DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

All Saints' Church is located in the triangle formed by the intersections of Maryland Route 4, Maryland Route 2, and Lower Marlboro Road (Maryland Route 262), south of Sunderland, Maryland.

This Georgian structure is of Flemish bond brick with random glazed headers. It is three bays wide and four deep. All the walls are composed of a series of round-headed brick arches recessed to the ground level. In these panels are set the windows and doors on two stories. The windows are all six-over-six with segmental arches and old shutters. The water table is composed of a flat projecting brick, topped by a cyma reversa mold, topped by a cyma recta. The church has a gently sloping "A" roof.

The interior walls of the church are a series of square piers and recessed two-story round-headed arches into which the windows are set. The north and south walls have galleries, each supported on five square piers. The east and the west walls have round windows on the second story level. The box pews have simple paneling. The church presents a well-restored, pleasing appearance.

STATEMENT OF SIGNIFICANCE

The history of the present (1972) All Saints' Church building is unusual because it is so well documented. Due to All Saints' being a "state church" the published volumes of the Archives of Maryland contain pertinent documented source material on the building. Special reference is given to the establishment of All Saints' Parish in 1692 and to the erection of the present church building between 1774 and 1777. The original vestry books refer to additions made in 1703 to the first church structure (1695), which building is no longer extant. The Works Progress Administration (WPA) compiled the Inventory of the Church Archives of Maryland, which dates the construction of the extant building between 1774 and 1777. It also names Cleland and Heathman as the builders.

This extant building, the second on this site, was built with county taxes while Thomas Claggett (1743-1816) was the Rector. He later became the first Bishop of the Protestant Episcopal faith to be consecrated in America.

Calvert County taxes, authorized by the government of Maryland, paid for the present All Saints' Church building. In 1774, when construction began, the Church of England was the official government-supported church in Maryland. Since the establishment of the official church in 1692, the creation and establishment of parishes, the erection of church buildings, the purchase of church property, the format of church worship and other ecclesiastical concerns fell under the control of the Maryland Assembly and the Governor. The Bishop of London also exercised control over the Maryland church. He appointed the first minister to All Saints' Church, Thomas Cockshutt (or Cockshute), who received from the Colonial government a twenty pound (£20) bounty for accepting the Calvert County post. That eighteenth century vestrymen were viewed as civil officials is indicated by the fact that the justices of Calvert County appointed the first All Saints' Church vestry in 1692.
