

INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM

Property/District Name: Pleasant Fields Survey Number: M:19-1

Project: I-270/US 15 Multimodal Study, Montgomery and Frederick Co Agency: SHA

Site visit by MHT Staff: no yes Name _____ Date _____

Eligibility recommended Eligibility not recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

Pleasant Fields, consisting of an 18th and 19th-century farm complex and located northwest of Neelsville, east of Route 270 in Montgomery County, is considered eligible for listing on the National Register of Historic Places under Criteria A, B, and C.

The property was historically a large farm complex which began in the late 18th century, the land having been acquired in stages beginning in 1755 by William Waters. The property originally served as a tobacco farm, but later became a horse farm. The property remained in the locally prominent Waters family until 1932.

The farm consists of several buildings, including the farmhouse--the oldest structure on the site; a larger frame, drive-through corncrib; an equipment barn; a frame carriage house; and two small frame sheds. The house itself was built in three distinct phases. The oldest section is a two-story, three-bay brick structure covered with a gable roof and erected ca. 1797. The middle section, built in the mid-19th century is a somewhat larger, two-story, two-bay brick structure with paired end chimneys. A semi-hexagonal bay with round arched windows is located on the first story of the facade. The most recent section, the east end section, was built in the early 20th century and is a large, three-bay-wide, front-gable frame structure. A bracketed cornice ornaments the front gable s does a bracketed porch.

Pleasant Fields is eligible for listing on the National Register under Criteria A, B, and C. Dating to the mid-to late 18th century, Pleasant Fields is illustrative of the county's long history of farming (Criterion A). For almost 200 years, it was associated with the locally prominent Waters family (Criterion B). The farm complex is a cohesive and intact example of an agricultural grouping, and the house provides a good example of the evolution of a vernacular domestic building form from the late 18th-century to the early 20th century.

The boundaries of the National Register property should include all of the farm buildings as well as any surrounding land included in the present ownership boundaries.

Documentation on the property/district is presented in: MHT Inventory Files

6. Date c.1797

7. Original Owner: William Waters

8. Apparent Condition

a. Goodc. Original Siteb. Altered9. Description:

The house is of two stories, built in 3 sections. The earliest was built c. 1797, and is the smallest part. It is built of brick with stone foundations. The center part, built c. 1880, converted the cottage to a comfortable two story farmhouse. It is of frame construction as is the newest section. This part was built c. 1900 and is larger than the earlier parts. At this time gingerbread trim was added all around. Outbuildings include a frame bank barn, loafing shed and a double corncrib.

10. Significance: Pleasant Fields is important for its connections with the prominent Waters family, & for its architectural representation as the home of a wealthy late 18th century planter.

William Waters began to buy this land in 1755. His son Basil, inherited the 831 acres & married Anne Pottinger Magruder, daughter of Col. Zadock Magruder, in 1797. He probably built the first part of the house that year. The 2nd part was built by Basil's great-nephew, Dr. William Waters, & his wife, the granddaughter of John Clarke, founder of Clarksburg. The 3rd section was built in the early 1900s by Dr. William Waters' son, Charles Clark Waters.

The property remained in the Waters family until 1932.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The house is a two story structure, built in three sections. The largest and newest is the frame east end. It has a three bay facade with the doorway in the west bay; the double glazed doors have a high transom light overhead. Windows are double hung sash; the frames are wide, the leads having small peaks or pediments at the center and the sills being bracketed. Across the front is a porch with square posts carrying arched brackets that support the cornice. The main building cornice is bracketed; there is a central gable on each facade.

The center section is two bays and two stories, with double chimneys on the east end. The west bay is a semi-hexagonal bay with round arched windows; the roof of the bay was once balustraded and the window above opened as a door to the balcony. The other windows have the same treatment as those of the frame section. The eaves and raking cornice are bracketed; the brackets being paired; there is an applied board frieze below the eaves.

The west end is a lower, two story, brick section with a three bay facade. The central doorway has a small transom light and the windows are double hung sash with plain surrounds. At the west end there is a flush gable chimney. The porch across the facade has square posts with arched brackets supporting the cornice. The main roof cornice is plain, with an applied board frieze.

The building has a stone foundation. On the west end there are two brick, shed-like structures attached.

West of the house are a frame bankbarn, a shed, and a double corncrib.¹

The main house is a fine example of the lifestyles of three eras. The earliest section was built by Basil Waters, probably in 1797, the date of his marriage, and his resurvey of his inherited land.² Basil developed Pleasant Fields into a tobacco plantation. He owned many slaves -- essential to successful tobacco farming -- and built them a house only slightly smaller than his own.³

The second section of the main house dates from the mid-1800s. Dr. William A. Waters, nephew of Basil, built this addition.⁴ William was a country doctor; he grew wheat at Pleasant Fields. The significance of William's addition is that the home was converted from a cramped, 1½ story cottage to a 2 story farmhouse of moderate size. There seemed to be more money in practicing medicine than in growing tobacco.

The third section and gingerbread trim were added by Charles Clark Waters, William's son, about 1900. This section appears to be as large as the first two combined, and shows the opulence possible in the period before income tax. Charles raised race horses and installed a track at the farm; he grew corn and hay in the fields. He built an ice house and pond a few yards northwest of his house, and dug a trench from a spring near the main road, a distance of about 1½ miles, showing the innovative tendencies of the period.⁵ The house has a circular staircase at the east end.

STATEMENT OF SIGNIFICANCE

The two houses and barn to be considered are adjacent to the proposed North German-town Greenbelt Park.¹ Protection of these buildings could be extremely valuable to the preservation of our heritage as well as add substantial attractiveness to the park.

From 1755 to 1932 Pleasant Fields was owned by the Waters family.² Three generations of Waterses farmed the land. The main house reflects its comfortably wealthy 18th and 19th century owners. According to the memoirs of a Waters descendant who grew up there, the adjacent 1½ story, red, wooden house was the original slave quarters.³ The barn is one of three built in the early 20th century.

William Waters began buying the land of Pleasant Fields in 1755.⁴ By 1759 William owned 31 acres, which he named Conclusion, incorporating grants with fanciful names -- for example, Molls Rattle, Sarah Love, and Panthers Range.⁵ William did not live at Conclusion however, but on his northeastern Montgomery County estate, Belmont.⁶

Basil Waters, the son of William, inherited Conclusion, resurveyed it, and named it Pleasant Fields.⁷ Basil married Anne Pottinger Magruder, daughter of Col. Zadok Magruder, and granddaughter of Ninian Beall, a large landholder who came to America from Scotland, and who founded the Presbyterian Church in Maryland.⁸

Basil probably built the first section of the house at Pleasant Fields and the adjacent house for his slaves in 1797, the date of his marriage to Anne.⁹ The smaller house remains also, and is very similar to the house Basil built for his own family. Many local black residents believe themselves descendants of the slaves Basil owned and named in his will: George, Richard, Thomas, Mary, Clair, Charlotte, Jack, Caroline, Mariah, Horace, Nelson, Harriet, Gubo, Prifo, Ellen, Otho, Mary Ann, Eliza, Kitty, Louisa and Bill.¹⁰

Basil's son, Zachariah, inherited Pleasant Fields.¹¹ Zachariah's widow, Eliza, sold the property to William Alexander Waters, Basil's nephew, in 1883.¹² William was a physician who practiced medicine in Clarksburg. His wife was Mary Willson, granddaughter of John Clarke, founder of Clarksburg.¹³ William built the second section of the house, and converted the former slave quarters to a carriage house. He loved Pleasant Fields; and is buried on the farm, carried to his grave by the men who worked the fields.¹⁴

Charles Clark Waters, the son of William and Mary, inherited the estate, and built the third addition to the main house. His interests were hunting and fishing, and also raising fine horses; he put in a half-mile race tract at Pleasant Fields.¹⁵ He built three enormous barns, forming three-fourths of a great square around the barnyard, an arrangement which gave winter protection for the animals. He built twenty box stalls in

CONTINUE ON SEPARATE SHEET IF NECESSARY

(See Attachment Sheet B)

row, and a big corn house with two wagon sheds attached. He added a large carriage house for the winter closed carriage, the basket sleigh, and the surrey and open carriage for summer use.¹⁶

Charles lived a princely life, sparing no expense for his own comfort and hobbies. He surrounded his house with the stylish elegance of the Victorian era, seen in the house trim. But Charles was the last Waters to own Pleasant Fields. He and his son, William, shifted from raising horses to selling cars in the 1920s; they bought the Buick agency in Gaithersburg, and lost it, as well as the ancestral home, in the Great Depression of the 1930s. Pleasant Fields was sold at a public auction.¹⁷

After nearly 200 years of ownership by the Waters family, the estate was sold at a sheriff's sale to Harry Hoskinson on April 6, 1932.¹⁸ Hoskinson was a large landowner and farmer in the area. He did not live at Pleasant Fields, but on the adjacent farm.

Eric A. Johnston, a nationally prominent newscaster, bought the houses and barn from Hoskinson's heirs in 1951.¹⁹ He did not live at Pleasant Fields, but used the estate for rest and relaxation, indicating excellent maintenance of the property during the period 1951-1965, slightly more than a decade ago.

In 1965 Pleasant Fields was subdivided, and is now owned by eight firms.²⁰ The buildings nominated belong to Milestone Properties, and are used for storage purposes. The land is actively farmed for cattle raising, and the barn is used by the farmer for hay storage, animal care, etc.

Although the Waters family no longer lives at Pleasant Fields, the two great-granddaughters of William and Mary continue to tend the old graves.

M-NCPPC plans to buy part of this farm, including property 50 feet south of the barn.²¹ The main house is approximately 100 feet west of the barn; the smaller house is about 100 feet east of the barn. Aside from the designated park, the remainder of Pleasant Fields is zoned for single family houses, indicating future owners who would be attracted by an historic landmark on the property.

The significance of preserving the two houses and barn on the edge of a proposed park is to retain a part of their past for Upper Montgomery County residents. The buildings originated in the late 18th century as part of a tobacco plantation dependent on slaves. A country doctor of the 19th century continued the farming operation. In the early 20th century, before income taxes, the third section and trim were added, signifying the relative wealth of that period. After nearly 200 years of ownership, the Waters family lost the property in the Great Depression. A prominent person used the home as a retreat in the mid-20th century, indicating the charm and desirability of the landmark. Preserving these historical buildings would grace the adjacent park, and add appreciably to the preservation of heritage in Upper Montgomery County.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The house is a two story structure, built in three sections. The largest and newest is the frame east end. It has a three bay facade with the doorway in the west bay; the double glazed doors have a high transom light overhead. Windows are double hung sash; the frames are wide, the leads having small peaks or pediments at the center and the sills being bracketed. Across the front is a porch with square posts carrying arched brackets that support the cornice. The main building cornice is bracketed; there is a central gable on each facade.

The center section is two bays and two stories, with double chimneys on the east end. The west bay is a semi-hexagonal bay with round arched windows; the roof of the bay was once balustraded and the window above opened as a door to the balcony. The other windows have the same treatment as those of the frame section. The eaves and raking cornice are bracketed, the brackets being paired; there is an applied board frieze below the eaves.

The west end is a lower, two story, brick section with a three bay facade. The central doorway has a small transom light and the windows are double hung sash with plain surrounds. At the west end there is a flush gable chimney. The porch across the facade has square posts with arched brackets supporting the cornice. The main roof cornice is plain, with an applied board frieze.

The building has a stone foundation. On the west end there are two brick, shed-like structures attached.

West of the house are a frame bankbarn, a shed, and a double corncrib.
