Description of Property and Justification: *(Please attach map and photo)*

Brownstown Historic District, located at the intersection of Black Rock Road and Germantown Road (MD 118), was surveyed by the Montgomery County Historic Sites Survey in 1977 and inventoried by the Maryland Historic Trust in 1985, a year after the Maryland-National Capital Park and Planning Commission had removed it from its Locational Atlas of Historic Sites in Montgomery County. Brownstown is the location of a late nineteenth-century African-American community, described as located on the Darnestown-Germantown Road (Route 118) and marked on the MIHP form by a large imprecise square on a copy of the 1878 Hopkins Atlas of Montgomery County. The capsule summary of the MIHP form states that the only remnant of this community is the Brownstown School House (M: 18-29-1). The Brownstown School House was surveyed in 1974, removed from the Locational Atlas in 1982, and is no longer standing, as determined by the site visit on August 2, 2007. The Francis Asbury United Methodist Church, a congregation of the black community that dates to the late nineteenth century, is located at 17540 Black Rock Road, within the boundaries of the Brownstown Survey District. It was surveyed in 1979 and inventoried as M: 18-29-2, but the existing structure was built in 1959 and does not reflect the era of significance of the Brownstown Survey District. The William Brown House (the home of the man for which Brownstown was named) was surveyed in 1975 and is inventoried as M: 18-29-3; however, it was moved to the Lathrop E. Smith Environmental Center in Rockville in 1979. Three other inventoried properties are located within the area indicated by the SHA-GIS Cultural Resources Database as the Brownstown Historic District:

200703159

the site of the demolished Snyder-King Barn #2, inventoried as M: 19-24; the Germantown Baptist Church and Cemetery, inventoried as M: 19-25; and the C.T. Leaman House inventoried as M: 19-26. These sites are not known to be related to the African-American community of Brownstown and would not be considered contributing resources. No other structures over fifty years of age were identified along MD 118 as potentially contributing resources to the Brownstown Historic District.

Significance Statement

Although late nineteenth-century African-American communities are significant for their association with events that have made a significant contribution to the broad patterns of our history (Criterion A), the Brownstown Historic District is not a significant example of such a community, having no extant structures from the period of significance and thus lacking the integrity of the location of its buildings, their design, setting, materials, workmanship, feeling, and association that are the qualities of significance. Research has not found that the Brownstown Historic District is associated with the lives of persons significant in our past (Criterion B), and no structures remain that that embody distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction (Criterion C). The Brownstown Historic District was not evaluated under Criterion D.

Project: MD 118 Northbound over retaining wall Agency: State Highway Administration

Agency Prepared By: State Highway Administration

Preparer's Name: Rebecca Crew Date Prepared: 08/06/2007

Preparer's Eligibility Recommendation: X Eligibility not recommended

Complete if the property is a non-contributing resource to a NR district/property:

Name of the District/Property: Brownstown Historic District

Inventory Number: M: 18-29 Eligible: ____ yes Listed: ____ yes

Description of Property and Justification: *(Please attach map and photo)*

Structure 15431R0 is an approximately 72-foot long retaining wall running along the northbound side of Germantown Road (MD 118), at a below-ground level, so it is not visible from the road. It is immediately north of the intersection of Black Rock Road and adjacent to Structure 15068X0, a corrugated metal pipe of unknown construction date running under Germantown Road to emerge at the southern end of the retaining wall. The southern end of Structure 15431R0 projects east approximately four feet and then turns north and runs approximately four feet, making a reserved J-shape in plan. A culvert that runs parallel to MD 118 from a storm drain opposite the intersection of Blackrock Road emerges from the ground at the south end of Structure 15431R0. The height of the wall is approximately 6 feet, and it forms a narrow crevice due to the steep upwards slope of the ground to the east. The ground between the retaining wall and the slope has been paved flat with blacktop.

The retaining wall is a cement rubble wall of unknown construction date. It is located below MD 118 (Germantown Road), which according to the Germantown Historical Society, was built by local farmers in the nineteenth century to connect the Neelsville and Darnestown Presbyterian Churches, which were served by the same minister. The road appears on the 1878 Hopkins Atlas of Montgomery County, and was likely improved in 1931, when Bridge No. 150200 carrying MD 118 over Great Seneca Creek was constructed. A corresponding date of the retaining wall is suggested by the combination of the corrugated metal pipe (a form that was invented in 1896 and had become commonly used by the Maryland Roads Commission in the 1930s and continues today) and cement rubble masonry. As-built plans from 1936 of a masonry flood wall on Frostburg-Westernport Road at Lonaconing (Structure No. 01022R0, carrying MD 036 NBR) show a section of a cement rubble masonry retaining wall that resembles Structure 15431R0, including 3-inch wide cast iron weep hole pipes set at a downward slope to project three inches from the front face of the wall, such as those at Structure No. 15431R0. A similar date would be appropriate for Structure No. 15431R0.

Significance Statement

Structure No. 15431R0 retains integrity of location, setting, feeling and association, but lacks integrity of design, materials, and workmanship, due to the addition of the blacktop along the bottom of the ditch. Research has not shown Structure No. 15431R0 to be associated with events that have made a significant contribution to the broad patterns of our history (Criterion A) or the lives of persons significant in our past (Criterion B). Although the retaining wall is somewhat unusual, it is not distinctive of a certain type,

Capsule Summary

Brownstown Historic District (Montgomery County #18/29)

Route 118, near Germantown

Germantown, Maryland

Public

The Brownstown Historic District was the site of a 19th century community of freed slaves. It was named for an early settler, William Brown, and at one time had its own shcool and church.

The only remnant of the community is the small abandoned frame schoolhouse.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

In the late 19th century there was a small community of blacks living on the Darnestown-Germantown Road (Route 118), not far from Old Germantown. Named Brownstown after one William Brown, who lived in a log cabin in the area, the community had a schoolhouse and a church by 1878. The first church services for members of the community were held in William Brown's cabin, built of logs on ten acres of land which he purchased in 1868.

In the 1970's, the Brownstown Historic District was placed on the Montgomery County Atlas of Historic Sites as a potential historic district, subject to additional research and presentation to the Historic District Commission for review.

In reviewing the proposed district, the Commission found that the area lacked a sufficient concentration of historic resources to warrent designation. The house belonging to William Brown was dismantled and moved to the Lathrop Smith Outdoor Education Center in 1979, for use in a "Pioneer Homestead" program. The building is now the property of the Maryland-National Capital Park and Planning Commission. The Brownstown Schoolhouse, which still stands on Route 118, is abandoned and in poor condition. The building has been evaluated for placement on the Master Plan by the Historic Preservation Commission and rejected. Nearby, on Black Rock Road, is a black church which dates from 1959; but it is on the site which has been used for a church by the black community since the late 1800's.

The Commission voted to delete the Brownstown Historic District from the Atlas at their meeting in October, 1984.

The Maryland Historic Sites Inventory was officially created by an Act of the Maryland Legislature, to be found in the Annotated Code of Maryland, Article 41, Section 181 KA, 1974 Supplement.

The Survey and Inventory are being prepared for information and record purposes only and do not constitute any infringement of individual property rights.

RETURN TO: Maryland Historical Trust
The Shaw House, 21 State Circle
Annapolis, Maryland 21401
(301) 267-1438

M:18-29

To: Montgomery County Historic Preservation Community

From: Lois Snyderman, Research Assistant

Subject: Proposed Historic District, Brownstown (18/29)

Date: October 29, 1984

It is my recommendation that the proposed Brownstone Historic District be deleted from the Atlas of Historic Sites because of insufficient historic resources. The house which belonged to William Brown, for whom the 19th century community which existed in this area (a black community) was named, was moved to the Lathrop Smith Outdoor Education Center in 1979. Located on Muncaster Mill Road, Norbeck, Maryland, it is used for educational purposes as part of the "Pioneer Homestead" program. The property is now owned by the Maryland-National Capital Park and Planning Commission.

The Brownstown School House, which is still standing on Route 118, in very poor condition and abandoned, has already been evaluated for placement on the Montgomery County Master Plan and rejected.

Because of this area's history as a black settlement, some type of historic marker might be considered.

ACTION TAKEN

APPENDIX A

SITES NOT RECOMMENDED FOR REGULATION UNDER THE HISTORIC PRESERVATION ORDINANCE CHAPTER 24A OF THE MONTGOMERY COUNTY CODE

The following sites have been reviewed by the Montgomery County Historic Preservation Commission and were found not to merit designation on the Master Plan for Historic Preservation. If not included in the Master Plan, these resources may be removed from the Locational Atlas and Index of Historic Sites in Montgomery County. If removed from the Locational Atlas, the site will no longer be governed by the Moratorium on Alteration and Demolition, Section 24A-10 of the County's Historic Preservation Ordinance. The sites will, however, remain on the Maryland Historical Trust's Inventory.

The following sites were found by the Preservation Commission to be too greatly altered from the period of their architectural or historical significance or not to meet Ordinance criteria for designation.

ACTION TAKEN

Planning Board voted unanimously to confirm the Historic Preservation Commission's recommendation not to place the 24 sites on the Master Plan and not to keep them on the Locational Atlas.
