| DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE | |
| <p>The three houses are all built on irregular plans of stone with hipped roofs. Two of the houses have basically square plans, with asymmetrical wings and bays; the third, the home of Edwin Baltzley, has a rectangular central section flanked by towers. Certain features are recurrent themes on all the buildings. The chimneys are flush with the exterior wall and have brick stacks; the fireplaces are reflected on the exterior walls by a bulge or projection outward of the wall surface. Heavy porch posts are turned and carry heavy brackets supporting the porch roof cornice. Windows are generally large and set irregularly in the wall surface, but occasionally a small window lights an alcove or staircase.</p> <p>The Edwin Baltzley house is the largest. It sits on a high foundation, with a four story elevation on the downhill facade. The towers flanking the facade are round and rectangular respectively; the central bay projects forward on the ground floor and has a Flemish gabled dormer in the attic. The "boxed" cornice is made of blocks of stone supported by stone corbellings.</p> <p>The Edward Baltzley house is next to the brother's house. It is square in plan with a porch across the downhill facade. The facade has a central gable; on the sides there are bays and porches that break up the square mass. The frieze is a wide wooden board, with a cornice above.</p> <p>The third house is also square in plan, with wings on each side set asymetrically. Between the wings and main block are porches, the one on the main facade curving around a tower that joins the main block and wing.</p> | |

STATEMENT OF SIGNIFICANCE

In 1889, Edwin and Edward Baltzley bought some land on the heights overlooking the Potomac River and planned to build a permanent community of picturesque and rustic stone houses. Five stone quarries were opened to provide stone in a range of colors and electricity was promised to all residents who wanted it. Roads and building lots were laid out, and a large stone hotel, the Monican, was planned; transportation by electrical railway was also part of the plan, and the one part that was achieved. By 1890 a cafe was built of unhewn logs and named the Paw-taw^{-o-}neck; it included several dining rooms, river overlooks, and an observation tower. On 29 November 1890, the cafe burned down and subsequently, the Glen Echo Chatuqua emerged as the plan for the developing area.

The only homes that survive, and perhaps the only ones built as part of the Baltzley plan, are three large stone castle-like houses built on the edge of the heights overlooking the Potomac River.
