National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word process, or computer, to complete all items.

1. Name of Property

historic name Chapel of the Incarnation
other names PG: ~~85A-32-37~~ 85A-27

2. Location

street & number 14070 Brandywine Road not for publication
city or town Brandywine vicinity
state Maryland code MD County Prince George's code 033 zip code 20631

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments).

8. Statement of Significance

Applicable National Register Criteria

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B Property associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property as yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "X" in all the boxes that apply)

Property is:

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

Section 7 Page 1

DESCRIPTION SUMMARY

The Chapel of the Incarnation is an L-shaped church building of the Mission style, constructed of poured-in-form concrete covered with a coarse pebble-filled stucco to resemble adobe. It is a one-story cross-gabled building with entrance through a lower gabled narthex on the south. Both the gable front of the narthex and of the nave are highlighted by a shaped Mission-style parapet; that of the narthex is surmounted by a cross, while that of the nave is surmounted by an arched bell tower. The nave is four bays long; the window in each bay consists of three slim vertical awning-type windows filled with opaque milky glass. In the lower east corner of the south gable front of the nave is a cornerstone that reads "1916." At the north end of the nave, a two-bay wing extends to the east at right angles. It extends across the back (north) of the sanctuary, and forms a connected parish hall. Its east gable front ends in another shaped Mission-style parapet. Windows in the parish hall wing are of the same opaque milky glass, and of the same three-part awning type as in the nave. The interior is distinguished by original altar balustrade and pulpit, and an ancient stone baptismal font brought from a church in England.

GENERAL DESCRIPTION

The Chapel of the Incarnation is an L-shaped church building of the Mission style; it is constructed of concrete poured in forms, and has a rough surface resembling adobe. It stands on a corner lot in the village of Brandywine.

The chapel is a one-story cross-gabled building with entrance through a projecting lower gabled narthex on the south. Both the gable front of the narthex and of the nave are highlighted by a shaped Mission-style parapet. That of the narthex is surmounted by a cross, while that of the nave is surmounted by an arched bell tower. This arch was originally open; only after the sister chapel of the Atonement closed (in 1925) was the bell removed from the Chapel of the Atonement and hung at the Chapel of the Incarnation.

Entrance to the narthex of the Chapel of the Incarnation is through double panelled doors, each leaf having six panels in cross-and-bible pattern. These doors have replaced the original five-panel doors.¹

Flanking the narthex, the south gable front of the nave is lighted on each side by a slim vertical window, four panes of opaque milky glass hinged at the top. The nave is four bays long. The window in each bay consists of three of the same slim vertical awning-type windows, arranged side-by-side. The windows are now protected on the exterior by a translucent covering, installed in the 1970s when air conditioning was installed in the church. In the lower east corner of the south gable front of the nave is a cornerstone that reads "1916."

¹ The present exterior doors were brought to the Chapel from Mount Lubentia.

Section 7 Page 2

At the north end of the nave, a two-bay wing extends to the east at right angles. It extends across the back (north) of the sanctuary, and forms a connected parish hall. Its east gable front ends in another shaped Mission-style parapet. Entrance at its east gable front is through modern double doors. The doors are sheltered by a gabled entry portico, of dark stained wood, exposed rafter ends, and arts-and-crafts design elements. Windows in the parish hall wing are of the same opaque milky glass, and of the same three-part awning type as in the nave. The roofs of the nave and the wing are covered with red asbestos shingles.

A small sacristy room fills the southeast corner where the nave and parish hall adjoin. Entrance to the sacristy is sheltered by a small shed-roof porch with exposed rafter ends.

There are several later shed-roof additions built on the north side of the parish hall; the line of additions forms kitchen and bathrooms. The additions are constructed of concrete block painted white, and lighted by tandard double-hung-sash windows.

The south double doors lead into the narthex which is lighted by a handsome copper lantern fixture which was originally hanging in the chancel. One continues through a second set of double doors into the nave. The interior doors have glazing (four panes of opaque milky glass) over wood panels. (The original exterior south doors, now replaced, were of the same type as these surviving interior doors.)

The nave is lighted by hexagonal metal lantern-type fixtures, hanging from the ceiling. (They differ from the single fixture in the narthex, in that the lanterns in the nave are tapered.) The central aisle runs between two banks of pews; each pew end is slightly arched and incised with a cross. In 1975, these pews were installed to replace the original Mission-style, straight-backed pine pews. (One of the original pews has been retained, and is located on the west side of the chancel behind the pulpit.)

Above the altar, high in the (north) sanctuary wall is a small gothic-arched stained glass window, a gift from the architect, William J. Palmer. It is illuminated with interior light from the parish hall beyond it. In the chancel to the west is a pulpit of golden oak. The pulpit stands in an ogee-arched opening into the chancel, balanced on the east by a similar arched opening that frames the door into the sacristy. A rear door leads from the sacristy to the parish hall wing, and thence to the kitchen and service spaces to the north. All interior doors have four panes of opaque glass over wood panels.

At the front of the nave, before the pulpit and the entrance to the chancel, stands an ancient stone baptismal font, brought from St. Mary Magdalene Church in Writhlington Parish, England. The heavy octagonal bowl, incised with a Tudor Rose pattern, is said to date from 1422 A.D., while the molded base is said to date from 1000. The font was transported from England in the 1980s, and placed in the chapel as a gift from a parishioner.

The chapel stands on a 1/3-acre corner lot, facing south and fronting on Brandywine Road, with the parish hall opening to the east onto Missouri Avenue, in the village of Brandywine. Just outside the south entrance stands a round-arched stone marker with the words "Chapel of the Incarnation." Much of the south front of the chapel and narthex is covered with ivy. In the southeast corner, at the entrance to the sacristy is a large old cedar tree. On the adjoining lot (a separate parcel, not part of this nomination) to the north, and fronting on Missouri Avenue, is a front-gabled frame cottage, recently acquired by the church and now a tenant residence.

SIGNIFICANCE SUMMARY

The Chapel of the Incarnation is significant under Criterion C for its architectural character. It is unique in Prince George's County in its application of the early 20th century Mission/Spanish Colonial Revival style to an ecclesiastical building. The Mission style may have been deemed appropriate to the church's status as a "mission chapel," or offshoot, of St. Thomas' Church in Croom. The Chapel of the Incarnation is constructed of poured concrete, with a stucco surface that resembles adobe, and is highlighted by a shaped parapet and bell-tower. Architect William J. Palmer, who had designed numerous residences and churches in Washington, D.C., prepared the plans and specifications for the church and attached Parish Hall. The cornerstone was laid in September 1916, and the chapel opened for services by early 1917.

HISTORICAL BACKGROUND

Early in the nineteenth century the region around Brandywine was a rural area, dotted with small farms and large plantations; tobacco was the principal crop, and the economy was based upon agriculture and slave labor.

There was a small village at Brandywine by the early years of the nineteenth century, at the intersection of the old road from Woodville (Aquasco) with the road to Indian Head in Charles County.² The first store and post office were established by 1846, approximately one mile east of the present village.³ On the eve of the Civil War, the store and post office were operated by William H. Early. His farm and dwelling house (recently demolished) adjoined the store.⁴

The construction of the Baltimore and Potomac Railroad after the Civil War changed the face of Prince George's County. Planters of the eastern and southern section of the County had long felt a need for transport of their produce to market in volume, and by the early 1850s a movement had begun to establish a railroad line between Baltimore and Southern Maryland. A group headed by members of the Bowie family succeeded in obtaining a charter to form the Baltimore and Potomac Railroad Company, but plans for construction were

brought to an abrupt halt with the beginning of the Civil War. Finally, in 1868, construction began on the 73-mile line from Baltimore to Pope's Creek on the Potomac in Charles County. The first trains ran in 1872.⁵

The construction (between 1868 and 1872) of the Pope's Creek line through the Nottingham and Aquasco Election Districts created a substantial increase in population, and a new (11th) Election District called *Brandywine* was established in 1872 from parts of the Nottingham, Aquasco and Piscataway districts.⁶ The new railroad line also opened up new business opportunities, and early in 1872 William H. Early, merchant and postmaster, purchased 42 acres of land which lay along the tracks on both sides of the public road between Washington and Woodville. It was this parcel of land which was to become the nucleus of the railroad village of Brandywine.⁷

At approximately this time, 1872, Early constructed a new general store immediately west of the tracks, fronting onto the north side of the public road. This building served as the general store and post office until a separate small post office was built across the road around the turn of the century. Early's business prospered, and he bought up more and more of the neighboring land. By the time of his death in 1890, he owned 3000 acres in the Brandywine area, constituting most of the village itself.⁸

By 1870 a second railroad line was already planned for this area. The Southern Maryland Railroad Line was constructed in the early 1880s; it curved southeast from Brandywine into Charles and St. Mary's Counties, and brought more business to the junction village. During the construction of this second line, the population of Brandywine reached its peak, circa 250.⁹

In the mid 1870s, Robert A. Bowie, a surveyor and civil engineer who in 1876 married William H. Early's daughter, Margaret, surveyed and drew a plat for the planned Brandywine City. The plan showed a large grid centering on the junction of the Pope's Creek line of the Baltimore and Potomac Railroad with the (then proposed) Southern Maryland Line. According to the plat, the old TB, Woodville, Brandywine and Washington Stage Road, renamed Sabine Street, was to constitute the main street running east and west through

Section 8 Page 3

the village; twelve north-south cross streets, which bore names of some of the prominent local families (e.g., Early, Bowie, Wilson, Townshend and Osborn) defined the 56 blocks of 34 building lots each. Three of these blocks were laid out as formal parks, and one oversize block was reserved for the passenger and freight depot just southwest of the junction of the two railroad lines.¹⁰

The envisioned development of this land, however, never materialized. The population of the railroad village peaked in the early 1880s, as high as 250 in 1882, including four merchant establishments, several saw mills and grist mills, wheelwright and blacksmith shops; the town included also several railroad agents and foremen, carpenters, physicians, etc.¹¹ By the end of the 1880s, however, after the railroad construction was completed, the population had dropped to 60. It remained at approximately this size well into the twentieth century.

After the death of William H. Early in 1890, his approximately 3000-acre estate was divided among his heirs. Surveyor Thomas H. Latimer surveyed and platted all of Early's land holdings, and an appointed commission allotted all parts of the land to Early's children and grandchildren. A few of the fine houses built by these children and grandchildren still stand, as well as the general store and the later (1912) bank building. Members of the Early family continued to be active in many aspects of the village development - e.g., Charles S. Early, Jr., was one of the Directors of the bank, which was incorporated in 1912, and was chairman of the building committee of the Chapel of the Incarnation, certainly one of the most noticeable pieces of architecture in the village.

The bustling city envisioned by Robert Bowie in his plat of the 1870s never materialized, and Brandywine remained a small residential crossroads village. The hotel at the railroad junction housed many traveling businessmen and laborers, but by the turn of the twentieth century, there were still only about a dozen buildings clustered around the junction.¹² During the second decade of the twentieth century the small bank and the substantial brick schoolhouse were built, as well as the Episcopal chapel, a mission chapel for St. Thomas' Parish. During the 1920s and 1930s a few bungalow style dwellings filled in the spaces between the older dwellings, and finally, in the 1950s and 1960s, areas around the junction were subdivided for modern residences. A few more commercial buildings have appeared along the main street, and a new bank and post office were constructed in the 1970s, but Brandywine remains a quiet, principally residential rural community.

Section 8 Page 4

PERIOD OF SIGNIFICANCE

The period of significance of the Chapel of the Incarnation extends from 1916 with the building of the chapel to 1950 and the beginning of the modern period.

RESOURCE HISTORY

The Chapel of the Incarnation is a unique example in Prince George's County of Mission-style church architecture. Highlighted by a shaped parapet and bell-tower, and a surface which resembles adobe, it is a distinctive landmark in the village of Brandywine.

The village of Brandywine came to prominence after the construction (1868-72) of the Baltimore and Potomac Railroad, Pope's Creek line, through southern Prince George's County. Within a few years, a connecting line, the Southern Maryland Railroad, was constructed, making Brandywine the commercial junction of these two railroad lines. Building lots were platted and replatted, and the population grew.¹³

At the beginning of the twentieth century, there was still no church in the village. Brandywine was within St. Thomas' Parish, but the main church, St. Thomas', was in Croom, six miles to the northeast. St. Thomas' itself had been built 1742-1745 as a chapel-of-ease for St. Paul's Parish, but had become its own Parish in 1850. At the beginning of the twentieth century, the nearest mission chapel (Church of the Atonement, built 1874) of St. Thomas' Parish was in Cheltenham, three miles to the north.

As early as 1913, an Episcopal Sunday School was meeting regularly in Brandywine. Several women of the Brandywine community were actively involved in setting up the Sunday school, an effort which subsequently led to the establishment of the chapel itself. Mary P. Early was the wife of James A. Early, one of the William H. Early's grandsons who operated a stable, saloon and warehouse in the village.

Rose Jeannette Smith was the wife of Julius K. Smith, local hotelier; Mrs. Smith was appointed attorney for the Brandywine Sunday School. Both of these women, as well as Margaret Baden and Eleanor Reeve, were instrumental in the establishment of the Chapel of the Incarnation.¹⁴

¹³ See Maryland Inventory form PG85A-32 (Brandywine Historic Community), and National Register Nomination PG85A-32-9 (William W. Early House).

Section 8 Page 5

Herman Badenhop, one of the founders of the Bank of Brandywine, had in 1910 acquired a parcel of land on the north side of the Brandywine road. Between 1913 and 1915, he deeded a total of one-third acre of this land to Mary P. Early, trustee of the Brandywine Sunday School.¹⁵ There must have been significant local determination to have a mission chapel in the Brandywine community, because at a meeting at St. Thomas' in July 1915, the Vestry resolved to give "hearty support to the building of a chapel in the Parish at Brandywine."¹⁶ A year later Herman Badenhop and his wife, together with Mary P. Early, conveyed to the Vestry of St. Thomas' Parish the one-third acre of land on the north side of the Brandywine Road for the building of a mission chapel. Badenhop joined in the deed for the purpose of "vesting good and sufficient title" to the land, and R. Jeannette Smith signed as attorney for the Brandywine Sunday School.¹⁷ The Vestry mortgaged the land to the Bank of Brandywine, and the Bank loaned \$1200 to the Vestry. The mortgage instrument records that "Mary P. Early, R. Jeannette Smith, Margaret M. Baden and Eleanor Reeve . . . executed and passed unto the said Bank of Brandywine their joint and several promissory notes for \$1200."¹⁸

A building committee was appointed consisting of Charles S. Early, Jr., as chairman, as well as Frank A. Robinson and Julius K. Smith, the local hotelier. A contract was drawn up with architect William J. Palmer of Washington, D.C., to build the chapel and parish hall according to already approved plans and specifications, for \$3000. In addition to the money loaned by the Bank of Brandywine, which held mortgage, money was borrowed from the Diocesan Church Building Fund in Washington, D.C. During the course of 1916, a series of local fund-raising events were sponsored by the church - oyster suppers, bazaars, "ice cream and parcel post" sales, etc.¹⁹ The establishment of the chapel in Brandywine was supported not only by the Episcopal community, but by the brotherhood of Masons in the area.²⁰

The cornerstone was laid, 27 September 1916, and the event was described in the *Prince George's Enquirer* as follows:

¹⁵ Prince George's County Deeds #97:135, #109:390

¹⁶ St. Thomas' Vestry records, 1915 (M1202 microfilm, Maryland State Archives)

¹⁷ Prince George's County Deed #120:334

¹⁸ Prince George's County Mortgage #120:335

¹⁹ *Prince George's Enquirer*, 28 July, 4 August, and 1 December 1916; Vestry Minutes, St. Thomas' Parish, 30 July 1916.

²⁰ The close small-town atmosphere of this entire project is reflected in the fact that Charles S. Early, Jr., chair of the Church Building Committee, was also Vice-President of the Bank that held the mortgage; Julius K. Smith, witness to the mortgage, was also a member of the building committee; and Herman Badenhop, who sold the property to the Church Sunday School and later to the Vestry, was the Notary Public who verified the mortgage agreement.

Section 8 Page 6

"The cornerstone of the Episcopal Church at Brandywine was laid on Wednesday with appropriate ceremonies by the Bishop of Washington, and by Centennial Lodge. . . . There were a number of visiting clergy [and members of several Masonic Lodges] . . . The Bishop made an address in which he laid stress on educating the youth of the country, declaring that upon the intelligence of the community depended its religious and material advancement. . . . The church when completed, will cost about \$4,000 and will be constructed of concrete tile. The main auditorium will seat 150."²¹

The "main auditorium" refers to the Parish Hall, part of Palmer's original design. Construction of the chapel continued directly after the laying of the cornerstone, probably supervised by the architect. The first service may have been as early as Christmas of 1916, certainly before Easter 1917.²² The finished chapel was a fine example of the Mission Style of architecture, highly unusual for this region. The choice of this style is as yet unexplained, although it is clear from Diocesan archives that Palmer's plans had been approved by Bishop Harding before the local building committee had a chance to consider them. Letters between Reverend Haupt (Rector of St. Thomas' Parish) and the Bishop indicate that William W. Early (railroad executive, cousin of the building committee chairman, and owner of the most handsome new house in the village) raised substantial objections to the plans. The building committee, however, approved Palmer's plans by majority vote in July 1916.²³

William James Palmer (1862-1925) was a lifelong resident of Washington, D.C. He practiced architecture in Washington and nearby communities at least from 1887 to 1916. His earliest designs seem to have been for semi-detached houses and row houses in Washington:

- 1887, 1400 15th Street, N.W.
- 1895, 1517 U Street, N.W.
- 1896, 1827 and 1829 Phelps Place, N.W.
- 1898, 435 and 437 Massachusetts Avenue, N.W.

He also designed churches in Washington, including the Dumbarton Street Methodist Church in Georgetown, Union Methodist Church and his own home church, the Fifth Baptist. Outside of Washington he designed, in

addition to the Brandywine chapel, the Park Heights Avenue Methodist Church in Baltimore, and the Frederick Methodist Church in Frederick, Maryland. In fact, the headline of his obituary in the Washington *Sunday Star* labeled him "Church Architect."²⁴

Palmer seemed inclined to regional revival types. One of his most outstanding designs is the attached residence at 2344 Massachusetts Avenue, N.W., dating from 1907. For this 3 1/2-story building, Palmer used brick and limestone to produce considerable surface variety, and surmounted the facade with ornately parapetted dormers, recalling Dutch and Flemish guild houses of the Renaissance.²⁵ Palmer created a somewhat simpler design for a townhouse in the same block (2360 Massachusetts Avenue); dating from 1911, this Classical Revival townhouse was the home of the Palmer family from 1911 to 1914.

Toward the end of his life, William J. Palmer served as architectural engineer for the U.S. Veterans Bureau. He died of a cerebral hemorrhage, 5 June 1925, at his home at 84 V Street, NW. He was buried in the family plot at Congressional Cemetery.²⁶

The Chapel of the Incarnation is a unique example in Prince George's County of Mission-Style church architecture; as such it embodies the distinctive characteristics of this type of architecture. With its poured-in-form concrete structure and pebble-filled stucco surface, it also exhibits an unusual method of construction. Built as a mission chapel for the southernmost residents of the St. Thomas' Parish, the Chapel of the Incarnation played an important role in southern Prince George's County; it exemplifies the cultural, historical and religious heritage of the County in its rural village communities. Distinguished by its shaped Mission-Style parapet and bell-tower, and its setting on a prominent corner lot, it is an established and familiar visual feature of the Brandywine community.

RESOURCE ANALYSIS

The Chapel of the Incarnation is a unique example in Prince George's County of Spanish Mission Style church architecture. Other Episcopal churches of this period in the County tend to reflect either Gothic Revival or English Tudor Revival style of ecclesiastical architecture. Examples of Gothic Revival include St. George's in Glenn Dale (1892), and St. James in Bowie (1906); and of English Tudor, Pinkney Memorial in Hyattsville (1915), now destroyed, and St. Mary's in Aquasco (1920).²⁷ Many of the Methodist churches of this period

were of a modified Gothic Revival, such as Bells in Camp Springs (1910), Forest Grove in Centreville (1914), and Union in Upper Marlboro (1916).²⁸ Others, especially the African-American Methodist churches, were of the simple meetinghouse form, like St. Thomas in Baden (1911) and Ridgely (1921).²⁹ There is no other known example of Spanish Mission Style church architecture in Prince George's County.

As for the style chosen for the Brandywine chapel, the building committee and Architect Palmer were ahead of their time for rural Southern Maryland. The Spanish Mission Style houses which became so popular in early twentieth-century suburbs did not begin to appear in Prince George's County until the late 1920s. At that time, this type of small dwelling, with shaped parapets and stuccoed, adobe-like surfaces were being built in suburbs like Riverdale Park and Hyattsville.³⁰ Some were built by the owners from Sears Roebuck or similar plans, others by developers recognizing the popularity of such an economic model.

Examples of the Spanish Mission Style in residential buildings have not been found in Prince George's County before 1920, and there are no other known examples of the style in ecclesiastical buildings. The Chapel of the Incarnation is a unique example, and a very important one in the architectural and cultural history of Prince George's County.
