Description of Property and Eligibility Determination *(Use continuation sheet if necessary and attach map and photo)*

The resource is an International style, former single family dwelling typical of the millions houses constructed nationally between 1946 and 1955. The exact date of construction is not known. The walls are constructed of brick or concrete block and are clad with imitation board and batten siding. The roof is concealed behind an asphalt-clad parapet. A single room addition has been made to the east side of the building. The large parking area between the building and Annapolis Road indicates that the building may have been used recently as a business.

The property is not known to be associated with events that have made a significant contribution to the broad patterns of local, state, or national history (Criterion A). The property is not known to be associated with the lives of persons significant in the local, state, or national past (Criterion B). The property does not embody the distinctive characteristics of a type, period, or method of construction; represent the work of a master; or possess high artistic values (Criterion C). Finally, the property is not likely to yield information important in local, state, or nation prehistory or history (Criterion D).
