

Addendum to Maryland Historical Trust Maryland Inventory of Historic Properties Form

Inventory No. M: 34-18

Page 1 of 1

Name of Property: Carroll House

Location: 3921 Sandy Spring Road, Burtonsville, MD 20707

The Carroll House, also known as the John Hardisty Property, was previously surveyed in 1998, at which time it was recommended as ineligible for listing in the National Register of Historic Places. It is estimated to have been demolished in 1998. The extant house is visible on Google Earth Pro aerial imagery of April 1993. The available subsequent aerial of April 2004 confirms the residence had been removed.

Resource Count: 2

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Carroll Property is a 2-story, 4-bay house on the south side of Sandy Spring Road in Burtonsville vicinity, Montgomery County. Constructed circa 1900, the building is square in plan, composed of a gable-front and wing building with a front-gable addition within the "L" formed by the front and side-gables. The result is two parallel front-gables with a side-gable in the rear. The house also has an enclosed wrap-around porch on the front, east and south elevations and a projecting, 1-story side-gable addition on the west elevation. The house has four brick chimneys, including one at each gable end of the rear side-gable, one on the rear addition and one on the front elevation.

The structure is of wood frame construction with both weatherboard and wood shingle siding, and it has a stuccoed foundation. The windows are combination of double-hung, casement and fixed sash wood and vinyl windows. The house has an enclosed gable and shed roof porch on the front, east and south elevations. The porch has a wood shingle siding with two fixed sash windows and one 1/1 double-hung window.

portion of the enclosed porch is open on the north, or front facade in front of the eastern front gable. It has a wood corner post, a simple wooden railing and a wood porch floor. The first story entrance is a 15-light panel and glass door located in the open porch of the east front gable. The fenestration pattern is irregular, with one 10-light, fixed sash window on the first story in the west addition and two 28-light fixed sash windows in the enclosed porch. The second story has two double-hung windows, including one 6/6 window located in the gable end above the front door and one 1/1 window located in the west front gable.

The west elevation has an irregular fenestration pattern with four 1/1 replacement double-hung windows and one panel and glass door on the first story. The second story has two 6/6 double-hung windows and a small 6-light casement window in the gable end of the attic level.

The rear, or south, elevation also has an irregular fenestration pattern with two 1/1 replacement double-hung windows, one 2-light window and one glass and panel door on the first story. The second story has two windows, including a 1/1 vinyl replacement window and one 6/6 double-hung window.

The east elevation has an irregular fenestration pattern with a pair of 6-light fixed sash windows, a pair of 1/1 double-hung windows, a set of four 1/1 double-hung windows, a single 6-light fixed sash window and a panel and glass door on the first floor. The side entrance is located under a wooden shed roof extending from the enclosed side porch. The second story has 2 windows, including one 1/1 double-hung vinyl replacement window and one 6/6 double-hung window. Alterations to the building include the enclosure of the wrap-around porch, the one-story addition to the west elevation, and the addition of a brick exterior chimney on the front elevation.

7. Description (Continued)

There is one outbuilding associated with this property. The outbuilding is a dependency, with a front-gable roof with a side-gable addition. Constructed circa 1900, it is of wood frame construction. The structure is located south of the rear of the house.

The property is located on the south side of Sandy Spring Road, with residential property to the east and west, commercial property to the north and forested land to the south. The property's setting is altered from its historic character by the location of Sandy Spring Road approximately 21 meters (70 feet) from the front of the house. Sandy Spring Road, as it passes this property, is a 4-lane divided highway.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Carroll Property is identified in the Old Building Survey of the Burtonsville Area. John T. Hardisty purchased the property from the Director of Finance of Montgomery County on April 1, 1971. Deed references prior to 1971 could not be located. The house, constructed circa 1900, was most likely built as a result of the suburban growth spreading outward from the District of Columbia into Montgomery County.

The Carroll Property is located in Burtonsville, on land originally patented in 1703 as "Bear Bacon" and in 1715 as "Snowden's New Birmingham Manor" in what was then Prince George's County. "Bear Bacon" was approximately 245 hectares (605 acres) of land stretching from present Oursler Road to Old Columbia Pike. "Snowden's New Birmingham Manor" was approximately 1214 hectares (3000 acres) from Old Columbia Pike to the present city of Laurel, and from south of Greencastle and Van Dusen Roads to north of Sandy Spring Road. Later additions to the patent north and northwest of the present junction of U.S. 29 and MD. 198 eventually covered 3749 hectares (9265 acres) by 1743. (Geraci, Walker and Donnary 1976: 4; Cook, 1976: 270-271). As settlement in the new county increased, the need for improved roads became apparent. The Columbia Turnpike Company was chartered in 1809 to build a road from Georgetown, D.C. to Ellicott's Mills, and construction began in 1810 (present U.S. 29 and Old Columbia Pike follow the route of this original road) (Hiebert and MacMaster 1976, 107).

Burton family records indicate that their ancestors settled in the area by 1707. Basil Burton settled east of the turnpike in 1817. Basil's son, Isaac, considered the founder of the community, bought out his family's share of his father's land in 1825, and by 1850 the crossroads of the Columbia Turnpike and the Laurel-Sandy Spring Road was known as Burtons. The community remained small and rural in the decades after the Civil War. It had a population of about fifty people, a Baptist church, a blacksmith shop, a schoolhouse, and a store (Dixon-Williams 1994, A-4).

During the twentieth century the size of Burtonsville increased gradually as the Washington suburbs spread further north, and large employers located their operations in Silver Spring, northern Prince George's and neighboring Howard County. Shopping centers and widened roads replaced the historic crossroads. A 1960s master plan for the Fairland-Beltsville corridor marked eastern parts of Burtonsville as an "employment center" for the area. However, even though public utilities were extended to the community in the early 1970s, a sewer moratorium was imposed before extensive development occurred. Land unsuitable for septic systems also slowed growth in the Burtonsville area (Daniels).

ADDRESS: 3921 Sandy Spring Road, Burtonsville, Montgomery County

8. Significance (Continued)

In the 1980s, continued growth of federal and private sector employment and the new U.S. 29 highway made Burtonsville accessible to new residents and commercial development. Today Burtonsville retains a rural character. Old working farms still remain, but the area is becoming one of the major suburban centers outside of Washington, D.C.

The Carroll Property is a gable-front and wing cottage which has been enlarged. Between 1870 and 1940 the vernacular cottage style was typically built for Americans of modest means. They are characterized by simple ornamentation and mass-produced components, such as door frames, moldings, sash and window units, and porch decoration. The development of post-Civil War machinery capable of producing large amounts of standardized housing elements, such as those found in cottages, contributed greatly to the development of the modern American housing industry. Designs for vernacular cottages were obtained from popular magazines, such as House Beautiful, or carpenter's and builder's journals, such as American Builder. A variety of front-gable, side-gable, cross-gable, gable-front and wing and hipped roof frame cottages were developed in the early to mid-twentieth century. Front-gable and hipped roof cottages are one to two-stories tall, 3 bays wide and several rooms deep. Side-gable, cross-gable and gable-front and wing structures are usually two to two-and-a-half-stories tall, are typically two to three bays in width and vary from one to three rooms deep. They usually include a porch covered with shed roof. Porches are supported by posts often containing machine-produced Victorian ornamentation. Some cottages feature ornamentation drawn from Craftsman style or Colonial Revival architecture (Gottfried and Jennings 1988, viii-xv).

National Register Evaluation:

The Carroll Property, constructed circa 1900, is not eligible for the National Register of Historic Places. The property does not meet Criterion A or B, since there is no known association with historic events or significant persons. It is not eligible under Criterion C due to several additions which have compromised the architectural integrity of the building. The front-gable was added, the wrap-around porch was enclosed and several of the windows have been replaced. Finally, the property has no known potential to yield any information important in prehistory or history, and therefore is not eligible under Criteria D.
