

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #71B-13 Building Date: 1901
Building Name: Edward Lancaster House
Location: 8401 Chestnut Avenue, Bowie, Maryland
Private/Residence/Occupied/Good/Inaccessible

Description

The Edward Lancaster House is a two-story frame gable-roof dwelling. It is cross gabled, and built in the shape of a T, a variation of the gable front and wing plan. Sheltering the south, west and north elevations of the wing is a one-story hip-roof porch which is supported by Tuscan columns and has a plain balustered railing; the porch rests on a concrete block foundation. The wing joins at right angles the one-bay-by-three-bay main block of the house. The roof is covered with patterned tin and there are two corbelled brick chimneys at the ridge, one centered in the main block, the other in the west wing. The cornice is boxed with crown molding, and is returned at all gable ends. The building rests on a brick foundation which encloses a basement. There is a one-story addition on the east of the main block, its gable ridge at right angles to that of the main block. There is a modern semi-octagonal bay at its south facade, and a one-story shed addition on the north.

Significance

The Edward Lancaster House is a modest cross-gable frame dwelling, typical of the houses being built in Prince George's County at the turn of the century. It stands on a group of lots in the southeast part of the town of Huntington, now known as Bowie. By 1880, approximately 60 families had settled there; a majority of the working population was employed by the Railroad company. The Lancaster family settled in Bowie in 1900. Edward Lancaster was the Baggage Master for the Railroad company; he bought up a group of lots which were offered at tax sale, and in 1901 constructed a T-shaped cross-gable house in which he raised his family. Several small additions have been built onto the house, but have not altered the appearance of the building from the front. The house remained in the Lancaster family until the death of Lancaster's widow, Lula, in 1942. Modest in plan and in detail, the Lancaster House is still a handsome building and is a visual landmark on one of the principal streets of the town of Bowie.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Edward Lancaster House is a two-story frame gable-roof dwelling. It is cross gabled, and built in the shape of a T, a variation of the gable front and wing plan. It stands on one of the lots originally platted in 1870 for Huntington City, now known as Bowie.

The long (one bay by two bay) west wing of the house fronts westward on Chestnut Avenue, but the principal entrance is in the second bay of its south facade through a modern door with plain board surround. Sheltering the south, west and north elevations of the wing is a one-story hip-roof porch which is supported by Tuscan columns and has a plain balustered railing. The columns, rail, and cornice of the porch are painted blue; the porch rests on a concrete block foundation. The wing joins at right angles the one-bay-by-three-bay main block of the house.

The building is sided with rectangular lapped shingle painted white. Windows are generally 6/6 double hung sash with plain board surrounds painted blue. There are no shutters. The roof is covered with patterned tin and there are two corbelled brick chimneys at the ridge, one centered in the main block, the other in the west wing. The cornice is boxed with crown molding, and is returned at all gable ends. Details, including corner boards and cornices, are painted blue. The building rests on a brick foundation which encloses a basement; there is a bulkhead entrance to the basement centered at the north gable end of the main block.

There is a one-story addition on the east of the main block, its gable ridge at right angles to that of the main block. The planes of its roof are of uneven pitch. There is a modern semi-octagonal bay at its south facade, and a one-story shed addition on the north.

There are two outbuildings north of the house. To the west is a two-bay shed-roof garage; it has German siding painted white, with blue trim. To the east is a gable-roof concrete block storage building, painted white. Immediately south of the storage building is a very large old willow oak. The house is approached from the south, by an unpaved drive which runs north from 13th Street and then curves east between the house and the outbuildings.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Edward Lancaster House is a modest cross-gable frame dwelling, typical of the houses being built in Prince George's County at the turn of the century. It stands on a group of lots in the southeast part of the town of Huntington, now known as Bowie.

The town of Huntington was established in 1870 at the junction of the Popes Creek line of the Baltimore and Potomac Railroad, and the branch line into Washington. A Propectus describing the proposed new town was published and circulated in 1870. It offered building lots for sale, many of which were soon purchased.¹ By 1880, approximately 60 families had settled there; a majority of the working population was employed by the Railroad company.²

Before the end of the nineteenth century, the town of Huntington had come to be known as Bowie, after Oden Bowie, president of the B&P Railroad and Governor of Maryland 1869 to 1872. By 1900, there were 100 dwellings in the town; in this year, the Lancaster family settled in Bowie. Edward Lancaster was the Baggage Master for the Railroad company; he bought up a group of lots which were offered at tax sale, and in 1901 constructed a T-shaped cross-gable house in which he raised his family.³ Several small additions have been built onto the house, but have not altered the appearance of the building from the front.

The house remained in the Lancaster family until the death of Lancaster's widow, Lula, in 1942. Since that time, it has had a series of owners, including an eight year period when it was owned by the Bowie Volunteer Fire Department.⁴

The Lancaster family has been important to the town of Bowie. George Lancaster, son of Edward, grew up in this house, and went on to become a physician. He practiced in Bowie and lived in the house on 11th Street built by Dr. Nelson Ryon (cf. #71B-2-3). Several of George Lancaster's children still live in the Bowie area.
