

**MARYLAND HISTORICAL TRUST**

**STATE HISTORIC SITES INVENTORY FORM  
Addendum of Boundary Confirmation**

**RESOURCE NAME:** National Park Seminary Historic District  
**SURVEY NO.:** M: 36-1  
**ADDRESS:** Linden Lane, Forest Glen, Montgomery County, Maryland

Boundary Justification

The boundary of the National Park Seminary Historic District encompasses all contributing historic buildings/structures discussed in the nomination. It also includes the heavily wooded and variable terrain that provides the setting and environmental character that was so significant to the historic function of the buildings, and which continues to buffer them from nearby modern development. Inclusion of the surrounding landscape also captures within the historic boundaries a number of minor structures—rustic footbridges—that were not specifically identified on the nomination.

Verbal Description

The proposed boundaries of the National Park Seminary Historic District commence on the north along the southern edge of the Capital Beltway right-of-way, between Linden Lane and the Metrorail right-of-way. Then (clockwise) southward along the west side of the Metrorail right-of-way to the north side of the Smith Drive Loop. West along the north side of the Smith Drive Loop to the west side of Smith Drive proper. South along the west side of Smith Drive to the southwest corner of the large building (outside the boundary). From this location, establish a line southwest to the intersection of Beach Drive and Linden Lane. West along the north side of Linden Lane to the driveway/parking lot access opposite the Aloha Dormitory. South to the opposite side of Linden Lane beyond the Indian Mission Building. West and north to square off three sides of the Indian Mission Building, and north to the north side of Linden Lane to the point where it forks off into Wilton Avenue. West along the north side of Linden Lane to the point after the Home Economics House that is coterminous with the U.S. government boundary, and northeast along the same boundary to the east side of Linden Lane. From here, north along the east side of Linden Lane to the Capital Beltway right-of-way.

8. Apparent Condition

a. fair c. original site

b. unaltered

**Description:** The district includes both sides of a steep, wooded ravine in which are located about 20 buildings of varying size and architectural quality. The largest structure, the Inn, is 2 stories, stucco, stone foundation, trimmed in wood, with veranda & pedimented pavilion. Other buildings: 1-story chapel (1898) attached to the south end of the Inn; Aloha Dormitory (1898) is stucco with wood trim; 3-story ballroom (1927) with spectacular arches, galleries, timbered roof, & dormers; Odeon Theater (1907) is rectangular with Ionic columns; gymnasium (1907) is 3 stories, rectangular with Greek Revival features; Japanese pagoda (after 1904); Holland windmill (c.1899); Gate House (c.1904); circular stuccoed Castle; bungalow sorority house (1896); Chalet (1899); Mission-style sorority house (1903); Italianate dormitory; formal gardens with sculpture; numerous walkways.

10. **Significance:** National Park Seminary Historic District is significant as an architectural "folly" unique in the State and its history as a finishing school for women makes it important in local history and to the history of women's education as well. Its wooded land and fanciful, exuberant buildings have survived intact amidst 20th century suburbia. The District's life began as the property of Daniel Carroll, & his brother John began his ecclesiastical career here. In 1890 the Forest Glen Inn was built as a resort hotel; after it proved a financial disaster, it was converted by the Cassedys into the main building of National Park Seminary, a finishing school for girls. The majority of the buildings were constructed between 1894 and 1915. Nat'l Park gained a reputation for eclecticism from its sorority houses--each one built in a different style. By the late 1930's, R.T. Davis converted Nat'l Park into a Jr. college. In 1942, it became part of Walter Reed Army Hospital.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

National Park Seminary is located south of the Capital Beltway, east of the Baltimore and Ohio Railroad tracks, and north and west of Linden Lane, in Forest Glen, Maryland. It is part of the Walter Reed Army Hospital and is used as a convalescent center and living quarters for army personnel.

The Seminary grounds include either side of a steep, wooded ravine in which are located approximately twenty buildings of varying size and architectural quality. The largest structure, which is also the oldest, was originally named Forest Glen Inn (1890). It is a two-story stucco building on a stone foundation, trimmed in wood in a vaguely half-timber style. At various points the roof has been raised to add a full third story. A one-story veranda runs along the north facade and a three-story pedimented pavilion juts out from the facade at the entrance (see photograph). There is a band of stained glass over the entrance which says "Ye Forest Inn." After the Inn proved a financial disaster, it was converted into the main building of National Park Seminary (1894).

A three-story stucco wing of the Inn extends to the south. The southern end is finished in a three-story colonnade (see photograph). Corinthian columns support a pediment that contains a round, traceried, stained glass window of stylized roses.

The one-story chapel (1898) is attached to the south end of the Inn. A rectangular building with three-sided bays at each end, it is of stucco with wooden trim and a bell tower. The stained glass is typical of the late nineteenth century. On the interior, the pews are arranged in a semi-circle around the altar. Originally the chapel had green plush auditorium-like seats which the army has replaced with more conventional pews.

The Aloha Dormitory (1898) is located to the southeast of the chapel. It is also stucco with wood trim. The courtyard created by the south end of the Inn, the chapel, and the Aloha Dormitory, is bounded by a one-story arcade. A series of caryatids support the brick arches of the arcade.

Attached to the east end of the Inn is the dining room.

At the west end is a three-story (plus basement) ballroom (1927). From the exterior, the ballroom consists of a tall, stucco structure with peaked dormers lining the roof. On the interior it is quite spectacular. Two-story brick arches with galleries behind them surround the dance floor. Above each bay is a row of niches, each of which contains a piece of sculpture. The ballroom has a timber roof modeled on the hammer beam ceilings of medieval architecture. There is a dormer window in each bay, creating the series of peaked dormers seen on the exterior. Numerous chandeliers hang from the ceiling.

STATEMENT OF SIGNIFICANCE

National Park Seminary is a folly. The fantasy-land feeling of the Seminary in its wooded setting has charmed alumnae, city planners, visitors, local residents, and even its current owner, the United States Army.<sup>1</sup> The naive frivolity and exuberance of the "age of innocence" has survived intact at National Park in the midst of twentieth-century Silver Spring and the Capital Beltway.<sup>2</sup> The extravagances of National Park--its sorority houses, each in a different style; the countless statues throughout the grounds; the three-story ballroom--decry the functionalism of our age.

The educational theories behind the concept of National Park Seminary certainly would be considered follies today. Higher education for women no longer centers on training future gracious wives and mothers. Although the "finishing school" is a dying institution in America, it did express the dominant attitudes toward women's capabilities and roles in society in the days before woman's suffrage and Women's Lib.

The greatest humanitarian contribution of the Seminary has occurred in the last two decades while Walter Reed Army Hospital has used the site as a convalescent center. During World War II, wounded soldiers spent an average of twenty days in the bucolic setting recovering from the ravages of war. A reporter for the Baltimore Sun described this transformation:

[a] one-time finishing school for ritzy sweet young things becomes the healer of the sick and maimed, giving the boys in khaki a luxurious but none the less homelike atmosphere to smooth the comeback trail. There's no suggestion of the hospital about it--and for that the men are grateful.<sup>3</sup>

7. DESCRIPTION, continued

The Odeon Theater (1907) is connected to the west end of the main building by <sup>the music building and</sup> a covered walk way. Basically a rectangular structure, the theater has a large semi-circular bay at its east end, and a portico of Ionic columns running along the east facade. It has a vaguely Greek Revival feeling which is much stronger in the architecture of the gymnasium (1907). The gym is a three-story, rectangular structure (see photograph) with a portico composed of six Corinthian columns supporting an entablature of wreaths and garlands. The entrance facade has two tiers of windows connected by vertical bands of trim reminiscent of Renaissance strap work patterns. At the center of the facade which contains the entrance, a two-story section protrudes. The entrance consists of two pilasters supporting an entablature and a round-arched window on top. Two round-arched windows flank the door. A balustrade runs around the entrance bay.

National Park Seminary gained a reputation for eclecticism from its sorority houses--each one built in a different style. The houses are scattered across the campus. Initially they shared the same plan: a three-story building with one meeting room on each floor. However, some of the houses have received additions which have expanded this usual plan.

The Japanese pagoda (see photograph) is perhaps the most noted of the sorority houses. Built after 1904, it is three stories tall and has the characteristic oriental roof treatment with a series of roofs--one atop each floor--each of which has a pronounced kick at the corners. Originally it was painted with a red-lacquer and had black roofs. It had been assumed that this building came from the 1893 World's Columbian Exposition. However, the pavilion at Forest Glen bears little resemblance to the copy of the Hoo-Den Temple erected in Chicago.<sup>1</sup>

Holland is represented by a windmill (c. 1899, see photograph) which used to have a working blade. Today the windmill is a three-story polygonal structure, pyramidal in shape, covered with blue shingles. A balustrade encircles the structure at the third story. A one-story wing was added to the east end. A gable-roofed one-story projection at the west end serves as the entrance porch.

<sup>1</sup>See the Columbian Exposition Album . . . (Chicago, 1893), 19.

Next to the windmill is the Gate House (c. 1904). This rectangular building has, at the north end, a two-story portico with square piers and a balustraded veranda at each floor (see photograph). The architecture was intended to represent the Georgian style. Palladian windows, cornice trim, Gothic sashes, garlands, and other details of eighteenth century derivation are scattered over the building like roses on a bakery birthday cake.

A circular, stuccoed castle (see photograph) looks across the glen to the Gate House and windmill. Both the central portion and the round tower are crenelated. The first floor lancet-shaped opening on the west side once functioned as a drawbridge which connected to a foot bridge across the ravine. A one-story stone wing was added to the east side.

The first sorority house built (1896) at National Park was the shingled one-and-one-half story structure to the northeast of the entrance to the Inn. The school chose the American bungalow as the theme for the architecture. It resembles an attempt at the revival of an early colonial style.

The Chalet (1899) originally located on the ballroom site, had as its model the vernacular houses of Switzerland. It was constructed with brown shingles which have since been replaced. The walls are flat and white. There are casement windows, a pair of second-story balconies, and wide overhanging eaves.

In 1903, one sorority built a mission-style house modeled on the Santa Barbara Mission. A stuccoed building with characteristic Spanish roofline, it had mission-style furnishings before a remodeling in the 1930's.

The other principle building on the campus is a three-story dormitory executed in the Italianate style. The low-pitched hip roof, the corner tower, and the balcony of the third story, enforce the Italian feeling. Statues were placed throughout the grounds and incorporated with the landscape plans. The sculpture is academic in form and works well in the setting. Originally, National Park had formal gardens intermixed with the natural beauty of the wooded glen. These gardens have deteriorated.

Virtually all of the buildings are connected by covered walkways. The numerous foot bridges across the glen and the ravine to the B & O station are no longer extant because the construction of the Capital Beltway cut the Seminary off from the other side. One bridge does remain providing access to the castle.

National Park Seminary Historic District

8. SIGNIFICANCE, continued

On a local level, National Park is very important to the citizens of Forest Glen, which borders on the west side of the Seminary. The 23 acres of wooded land create a rural vista in the midst of congested, suburban Washington. The Seminary grounds offer welcome open space and lend an air of bucolic dignity to the home owners in the vicinity.

The ground on which the seminary is located once belonged to Daniel Carroll, Commissioner of the District of Columbia. In 1772, his brother, John Carroll, the first bishop and first archbishop of the American Roman Catholic Church, began his ecclesiastical career on the Carroll property.

National Park Seminary opened in 1894 under the direction of Dr. and Mrs. John A. I. Cassedy. They bought the resort hotel, Forest Inn, and converted it to a seminary for women. The Casседys built the majority of the extant structures. In 1916, James E. Ament took over the seminary. His chief contributions consisted of building the ballroom, installing the sculpture, and landscaping the grounds. By the late 1930's, Roy Tasco Davis had replaced Ament and converted National Park into a junior college. In 1942, the U. S. Army cut short Davis' tenure when the property became part of Walter Reed Army Hospital.
