Eligibility recommended \_\_\_\_\_ Eligibility not recommended

Criteria:  A  B  C  D Considerations:  A  B  C  D  E  F  G  None

Justification for decision: (Use continuation sheet if necessary and attach map)

Based on our current knowledge of the resource, the Parkwood Street Bridge does not meet any of the National Register Criteria for individual listing. The 1940, two lane, two-span continuous steel bridge crosses a minor tributary of Beaver Dam Creek in a mid 20th century residential suburb on the outskirts of Washington, D.C. The bridge is an extremely common type and is severely deteriorated. The neighborhood in which the bridge is located does not appear to be eligible for the National Register of Historic Places.
