

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #68-47 Building Date: c. 1907

Building Name: Weckerly-Wedderburn House

Location: 3509 Rhode Island Avenue, Mt. Rainier, Maryland

Private/Residence/Occupied/Good/Restricted

Description

3509 Rhode Island Avenue is a two-story frame dwelling with a hipped roof and a square plan. The two-bay main (north) facade has a facade-wide hipped roof porch at the first story. The porch is supported by wooden Doric style columns on tall brick bases. The right (west) entrance bay of the first story has a single door and a small, multi-pane window at right. The west bay has a pair of attached 1/1 sash double-hung windows. The second story of the north facade has an identical, paired 1/1 sash double-hung window on the left (west) bay and a single 1/1 sash double-hung window at right above the entry door. The north slope of the roof has a hip roof dormer with a large horizontal 1/1 sash window. The east and west facades both have 1/1 sash double-hung at the first and second stories. The house maintains its early box-like configuration although it has been modernized with unsympathetic materials. The first story porch columns and bases are out of scale and do not appear to be original. The entry door and attic dormer window are inappropriate modern replacements. The exterior of the house has been sheathed with aluminum siding and the roof is covered with tar paper and presently unshingled.

Significance

The two-story house at 3509 Rhode Island Avenue (Block 2, Lot 10, Rhode Island Avenue Addition to Mt. Rainier) was built by 1907, when an improvement valued at \$1,500 is first recorded. Anna Weckerly purchased Lot 10 in December of 1907 from James C. and Blanche R. Rogers. The house could have been built by either the Rogers or Weckerly who sold Lot 10 by April of 1909. Although the house had been modernized with unsympathetic materials, the straightforward, box-like configuration and detail of this house are still intact and its clearly early 20th century character contributes to the survey area.
