Other Type Name _____

Description:

Describe Setting:

Bridge 16072 carries Berwyn Road over Indian Creek in Prince Georges County, Maryland. The bridge is located in a wooded residential community. It is located in a wooded area and a bike trail crosses the road on the east side of the bridge. Berwyn Park athletic fields are located adjacent to the bridge.

Describe Superstructure and Substructure:

Bridge # 16072 is a single span steel beam bridge 67'± in length. The substructure consists of two concrete abutments and wingwalls. Lateral protection is provided by open pigeon hole parapets. The bridge deck carries a 30' wide clear roadway, and is overlaid with asphalt. In October 1994 subsurface boring exploration found that wood existed under the concrete. The engineers believe that this wood may be a timber pile foundation.

Some spalling in Bay # 8 is as deep as six inches, and has exposed rebar. A 1991 inspection report indicates that the side walls have random cracking, parapet walls have surface erosion, beams and bearing plates have heavy rust and scale.

Discuss Major Alterations:

There have been no major alterations of this bridge.

History:

When Built: 1933

Why Built: Local transportation needs

Who Built: State Roads Commission

Why Altered: Not Applicable

Was this bridge built as part of an organized bridge building campaign: Unknown

Surveyor Analysis:

This bridge may have NR significance for association with:

A Events Person

C Engineering/Architectural

Was this bridge constructed in response to significant events in Maryland or local history:

It is unknown whether this bridge was constructed in response to significant events in Maryland or local history.

When the bridge was built and/or given a major alteration, did it have a significant impact on the growth and development of the area?

It is unknown whether the construction and/or alteration of this bridge has had significant impact on the growth and development of the area.

Is the bridge located in an area which may be eligible for historic designation and would the bridge add to or detract from historic and visual character of the possible district?

Yes, this bridge may be located in an in an area which may be eligible for historic designation.

Is the bridge a significant example of its type?

This bridge seems to be an especially good example of a steel beam bridge of the period.

Does the bridge retain integrity of the important elements described in the Context Addendum?

Yes, this bridge appears to retain the integrity of its primary character defining elements as defined within the Context Addendum. The pigeon hole parapets are original, and the remains of some bridge hardware probably street lights are located on the parapets. The abutments and wingwalls also appear to be original.

Should this bridge be given further study before significance analysis is made and Why?

Further research of this bridge is unnecessary. This bridge appears to have retained its integrity, and is eligible for inclusion on the National Register of Historic Places.

**INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM**

Property/District Name: MD 434 over Indian Creek (Structure #16072), Prince George's County, MD
Survey Number: PG-67-25

Project: Bridge repair Agency: SHA

Site visit by MHT Staff: no yes Name _____ Date _____

Eligibility recommended Eligibility **not** recommended

Criteria: A B C D Considerations: A B C D E F G
 None

Justification for decision: (Use continuation sheet if necessary and attach map)

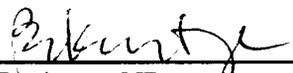

Structure #16072 is a rolled metal girder bridge which carries Berwyn Road over Indian Creek in Prince George's County, MD. The substructure consists of two concrete abutments and wingwalls. The parapets are the "open pigeon hole" type. In sum, the bridge is an example of the Maryland State Roads Commission's "Standard Plan" for reinforced concrete bridges. Based on the retention of its CDEs, the bridge is eligible for the National Register of Historic Places under Criterion C. Furthermore, the Interagency Historic Bridge Committee concurred with the consultant's recommendation of eligibility for Bridge #16072.

Documentation on the property/district is presented in: Project Review and Compliance
