Eligibility recommended Eligibility not recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

The Air Force's consultant determined these buildings ineligible based on age and/or integrity. The World War II buildings have been significantly altered and do not form any cohesive architectural indentity. The Trust concurred that all of these buildings were not eligible.

Documentation on the property/district is presented in: with this MHIP form and Andrews Air Force Base compliance file

Capsule Summary

Inventory No. PG: 77-51
Property Name: Farm Housing #04570
Location: Andrews Air Force Base
Ownership: Public/Military
Date of Construction: ca. 1925

Building #04570 is a one-story tall, wood-frame residential structure located on the west side of the base. It is a three-bay wide square house, with smaller additions on each side and the rear of the main building. The main entrance to the house is centered in the front, through a door set flush with the building front. Windows in the building are one-over-one, double-hung aluminum sash. The roof is high-pitched gable, covered with asphalt shingles. The entire building is covered with aluminum siding. The plan of the building has been changed to accommodate additional living space, bedrooms, and toilets. Landscape plantings surround the building, including bushes and mature trees.

Building #04570 is one of the handful of residential structures that existed on the Andrews AFB site prior to its acquisition for construction of the base that remain in use. The building was one of many houses that supported the small truck farming community in the area. Since its acquisition, the building has been modified to meet military livability requirements and codes. These changes have affected its floor plan, room sizes and use, and numbers of bedrooms and baths. In addition, the exterior of the building has been changed through the addition of a sun room on one side, and a kitchen wing at the rear. The result of these changes is that the architectural integrity and character of the property has been significantly damaged. A large number of these changes would have to be reversed to recapture the original appearance and character of the house.
