Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo):*

This property has not been previously surveyed. The Smith Property is a banked, 1-story front-gable frame block with a shallow-pitch roof set on a concrete foundation. The front porch has been partially enclosed, and there is a shed-roofed addition along the rear elevation where the exterior brick chimney is located. Fenestration includes a display window and 1/1 double-hung sash. The structure is clad with vinyl/metal horizontal siding except for the walls of the inset porch, which is a cast-concrete faux ashlar. There is a single outbuilding on the property, a small gable-roofed frame shed.

Constructed about 1930, this traditional vernacular dwelling is not eligible for the National Register of Historic Places. It is a common vernacular early-20th century residential form that has been altered through the addition of new materials. The property is not eligible under Criterion A, as research conducted indicates no association with any historic events or trends significant in the development of national, state, or local history. Historic research indicates the property has no association with persons who have made significant contributions to history, therefore it does not meet Criterion B. It is not eligible under Criterion C, as it is a common vernacular form whose architectural integrity is compromised. Investigations have not been conducted to determine whether the property has the potential to yield information important in history or pre-history, therefore National Register Criterion D cannot be assessed at this time.
