DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p>The Sandy Spring Friends Meeting House is located on the east side of Meeting House Lane just south of the intersection of Maryland Route 108 and Meeting House Lane in the center of Sandy Spring, Maryland.</p> <p>This is a large, Flemish bond, brick, Federal-styled Quaker Meeting House, built in 1817. It is six bays long and three deep and two-and-a-half stories in height, with a broad, steeply-pitched (approximately 45°) "A" roof. There are two doors on the west, occupying the second bay toward the center from each end. There is also a door in the central bay of each facade of the building. All the doors have overlights, flat, brick arches, and each is a three-panel double door. All the windows have flat, brick arches. On the first story they are twelve over twelve and on the second, twelve over eight; each contains old, bubbly glass. On the exterior wall of the structure there are four windows set high in the wall between the first floor and the interior "gallery" levels. The interior is entirely open with a flat ceiling under which is the paneled and plastered gallery, in excellent condition, supported on simple, square posts.</p> <p>The Sandy Spring Friends Meeting House stands in a grove of large trees, near the urban center of Sandy Spring in Montgomery County. The nine acres designated affords protection for this serene, tranquil, meeting house site away from the rapidly developing metropolitan Washington, D. C. suburbia.</p>

STATEMENT OF SIGNIFICANCE

Several figures of national importance--the first President of the Baltimore and Ohio Railroad, the inventor of an early refrigerator and an innovational deep plow; the designer of the first iron hull steamboat, a surveyor of the Louisiana Purchase; the authoress-designer of a mid-nineteenth-century cookbook and of seals used by the United States House of Representatives and the Senate respectively--were associated with the Sandy Spring Friends Meeting House. They shared a common Quaker heritage as well as family ties with three "founding" families of the Meeting and the Sandy Spring area of Montgomery County, the Brookes, the Thomases and the Snowdens.

From the vantage point of Quaker history the 1828 visit to the Meeting House of Elias Hicks (1748-1830), the Quaker reformer, is in significant perspective. Hicks' oratory which expounded a new religious outlook that was man-centered rather than Jesus-centered and which occurred contemporaneously with an upsurge of evangelism, let to a "schism" in the Quaker faith and to the subsequent decision of the Sandy Spring Meeting to support Hicks' "liberal" views rather than older "orthodox" Quaker tenents.

Philip Evan Thomas who ascended to national prominence as the first President of the Baltimore and Ohio Railroad was related to the Thomas family, one of the founding families of the Sandy Spring Meeting House. His family was instrumental in the construction of the brick Meeting House.

Thomas Moore was known for his successful agricultural experiments on his model farm and for his inventions, a revolutionary-type deep plow and a portable refrigerator. He married Mary Brooke, a descendant of James Brooke, the first settler of Sandy Spring. The first meetings of the Sandy Spring Friends took place at his residence.

Moore's talents included engineering: he constructed a causeway in the Potomac River from Mason's Island to the Virginia shore; he laid out part of the National Road for the

War Department; and he was Chief Engineer for the Chesapeake and Ohio Canal and for the James River (Virginia) Canal.

Thomas Moore's brother-in-law, Isaac Biggs, operated the first school in Sandy Spring, helped to implement Pierre L'Enfant's design for Washington, and participated in the initial survey of the Louisiana Purchase. A third brother-in-law, Caleb Bently, was a clockmaker, silversmith, farmer, merchant and first postmaster of Brookeville, (Montgomery County), Maryland. Bently sheltered President James Madison and Attorney General Richard Rush on their flight from burning Washington, D. C. in the War of 1812.

Mary Mathews Brooke, a Quaker minister who traveled extensively for the Friends, raised John Elgar, the builder of the first iron-hull steamboat. Mrs. Brooke rode with Elgar on the maiden voyage up the Susquehanna River. Another Brooke descendant, Elizabeth Brooke Ellicott, corresponded with Dolly Payne Maddison. Her daughter, Betsy Ellicott Lea, wrote Domestic Cookery, Useful Recipes, Hints to the Young Householders (1851), a well-used nineteenth-century cookbook.

Although not directly related to the founding families of Sandy Spring Meeting, Edward Stabler, the engraver of the present (1971) seals used by the Department of the Interior and the Peabody Institute (Baltimore), had close ties to the meeting. Stabler, in his day, designed seals used by the Treasury Department, the House of Representatives, the Senate (press and counter seal only), the Baltimore and Ohio Railroad, the Smithsonian Institution and the Post Office Department. His mother, a pillar of the Meeting, braved the hazardous journey to the first Yearly Meeting of Western Friends (1813) in Ohio in order to represent the Quakers of Sandy Spring.
