Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Former Methodist church now used for video production. Basement constructed out of granite, 1923, the upper structure built 1934 in red brick. Contained main congregational area and parish offices at rear. Metal capping covers the castle-like towers and although the rectory and office space remain essentially unchanged, the main space has been divided in two for offices. The front addition was constructed in the 1960's of narrow off-white brick and replaced the main stairway. This addition shelters a loading-dock approached from Baltimore avenue. Another loading dock exists to the north adjacent to the former parish offices.

Prepare both a summary paragraph of significance and a general statement of history and support.

Only the basement of the First Methodist Church was completed by 1923, but was still used until funds were available to complete the building in 1934. The Church used the building until 1962 when it moved to a new church. The Post Office then used it for a postal sorting area when the front steps were removed and a commercial loading dock was installed. The main room was also divided at that time. Stain glass windows were removed and smaller metal framed windows installed of a different shape. Following the Post Office, CLI Productions uses the building for video editing and production.
