PRINCE GEORGE'S COUNTY  
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #61-2

Building Date: late 18th c.,  
1895

Building Name: Orme-Shaw House

Location: 11601 Caverly Avenue, Beltsville, Maryland

Private/Residence/Occupied/Good/Inaccessible

Description

The Orme-Shaw House is a two-part frame dwelling: a small late eighteenth century log structure, to which a larger two-story section was added about one hundred years later. The older, log section of the house is side-gabled, one and one half stories high, with a facade-wide porch; the shed roof of the porch is integral with that of the house. The log was covered with German siding, probably at the time of construction of the two-story section; both sections were subsequently, in 1932, covered with rectangular shingle siding, stained a dark red. The steeply pitched gable roof is covered with gray asbestos shingle. At the north gable end of the log section is an exterior corbelled brick chimney. Attached to the west rear elevation of the log house is a one-story kitchen wing forming a T shaped plan. The larger two-story section of the house was built onto the south gable end of the older log section in the 1890's; its main east facade is flush with the porch of the log section. It is side gabled and three bays by two, with entrance in the third bay of the east facade through a door with a modern Colonial Revival surround.

Significance

The Orme-Shaw House is an unusual example of a modest eighteenth century log dwelling, expanded in the 1890's by the construction of a larger wing. The original log structure was built for Priscilla Orme late in the eighteenth century, and served as the residence for forty years of Evan Shaw; it was more than doubled in size at the end of the nineteenth century. The land on which the house stands is part of a tract called Edmonston's Range, 164 acres of which was deeded in 1773 by Archibald Edmonston to his daughter, Priscilla Orme. After the deaths of Priscilla and Robert Orme, their children petitioned the Chancery Court in 1822 to sell the property; it was purchased in 1824 by Evan Shaw, and was his home until 1865. The 30 acres including the log house came into the possession in 1895 of William S. White, who built the two-story wing soon after his purchase. The addition was typical of modest frame houses of the 1890's, but was unusual in that it was built onto a much older dwelling of totally different style and construction. The Orme-Shaw House is one of few examples of a two-period vernacular dwelling, and a rare surviving example of an eighteenth century log house.

Acreage: 17.983 acres

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Orme-Shaw House is a two-part frame dwelling: a small late eighteenth century log structure, to which a larger two-story section was added about one hundred years later. It is distinguished by its unusual roofline, and its setting in a wooded oasis within an urban area.

The older, log section of the house is side-gabled, one and one half stories high, with a facade-wide porch. It is four bays wide with entrance in the second bay of the main east facade; the door is panelled and glazed, and has a plain board surround. The third bay was originally a second door but was converted into a window in this century. The shed roof of the porch is integral with that of the house; it is supported by chamfered wood posts, and has a poured concrete floor.

This original log section measures 36 by 16 feet. The log was covered with German siding, probably at the time of construction of the two-story section; both sections were subsequently, in 1932, covered with rectangular shingle siding, stained a dark red. Windows are 6/6 double hung sash with plain board surrounds and louvered wood shutters painted a pale green. The steeply pitched gable roof is covered with gray asbestos shingle. One shallow gable dormer breaks through the east plane of the roof; it encloses a small 6/6 double hung sash window. On the rear a long three-window dormer spans nearly the entire west plane of the roof; this long shed dormer was constructed in 1932. At the north gable end of the log section is an exterior corbelled brick chimney. At the south gable end, where the old log section joins the two-story section, is an interior brick stove chimney. There is no basement.

Attached to the west rear elevation of the log house is a one-story kitchen wing with the ridge of its gable roof at right angles to that of the log section. It is three bays by one, and siding, roof and window treatment are the same as the older log section.

Interior plan of the log section is two rooms side-by-side; each was originally warmed by a fireplace in the gable end wall, and there was an enclosed two-run stair in the east corner between the two chambers. This staircase has recently been opened. The north parlor is now panelled with wood, and a new brick fireplace was constructed in place of the original stone. In the larger south parlor is a large Colonial Revival mantel, with plaster of Paris ornaments (shell patterns and swags); this fine mantel was installed at the turn of this century. In the ceiling of the south parlor one can see the adzed beams, pegged into a cross beam at the west where the kitchen wing is attached.

The larger two-story section of the house was built onto the south gable end of the older log section in the 1890's. Its main east facade is flush with the porch of the log section. It is side gabled and three bays by two, with entrance in the third bay of the east facade through a modern door with a modern Colonial Revival (broken pediment with fluted pilasters) surround. Windows are 6/6 double hung sash with plain board surrounds; modern keystone board lintels have been applied above the windows on the west elevation. As in the older log section, the original siding is covered with rectangular shingles painted dark red, and the trim is painted a pale green. Only the windows on the west elevation have shutters. The second story window in the first bay of the west elevation is downset to light the stair. The cornice is boxed and plain. The gable roof is covered with gray asbestos shingle. There is no basement.

Interior plan of the two-story section consists of side stairhall and one large parlor. The open-string stair rises along the north wall of the stairhall. It has a turned newel with spherical cap, and turned balusters. The parlor is adorned with (newly installed) Colonial revival architrave moldings, while the trim in the stairhall is the original multi-band molding with bullseye corner blocks. The architrave moldings were installed circa 1932 during repairs to the house. In 1932 a hurricane destroyed the original flat roof of the two-story section; subsequent repairs included replacing the flat roof with the present gable roof, replacing the original 2/2 windows with the present 6/6 sashes, and installing the interior architrave moldings.

The house stands on a wooded enclave, surrounded by level grounds, and buffered by evergreens. The house is approached by an unpaved drive which leads from the north and circles the house. A small barn stands to the northwest; it was built in 1975, and replaces an older barn which was destroyed by fire in 1952.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Orme-Shaw House is an unusual example of a modest eighteenth century log dwelling, expanded in the 1890's by the construction of a larger wing. The original log structure was built for Priscilla Orme late in the eighteenth century, and served as the residence for forty years of Evan Shaw; it was more than doubled in size at the end of the nineteenth century.

The land on which the house stands is part of a tract called Edmonston's Range, 164 acres of which was deeded in 1773 by Archibald Edmonston to his daughter, Priscilla Orme.<sup>1</sup> This 164-acre parcel was after that known as "Priscilla's Lot", and the original log dwelling, probably built soon after 1773, became the home of Priscilla and Robert Orme. In 1798, at the time of the first Federal Direct Tax Assessment, it was described as "a log dwelling house on part of Edmonston's Range, 36 x 16 feet; 4 windows, 3-4 by 2; 3 windows, 1-8 by 1-4" with three log outbuildings on 164 acres.<sup>2</sup>

After the deaths of Priscilla and Robert Orme, their children petitioned the Chancery Court in 1822 to sell the property for their benefit. Joseph J. Jones was appointed trustee, and in 1824, he sold Priscilla's Lot to Evan Shaw. The property was described as follows: "part of Edmonston's Range, ca. 164 acres, near Vansville, about 25 miles from Baltimore and 13 miles from Washington. Improvements: a comfortable log house, 2 rooms above and 2 on lower floor with good brick chimneys, good kitchen and weaving house, meat house, corn house and stable, hen house, orchard, garden, and spring 100 yards from the door."<sup>3</sup> This house served as the home of Evan Shaw and his wife, Verlinda, until his death in 1865. Shaw farmed the land, and it was he who deeded land north of the Colesville Road for the establishment of a Methodist Church. This Methodist meeting house (no longer standing) was for many years a local landmark; the road which runs between Colesville in Montgomery County eastward to the Baltimore-Washington Turnpike, was also described as the road leading "from Shaw's Meeting House..."<sup>4</sup>

Evan Shaw died in 1865, and devised his real estate, after the death of his wife, to two of his former slaves, John Edward Lee and Ann Virginia Brogden.<sup>5</sup> After several Court cases regarding the property, it was sold by Lee and Brogden, and 30 acres including the log house came into the possession in 1895 of William S. White.<sup>6</sup> It was White who built the two-story wing soon after his purchase.<sup>7</sup> The two-story addition was typical of modest frame houses of the 1890's, with interior trim characteristic of that period. The house was rendered unusual by the fact that it was built onto a much older dwelling of totally different style and construction.

During the early part of this century, the enlarged house was the residence of R. LeGrande and Mary V. Johnston, two artists who raised their family there and installed the Colonial Revival mantel in the south end of the log section.<sup>8</sup> The Johnstons sold their 30-acre lot to Elliott Hubbard in 1914.<sup>9</sup> After damage caused by a hurricane in 1932, Hubbard rebuilt the roof of the two-story section. He replaced the original flat roof with the present gable roof, and added the long shed dormer in the rear of the log section. Dr. Champo, who purchased the property in 1951, rebuilt the chimney and fireplace at the north end of the old log section, and restored the house to its present condition.<sup>10</sup>

The Orme-Shaw House is one of very few examples of a two-period vernacular dwelling, and a rare surviving example of an eighteenth century log house. The closest parallel is the William Duley House near Croom (82B-7); its earliest section was built circa 1800, and the wing was added in the 1870's.<sup>11</sup> The Orme-Shaw House is an important survival of an early house form, and an interesting example of architectural expansion.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The house is a 2½ story shingled house of three bays with the entrance in the east bay of the south facade. The door surround is Colonial Revival. The cornice is boxed but not returned; window surrounds are simple boards. There is a small chimney on the east end.

The the east is a 1½ story wing with an integral porch supported by five posts. The addition has a low dormer on the south facade and a large chimney on the east end. It is of four irregular bays with a door in the second bay from the west. According to Wilthong, the lower wing is log construction. It is undoubtedly the older part of the house but has been much altered.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The house is built in two sections. The east section is one-and-one-half stories with a porch roof integral with that of the house. It is four bays wide, with entrance in the second bay. There is one dormer on the south (main) roof slope, and a freestanding brick r placement chimney at the east end. The house is built of log, covered by clapboard, which is covered by shingle. The old kitchen wing, just to the north, was attached in the 1960's.

Built onto the west gable end of this older section is the larger two-and-one-half story, frame, gable-roofed structure which has become the main block. It is three bays wide, with entrance in the third bay of the main south facade, and with a Colonial Revival door surround.

BUILDER/ARCHITECT

## STATEMENT OF SIGNIFICANCE

The one-and-one-half story log section of this house was built late in the eighteenth century by Robert and Priscilla Orme on a part of Edmonston's Range which her father, Archibald Edmonston, had deeded to her in 1773 and called "Priscilla's Lot". When, after Priscilla's death, her heirs applied for division of the property, the house was described as a "comfortable log house, two rooms above and two on lower floor, with good brick chimneys". The house and farm were accordingly sold in 1823 to Evan Shaw; in his will, probated in 1857, Shaw left the house and farm to his wife, Verlinda, with the understanding that after her death it was to go to two of their slaves, John Edward Lee and Ann Virginia Brogden.

The larger west section of the house was built during the last quarter of the nineteenth century. The resulting two-part house is an interesting example of architectural expansion.

PRINCE GEORGE'S COUNTY  
HISTORIC SITES SUMMARY SHEET

P.G. County Survey : 61-2 Date ca. 1780, ca. 1875  
Building Name Orme House (Culver House)  
Location 11601 Caverly Ave., Beltsville, Md.  
Open to Public yes  no

This house is built in two sections. The east section is one-and-one half stories with a porch roof integral with that of the house. It is four bays wide, with entrance in the second bay. There is one dormer on the south (main) roof slope, and a freestanding brick replacement chimney at the east end. The house is built of log, covered by clapboard, which is covered by shingle. The old kitchen wing, just to the north, was attached in the 1960's.

Built onto the west gable end of this older section is the larger two-and-one-half story, frame, gable-roofed structure which has become the main block. It is three bays wide, with entrance in the third bay of the main south facade, and with a Colonial Revival door surround.

The one-and-one-half-story log section of this house was built late in the eighteenth century by Robert and Priscilla Orme on a part of Edmonston's Range which her father, Archibald Edmonston, had deeded to her in 1773 and called "Priscilla's Lot". When, after Priscilla's death, her heirs applied for division of the property, the house was described as a "comfortable log house, two rooms above and two on lower floor, with good brick chimneys". The house and farm were accordingly sold in 1823 to Evan Shaw; in his will, probated in 1857, he left the house and farm to his wife, Verlinda, with the understanding that after her death it was to go to two of their slaves, Henry Lee and Virginia Lee Brogden. The larger west section of the house was built during the last quarter of the nineteenth century, probably by William White.
