

ELLWOOD FARM  
Betterton, Maryland  
(1851)

K-221

Ellwood was constructed in 1851 by Richard T. Turner and his wife Elizabeth Betterton Turner. The Turners were leaders in the development of Betterton, which had previously been known as Crew's Landing, and later became lumber merchants and large landowners in this part of Kent County.

Ellwood house is a 5 bay, 2½ story frame building with a 2 story wing constructed against the west gable. The main house has a gable roof surmounted by a gallery and brick chimneys enclosed in the gables, the eastern of which has an exposed, rebuilt chimney back. The foundation of the house is coursed granite.

The house is transitional in design and unique in the county. Its gallery and general proportions bare resemblance to Georgian and 18th century design, and the position of the side wing was common practice in the 18th and early 19th centuries. Ellwood's front porch, interior stair, windows, and wooden construction and detailing, however, clearly reflect the influence of the Greek Revival and resemble those used in Kent County houses from the 1860's to the 1890's.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Ellwood Farm house is located near the corner of the Betterton and Howell Point Roads. Sited on a hill, it faces north overlooking Betterton. The house is approached by a lane lined with old trees. There is a traffic circle in front of the house itself. Behind the house are farm buildings which date from the first half of the twentieth century.

Ellwood house is a 5 bay, 2½ story frame building with a 2 story wing constructed against the west gable. The main house has a gable roof surmounted by a gallery and brick chimneys enclosed in the gables. The eastern of which has and an exposed, rebuilt chimney back. The foundation of the house is coursed granite.

Sheltering the central entry of the house is a three bay by one bay entrance porch with square columns with bold molding at the capital and base and a flat roof. The main entry is large in scale with double doors four very narrow side lights and four rectangular transom lights.

Like the porch the roof has a box cyma recta crownmoldings and inboard gutters. The gable roof of the house and wing is finished with tapered vergeboards. Other exterior details have been obscured with a recent application of aluminum siding, but a wide pilasters at the corners and about 4" wide weather boards are the original sheathing. The gallery runs between the chimneys and is made of turned balusters and a hand rail.

Windows have 6 over 6 sash on both floors although those on the first are longer. Frames are plain with a 3/8" inside bead. Aluminum shutters replace the wooden ones which were hung on hinges screwed into the frame.

There are three gable dormers in each roof slope of the main house. These have 6 over 6 sash and a triangular decoration in the pediment.

SPECIFIC DATES 1851

BUILDER/ARCHITECT Richard & Mary Turner

### STATEMENT OF SIGNIFICANCE

Ellwood was constructed in 1851 by Richard T. Turner and his wife Elizabeth Betterton Turner\*, recently of Baltimore. The Turners were leaders in the development of Betterton, which had previously been known as Crew's Landing, and later became lumber merchants and large landowners in this part of Kent County.

The house is transitional in design and unique in the county. Its gallery and general proportions bare resemblance to Georgian and 18th century design, and the position of the side wing was common practice in the 18th and early 19th centuries. Ellwood's front porch, interior stair, windows, and wooden construction and detailing, however, clearly reflect the influence of the Greek Revival and resemble those used in Kent County Houses from the 1860's to the 1890's.

The building once had extensive plantings and was well cared for until recently. Ellwood is now a tenant house, and its new skin of aluminum siding bodes ill for its survival.

The Maryland Historic Sites Inventory was officially created by an Act of the Maryland Legislature, to be found in the Annotated Code of Maryland, Article 41, Section 181 KA, 1974 Supplement.

The Survey and Inventory are being prepared for information and record purposes only and do not constitute any infringement of individual property rights.

RETURN TO: Maryland Historical Trust  
The Shaw House, 21 State Circle  
Annapolis, Maryland 21401  
(301) 267-1438

The side wing has simple detailing and a brick chimney enclosed in the gable. On the rear an open shed and a garage have been appended to the wing.

Also on the rear facade, the rear entry has a four panel door with a transom light and side lights.

The house is laid out in a standard central hall plan with two rooms per floor. Interior rooms and halls are spacious and large in scale. First floor window and door trim is about 6" wide and plain except for a triangular door head and the tall four panel doors have simple panel edges, porcelain knobs, excutcheons, and key-hole covers. Second floor and attic trim is similiar, but simpler.

The dog-leg central stair is open to the attic floor. It has an open string with vertical paneled spandrel. The balusters are round and tapered, the handrail is round and the bold newel is turned.

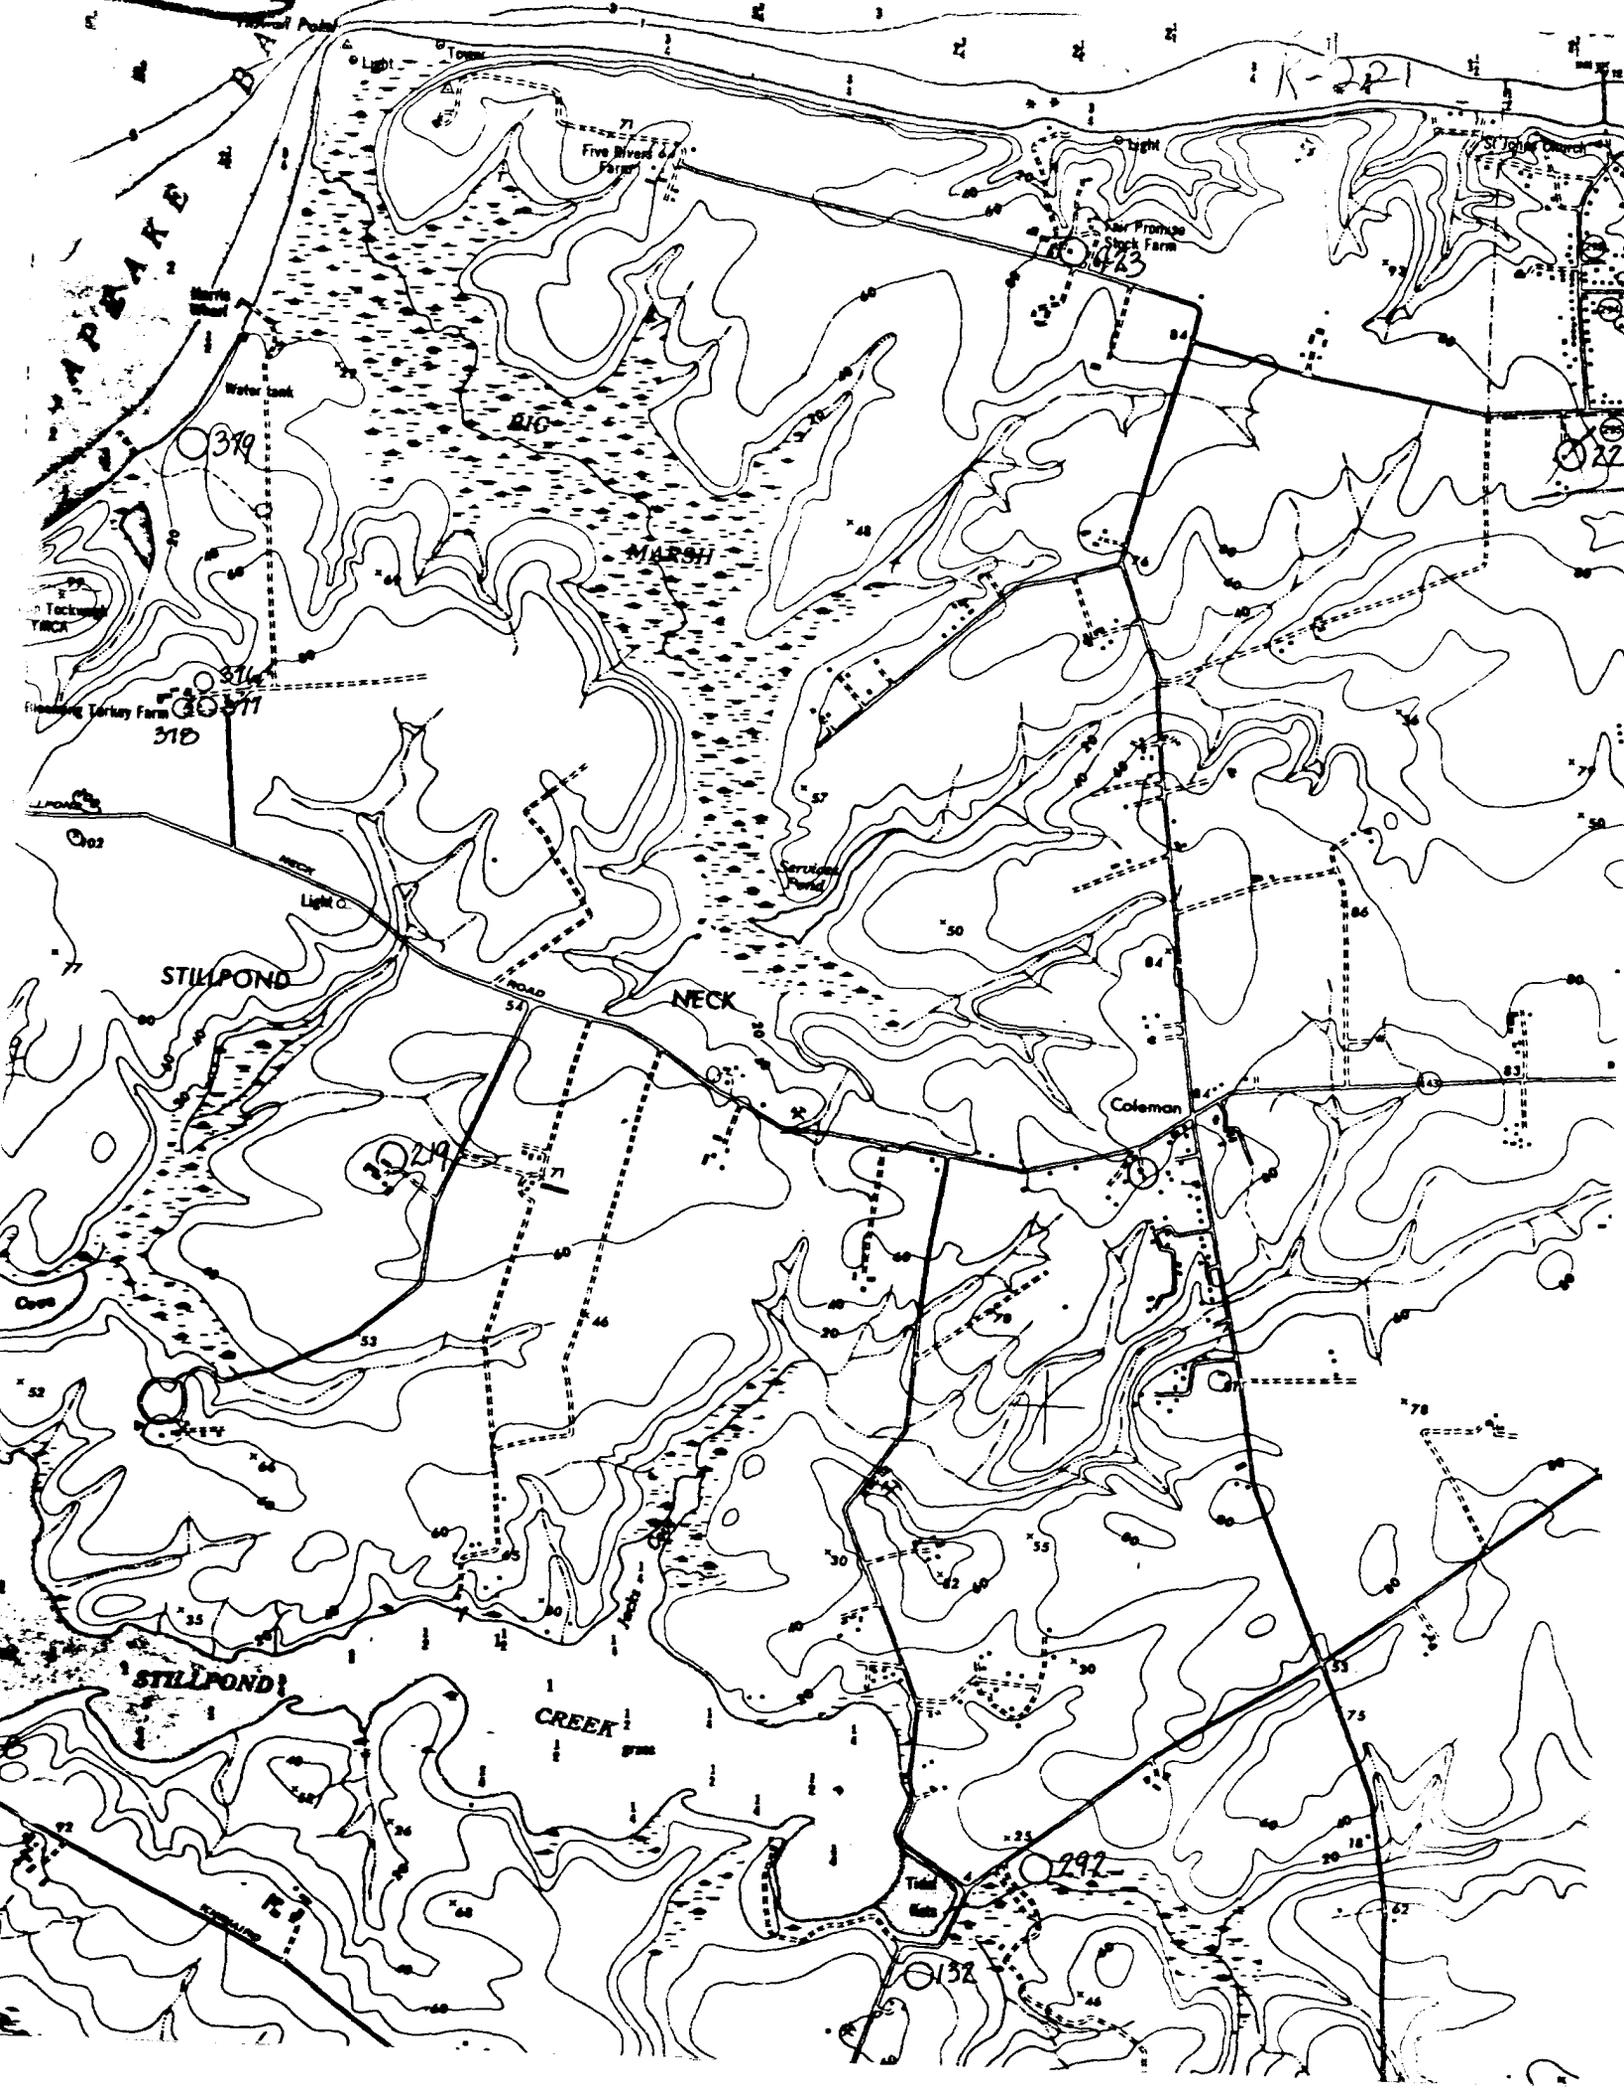

The kitchen wing has been modernized on the first floors, but the servants quarters on the second floor remain intact.

K. 221

Ellwood Farm House is a mid-19th century frame house which is built on a granite foundation. It is five bays long, two bays deep and stands 2½ storys. On each facade is a small porch covering the central door, which has sidelights and transom. The sash is 6/6 throughout and the first and second storys have louvered shutters. There are three dormers on each side of the "A" roof and the box cornice contains the gutter. Atop the ridge of the roof, between the two brick chimneys in the gables is a balustraded captain's walk, where it is presumed, one can see the bay and mouth of the Sassafras River. On its west end is a lower two story frame wing, three bays long.
