen Anne/Shingle Style house has a boxy mass relieved by a hexagonal corner tower, large dormer, and L-shaped wood porch. Window openings hold one-over-one wood windows and retain louvered shutters. The main entry door has a four-light transom and four-light sidelights. A wood-frame stable/carriage house, which contributes to the property, is located south of the house. The building has a square foot print and a side gable roof with a front cross gable. The building is set into the slope behind the house and is 1 ½ -stories at the front and 2 ½ -stories at the back. The building is currently shingled, although earlier clapboards are visible beneath the shingles, has a granite basement, and an asphalt roof. The house and stable/carriage house are in good condition, with nearly all of its original features intact. They are suffering slightly from deferred maintenance.

Maple Cliffe, 4012 College Avenue, is significant as an intact ca. 1900 Queen-Anne/Shingle Style house located on a large estate lot with mature landscaping. Constructed for the Radcliffe family, who were Ellicott City merchants, the property embodies the distinctive characteristics of the summer houses built by prosperous members of the professional and merchant classes in Howard County at the end of the 19th and beginning of the 20th century. While an architect or proficient builder likely designed the house, the house's designer is not currently known.

7. Description

Inventory No. HO-587

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Maple Cliffe, 4012 College Avenue, is located 1 mile south of downtown Ellicott City in Howard County, Maryland. The ca. 1900 house and stable are set on 11.75 acres in the lush rolling piedmont along the Patapsco River. The buildings face north onto College Avenue and are situated at the end of a drive lined with maples. The section of the property north and east of the house is a largely flat lawn that is landscaped with mature specimen trees and garden features. The rest of the property is heavily wooded and slopes steeply down to New Cut Road, which follows a branch of the Patapsco River.

The house at Maple Cliffe is a ca. 1900, 2 ½-story, 5-bay x 4-bay, shingled wood-frame, side gable house with a slate roof, a granite foundation, and wood trim. The house has a boxy mass relieved by a hexagonal corner tower, large dormer, and L-shaped wood porch. Window openings hold one-over-one wood windows and retain louvered shutters. The main entry door has a four-light transom and four-light sidelights. The house has an external brick fireplace chimney laid in running bond on the east façade and a small 1-story rear ell that is a 20th c. addition. The house is in good condition, with nearly all of its original features intact. It is suffering slightly from deferred maintenance. The wood shingles are nearing the end of their useful life. Shutters are in need of minor repairs and painted trim is peeling. The owner did not provide access to the interior of the house.

When seen from the front, the house's asymmetrical composition is balanced about its central axis, which is marked by the main entry door. The wide front stair, at the basement level, and the large slate-shingled dormer, that pierces the roof, compositionally balance one another off the axis. The 3-story corner tower at the northeast corner of the house forms a strong vertical element that is balanced by the horizontal 1-story porch that wraps the north and west façades.

The house's primary facade faces north. Closely spaced, large window openings dominate the primary façade. The main block of the house has three window openings and the main door opening on the 1st floor. The main block of the house has four window openings on the 2nd floor. The tower projects from the eastern corner of the primary façade. The attic story gabled dormer has two window openings, currently shuttered, and a louvered vent in the gable.

The hexagonal tower, which projects from the house's northeast corner has three window openings on the 1st floor, three window openings on the 2nd floor, and two small window openings at the basement.

The wood porch is set on granite piers and is topped by a slate hipped roof. The porch has wood Tuscan columns and a simple wood rail. Two bays of the porch, off the west side of the house, have been screened-in. The screened frame is separate from, and is located on the porch-side of the original columns and rails.

The west (side) elevation has two 1st floor window openings in the center two bays. The 2nd floor has three window openings located in the southern three bays. The attic floor has two window openings in the center two bays.

The east (side) elevation has two 1st floor and two 2nd floor window openings in the southern two bays. An external brick fireplace chimney, for a fireplace that was added by the Kinleins in ca. 1920s) is centered on the elevation. Two attic floor window openings and two basement window openings flank the chimney. The tower projects from the northern portion of the elevation.

Window openings on the south (rear) elevation are irregularly placed and sized, presumably to correspond to the back-of-house interior floor plan. The 1st floor has two window openings, located in the eastern two bays. The window opening closer to the kitchen addition is slightly smaller than other 1st floor windows. The 2nd floor has four window openings. A small, high 2nd story window opening, presumably for a bathroom, is centered on the elevation. Two 2nd story window openings are located in the western two bays and one 2nd story window opening is located in the eastern-most bay. The foundation is parged with concrete and a cellar bulkhead projects from the basement at the east end.

A 1-story addition projects from the west side of the south elevation. The addition has a concrete foundation, a hipped roof, and a small back porch. The back door is located on the east elevation of the addition. The south and west elevation each have one window

Historic Properties Form

Inventory No. HO-587

Name

Continuation Sheet

Number 7 Page 1

opening with paired steel three-light casement windows. The addition is shingled to match the house, so it is difficult to date, but the steel windows make a ca. 1930-1940s date plausible.

A wood-frame stable/carriage house, which contributes to the property, is located south of the house. The building has a square foot print and a side gable roof with a front cross gable. The building is set into the slope behind the house and is 1 ½ -stories at the front and 2 ½ -stories at the back. The building is currently shingled, although earlier clapboards are visible beneath the shingles. The stable/carriage house has a granite foundation, and an asphalt roof.

The primary façade of the stable/carriage house faces north. The large vehicular opening is centered in the north façade. It currently encloses a mid-20th century, paneled, wood garage door, although the track for earlier sliding doors remains. The front cross gable is centered over the entry door and encloses a wood six-light sash. The roof's fascia board is detailed with false rafter tails.

The west (side) elevation of the stable/carriage house has a granite foundation and is shingled at the 1st and loft stories. The west elevation has two six-over-six wood windows, one centered on the 1st floor and one centered in the gable on the loft story.

The south (rear) elevation of the stable/carriage house is shingled from top to bottom. It has two wood divided stall doors at the ground level and one six-over-six wood window centered on the 1st floor. The roof's fascia board is detailed with false rafter tails.

The east (side) elevation of the stable/carriage house has a granite foundation and is shingled at the 1st and loft stories. A six-light wood sash is centered in the basement, a six-over-six wood window is centered in the 1st floor and a loft door, now open and screened, is centered in the gable.

Maple Cliffe retains historic landscape features, which contribute to the character of the property. The house has a historic maple alley. The drive, which is now asphalted, has two circles – at the front and back entries. The drive passes west of the house, leads to the carriage house door and passes east of the stable/carriage house. Mature specimen trees also constitute a primary historic landscape feature. In addition to the alley of maples, the lawn is dotted with mature trees, including ornamental maples and a copper beech. The house also has clipped hedges along the roadway, along the drive, and in the lawn east of the house. A mid-20th century ornamental pool with fountain, water lilies and fish is located east of the house, as is a small brick shrine enclosing a statue of Mary. A tennis court is located at the east end of the lawn.

Maple Cliffe currently retains integrity of location, design, setting, materials, workmanship, feeling, and association. Maple Cliffe is located outside Ellicott City on College Avenue, which retains its slow-paced, verdant, historic suburban character. The house and stable/carriage house are set on 11.75 wooded acres with a large landscaped lawn. The original design, materials, and workmanship of Maple Cliffe remain remarkably intact and the house retains the feeling of a comfortable turn-of-the-20th century summer/suburban home. Its characteristic, long-time association with the merchant-professional families of Ellicott City remains unbroken.

Specific dates ca. 1900 **Architect/Builder** unknown

Construction dates ca. 1900

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

Maple Cliffe, 4012 College Avenue, is an intact ca. 1900 Queen-Anne/Shingle style house located on a large estate lot with mature landscaping. Constructed for the Radcliffe family, who were Ellicott City merchants, the property embodies the distinctive characteristics of the summer houses built by prosperous members of the professional and merchant classes in Howard County at the end of the 19th and beginning of the 20th century. While an architect or proficient builder likely designed the house, the house's designer is not currently known.

The design of Maple Cliffe incorporates features of both the Queen Anne and Shingle styles. Asymmetrical massing, steeply pitched roof with deep overhanging eaves, corner towers and deep porches are hallmarks of both styles. The slate roof, tower finial, and large one-over-one windows all have a strongly Queen-Anne character. It is primarily the side gable configuration, heavy stone foundation, shingle cladding, classical porch columns, and simplicity of door and window detailing that allies the house with the Shingle style.¹

Ron Hogg, a current owner of the house, stated that he heard through his family that the house was originally constructed as a summer house. The house does share the architectural vocabulary of Howard County's 19th c. summer homes, such as those found in Lawyers Hill. For the prosperous, the summer house embodied the freedoms of new-found leisure time and "summers now became times to get away from one's ordinary routine, or to flee the stresses of industrialized life, to seek recreation amidst the pleasures of nature."² Even within the 20th century, as summer houses were transformed into year-round suburban residences, the type continues to represent "the leisured class, who desired an architecture that spoke of easy and carefree pastimes, an architecture that was not pretentious or boastful, that connected with an ancestral past but was not held in check by it."³

Only two families have lived at Maple Cliffe, the Radcliffes, who built and named it, and the Kinleins and Hoggs. The first were prominent local merchants, the second were builders in the first generation at Maple Cliffe, and lawyers thereafter.

George W. Radcliffe purchased the land where Maple Cliffe is located from the Henry R. Hazlehurst in 1897. Radcliffe was a merchant who kept a store on Main Street in Ellicott City. In June 1900, the Radcliffes were living "in town" on Main Street. At that date, George W. Radcliffe, senior (age 41) and his wife Mary G. (age 33) had four children: Evelyn E. (age 8), George W. (age 7), Hubert L. (age 4) and Alma V. (age 2). Robert Gassaway (age 42), their African-American servant who drove the coal cart also lived at the Main Street address.⁴ By 1910, the Radcliffe family lived on Beechwood Avenue (College Avenue). By that date, they had two

additional children: Samuel J. (age 9) and Edwin W[arfield] (age 6).⁵ By 1920, Mary Radcliffe was widowed at age 51 and had moved to 1420 Harlem Avenue, on Harlem Park in Baltimore City, with her son Stewart (age 28), who was a clerk in a drug store, her daughter Alma (age 21), son James (age 18), son Warfield (age 16), and their household servant Robert Gassaway (age 76).⁶

Julius A. and Teresa M. Kinlein bought the property from Mary Radcliffe in September of 1920. The Kinleins moved to Howard County from 1329 N. Eden Street, a densely populated German section of East Baltimore. In January 1920, while still in the city, the Kinlein family consisted of Julius (age 31), a building contractor, his wife Mary T. (age 32), their five children, Alberta M. (age 8), Julius H. (age 6), Doris M. (age 4), Alma M. (age 2), Marion T. (age 2 mos). Three others lived with the Kinleins: a boarder, Fred K. Hogeman (age 67), who was a house carpenter, and two sisters-in law, Sophia and Catherine Plantholt, who were a saleslady and a clerk, respectively, at a department store.⁷ By 1930, the family was well established on College Avenue. Julius is listed as a house engineer and there were two additional children, Mary L. (age 9) and John D. (age 5).⁸ Ron Hogg noted that his grandfather had connections with the local Archdiocese, and in addition to being a prolific Howard County house builder, constructed a number of local institutional buildings.

The Kinlein's eldest daughter and her husband Charles E. Hogg purchased the house from her parents in 1951. Charles Hogg was an University of Baltimore-educated attorney, who was raised in Baltimore City. Ron Hogg stated that his paternal grandparents both died of influenza when his father was quite young. In 1920, Charles E. Hogg (age 8) lived at 2626 E. Baltimore Street, on Patterson Park in Baltimore City, with his uncle Joseph M. Smith (age 48), who was the manager of a candy factory, his aunt Mary K. (age 42), his cousins Margaret M. (age 22), who was a bookkeeper for an undertaker, Edmund (age 20), who was a clerk at a candy factory, and John (age 12).⁹ Ten years later, in 1930, Charles and his elder sister, who was a stenographer, lived with the Smiths.¹⁰

Charles and Alberta met at Maple Cliffe when he was on an outing with friends. After his marriage to Alberta, he established a highly respected law firm in Ellicott City. Mr. Hogg passed away in 1983. In 1987, Alberta transferred ownership of the property in Trust to her children. Her son Ron Hogg, also an attorney, now keeps offices at the house. In 2004, the Hoggs are planning to subdivide the property, retain the house and stable, and build about 20 additional houses on the lawn section of the 11.75-acre property.
