Resource Count: 2

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The John Thomas Property is a 2½-story, 2-bay gable-front-and-wing farmhouse on the south side of Ednor Road in the Silver Spring vicinity, Montgomery County. Constructed circa 1890, the building is an L-shaped plan with two interior brick chimneys.

The structure is of wood frame construction with wood shingle siding, and it has a stone foundation. The windows are double-hung wood sash. The house has a 1-story, hipped roof porch on the north (front) elevation. The porch wraps around to the west elevation and has brick piers and a modern wood railing.

The north, or front facade has a wood door on the west side of the projecting front gable with a wood storm door. The fenestration pattern is symmetrical, with one 2/2 double-hung window on the first story. The second story has one 2/2 double-hung window and a 6-light, fixed sash window is in the gable end. Alterations to the elevation include the modern porch railing and deterioration is evident in the wood porch floor which is buckling and rotting.

The north elevation of the wing has a symmetrical fenestration pattern, with one 2/2, double-hung window. The second story also has one 2/2, double-hung window.

The west elevation has 1-story porch which wraps around from the north facade. The fenestration pattern is symmetrical, with three 2/2, double-hung windows on the first story. The second story has three 2/2 double-hung windows and a window opening in the gable end has been infilled with wood. Alterations to the elevation include the modern porch railing and deterioration is evident in the sagging, wood porch floor.

The south, or rear elevation has a 1-story shed roof addition. The fenestration pattern is symmetrical, with one 2/2, double-hung window on the first story. The second story has two 2/2 double-hung windows.

The south elevation of the rear addition has a shed roof and two concrete steps. The fenestration pattern is irregular, with one fixed-light casement window and a wood door with 8 lights.

The east elevation has an irregular fenestration pattern, with one 2-light, fixed sash window on the basement level and five double-hung windows on the first story. The second story has three double-hung windows.

There is one outbuilding associated with this property. It is a modern shed, with a gambrel roof. The structure is located to the southeast of the house.

The property is located on the south side of Ednor Road, with residential property to the east and wooded open space to the north. The property's setting is suburban residential, at the intersection of two busy roads.

Prepare both a summary paragraph of significance and a general statement of history and support.

The land in the area of the John Thomas Property was known in the 19th century as "Glencoe", and was owned by the Thomas family as early as 1865. The 1865 Martinet and Bonds map shows a structure at the location of the current residence which was owned by William Thomas, a farmer in the Sandy Spring area. However, the parcel is vacant on the 1879 Hopkins Atlas. In 1872, William Thomas, gave a parcel adjacent to 901 Ednor Road to his son John Thomas. The parcel at Ednor Road was given to John Thomas in 1887, who held the property until 1902 and built the house currently on the property. John Thomas sold the property in 1902 to James Johnson for \$1,000.00, who later transferred the property to Henry Strouse in 1921. The property was again transferred in 1946, and in 1949, acquired by Oscar Pattie, father of the current owner. The size of the parcel, approximately 0.4 hectare (1 acre), has remained constant.

The John Thomas Property is located in the area of Sandy Spring. In the early eighteenth century, Sandy Spring was the name of a region which extended for several miles in the eastern portion of Montgomery County. Named for a spring located a half mile south of the present town, the area known as Sandy Spring comprised the land grants of "Snowden's Manor", "Beall's Manor", "Charley Forest" and the "Addition to Charley Forest". James Brooke arrived in 1727 and built a flour mill in 1737 and the first Friends Meeting House in 1753 on the 1200 acre land grant of "Addition to Charley Forest".

Other Quakers settled nearby, with a new brick meeting house and a post office beginning its operations in 1817. A general store opened in 1819, followed by a blacksmith shop, and the Mutual Fire Insurance Company located their offices in Sandy Spring in 1847. The Sandy Springs Savings Institution, the first bank in the county, was chartered in 1868. Despite this growth, the neighboring towns of Brookeville and Triadelphia attracted most of the commercial development in the area.

Between 1870 and 1940 the vernacular cottage style, such as that found in the John Thomas Property, was typically built for Americans of modest means. They are characterized by simple ornamentation and mass-produced components, such as door frames, moldings, sash and window units, and porch decoration. The development of post-Civil War machinery capable of producing large amounts of standardized housing elements, such as those found in cottages, contributed greatly to the development of the modern American housing industry. Designs for vernacular cottages were obtained from popular magazines, such as House Beautiful, or carpenter's and builder's journals, such as American Builder. A variety of front-gabled, side-gable, cross-gable, gable-front-and-wing, and hipped roof frame cottages were developed in the early to mid-twentieth century. Front gable and hipped roof cottages are primarily one-and-a-half to two stories tall, 3 bays wide and

8. Significance (Continued)

several rooms deep. Side-gable and cross-gable structures are usually two to two-and-a-half-stories tall, are typically two to three bays in width and vary from one to three rooms deep. They usually include a porch covered with a shed roof. Porches are supported by posts often containing machine-produced Victorian ornamentation. Some cottages feature ornamentation drawn from Craftsman style or Colonial Revival architecture (Gottfried and Jennings 1988, viii-xv).

NATIONAL REGISTER EVALUATION:

The John Thomas Property, constructed circa 1890, is not eligible for the National Register of Historic Places. It is not eligible under Criterion A or B, as it has no known association with historically significant persons or events. It does not meet Criterion C, as the structure is an undistinctive example of a common architectural style and has lost integrity through the alteration of such character-defining features as its porch. Finally the property has no known potential to yield important information, and therefore, does not meet Criterion D.
