DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The building is a large red brick structure of the late Victorian period set on a stone foundation. The style is Queen Anne, with French Second Empire and Italianate influences, particularly in the bracketing of the tower cornice and the mansard roof. In the rear, stair towers between the pavillions and main structure have ogee-shaped roofs. Across the main facade is a two story porch with iron columns and decorative brackets. The porch runs between the two end pavillions, with their center gables. The connecting wing has a central tower and gables midway between the tower and pavillions. On the gables and tower are Queen Anne Style decorative motifs in brick. The tower has an iron railing above the wide cornice and a cupola with pedimented hipped-roof. Star decorative motifs are used in both the columns and wooden dormer window surrounds. Front staircase has parapets of molded brick in segmental arch and modillioned forms. Windows and doorway arches are segmental.

A chapel in a Queen Anne style has bracked bargeboards and a bracketed porch. The pointed-arched gable panel enframes a circular window. The nave windows are pointed arches. The rafter ends are cut in decorative patterns. Buttresses are set at an angle at the corners and between each window along the nave walls.
